### Table 3. Farms and Farm Acreage, by Color and Tenure of Operator: Censuses of 1920 to 1959

#### Definitions and Explanations

- **Acreage harvested:** Acreage for which figures are available, except that corn cut for forage was excluded as most of this acreage was probably duplicated in the acreage of corn harvested for grain.

#### Data Sources

- Data for 1910 and 1920 are based on reports for only a sample of farms. See text.

---

**Note:** The table provides detailed data on farms and farm acreage, including those operated by full cash tenants, share tenants, cash tenants, share-crop tenants, managers, and other tenure or unspecified tenants. Data are available for different years and states, with specific information on the number of farms and acres for each category. The table includes notes on data sources and considerations for specific years, such as the exclusion of corn acreage for forage from the total harvested acreage for corn. The data are collected over a range of years, from 1920 to 1959.
