Survey Methodology: National Dairy Products Sales Report

Data collection: The Dairy Products Sales Report is based on survey data collected after Saturday of each week. Reporting entities are required to submit sales information in the electronic Dairy Product Mandatory Reporting (DPMR) system generally by noon on Tuesday of the following week.

Participants: The DPMR program consists of 96 reporting entities selling one million pounds or more of dairy products as defined by Public Law Number 106-532. There are 16 plants reporting 40 pound cheddar blocks, 13 plants reporting 500 pound cheddar barrels, 19 plants reporting butter, 28 plants reporting nonfat dry milk, and 20 plants reporting dry whey.

Terms and definitions: Participating manufacturers complete the weekly questionnaires using definitions from the Code of Federal Regulations Title 7 Part 1170 (7 CFR 1170), instructions provided during the Annual Validation Interview, reporting specifications listed on the questionnaire, and the questions and answers published at: <http://www.ams.usda.gov/AMSV1.0/DairyProductMandatoryReporting>.

The sales information included in the National Dairy Products Sales Report is collected for all qualifying manufacturers of the following products:

- Salted butter (80% butterfat), fresh or storage, in 25 kilogram and 68 pound boxes meeting USDA Grade AA standards.
- Cheddar cheese in 40 pound blocks, colored between 6 and 8 on the National Cheese Institute color chart, meeting Wisconsin State Brand, USDA Grade A, or better standards.
- Cheddar cheese in 500 pound barrels, white, meeting Wisconsin State Brand, USDA Extra Grade, or better standards.
- Edible non-hygroscopic dry whey in 25 kilogram bags, 50 pound bags, totes, and tankers meeting USDA Extra Grade standards.
- Non-fortified, nonfat dry milk in 25 kilogram bags, 50 pound bags, totes, and tankers meeting USDA Extra Grade or USPH Grade A standards.

Reliability: All reported sales information is required to be made available upon request. The reported sales information includes original contracts, agreements, receipts, and other records associated with the sale of qualified dairy products during the two-year period beginning on the date of the creation of the sales report.

Report Aggregation: Sales information reported by manufacturers is reviewed for reasonableness and consistency by comparing data reported in prior weeks to data reported by other firms in their region and national trends. During weekly reviews AMS contacts manufacturers to verify any unusual data relationships and in some cases uses on-site verification to ensure accurate information.

Revisions: The National Dairy Products Sales Report is subject to revisions to the previous four weeks.

Information Contacts

Listed below are the specialists in the Agricultural Marketing Service, Dairy Programs, Market Information Branch to contact for additional information. E-mail inquiries may be sent to dpp@ams.usda.gov
