

Agricultural Prices

ISSN: 1937-4216

Released July 31, 2017, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, United States Department of Agriculture (USDA).

June Prices Received Index Decreased 0.1 Percent

The June Prices Received Index (Agricultural Production), at 98.1, decreased 0.1 percent from May 2017. At 87.2, the Crop Production Index increased 0.3 percent. The Livestock Production Index, at 107.3, increased 0.6 percent. Producers received lower prices for cattle, celery, and tomatoes but higher prices for oranges, hogs, milk, and lemons. Compared with a year earlier, the Prices Received Index is up 4.6 percent. The Crop Production Index decreased 1.4 percent but the Livestock Production Index increased 9.6 percent. In addition to prices, the indexes are influenced by the monthly mix of commodities producers market. Increased monthly movement of wheat, hay, peaches, and corn offset the decreased marketing of oranges, broilers, cattle, and milk. The Food Commodities Index, at 104.1, increased 0.3 percent from the previous month and 6.7 percent from June 2016.

June Prices Paid Index Down 0.1 Percent

The June Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 106.9, is down 0.1 percent from May 2017 but is up 0.3 percent from June 2016. Lower prices in June for concentrates, feeder pigs, hay & forages, and complete feeds more than offset higher prices for other services, feeder cattle, tractors, and supplies & repairs.

June Prices Received by Farmers

The June Prices Received Index for agricultural production is 98.1 percent of its 2011 base, down 0.1 percent from the May 2017 index but up 4.6 percent from the June 2016 index.

Crop production: The June index, at 87.2, increased 0.3 percent from May but is 1.4 percent below June 2016. The Fruit & Tree Nut Index and Other Crop Index increases more than offset the decrease for the Vegetable & Melon Index and the Grain & Oilseed Index.

Grain and oilseed: The June index, at 62.5, is down 1.3 percent from May and is 7.8 percent lower than June 2016. The Oilseed Index, Food Grain Index, and Feed Grain Index were all lower.

Feed grain: The June index, at 57.6, is down 0.2 percent from last month and is 10 percent below a year ago. The corn price, at \$3.43 per bushel, is down 2 cents from last month and 39 cents from June 2016. At \$5.64 per cwt, sorghum grain is 47 cents higher than May but is 68 cents lower than June a year earlier.

Food grain: At 61.5, the index for June is 1.0 percent lower than the previous month but is up 1.7 percent from a year earlier. The June price for all wheat, at \$4.37 per bushel, is up 32 cents from May and 17 cents from June 2016.

Oilseed: At 72.9, the index for June is down 1.5 percent from May and is 10 percent lower than June 2016. The soybean price, at \$9.10 per bushel, is down 16 cents from May and \$1.10 from June a year earlier.

Fruit and tree nut: The June index, at 126.9, is up 19 percent from May and 0.3 percent from a year earlier. The price increase for oranges more than offset the price decrease during June for grapefruit.

Vegetable and melon: At 109.9, the index for June is down 3.6 percent from the previous month but is 0.5 percent higher than June 2016. Price declines during June for celery, tomatoes, and lettuce more than offset price increases for onions, cantaloupes, and sweet corn.

Other crop: The June index, at 82.4, is up 2.2 percent from the previous month and 2.5 percent from June 2016. The all hay price, at \$143.00 per ton, is down \$3.00 from May but is \$9.00 higher than June 2016. At 69.7 cents per pound, the price for upland cotton is up 0.5 cents from May and 2.7 cents from June 2016.

Livestock production: The index for June, at 107.3, increased 0.6 percent from the previous month and 9.6 percent from June a year earlier. Compared with a year ago, prices are higher for milk, broilers, cattle, market eggs, hogs, and calves. The price for turkeys is down from a year earlier.

Meat animal: At 111.1, the June index is down 0.3 percent from the previous month but is 5.7 percent higher than a year earlier. At \$62.10 per cwt, the June hog price is up \$8.50 from May and \$1.50 from a year earlier. The June beef cattle price of \$132.00 per cwt is down \$4.00 from the previous month but is \$7.00 higher than June 2016.

Dairy: The index for June, at 86.1, is up 3.6 percent from the previous month and is 17 percent higher than June a year earlier. The June all milk price of \$17.30 per cwt is up 60 cents from May and \$2.50 from June 2016.

Poultry and egg: At 116.3, the June index is up 0.3 percent from May and is 6.7 percent above June 2016. The June market egg price, at 37.6 cents per dozen, increased 1.7 cents from May and 14.5 cents from June 2016. The June broiler price, at 66.0 cents per pound, is unchanged from May but is 9.0 cents higher than a year earlier. At 65.8 cents per pound, the June turkey price is down 2.8 cents from the previous month and 20.7 cents from June 2016.

³ Beef cows and cull dairy cows sold for slaughter.

⁴ Animals sold for dairy herd replacement only. Prices available for January, April, July, and October.

⁵ Before deductions for hauling. Includes quality, quantity, and other premiums. Excludes hauling subsidies.

⁶ Live weight equivalent price.

⁷ Mid-month price.

⁸ Also referred to as table eggs.

⁹ Live weight equivalent price is used when actual live weight price is not available. Beginning January 2011, price reflects FOB shipping point basis. Prior year price reflects delivered basis.

² Includes Florida, Hawaii, Louisiana, and Texas.

Parity Prices

Parity prices based on data January 2017 and adjusted base price data from which parity prices are computed, are presented in the table on pages 36 through 40. Annual average prices for 2007 through 2016 for use in parity computations, and ten-year averages for 2006-2015 and 2007-2016 are shown on pages 42 through 51.

Parity Prices shown on the following pages are computed under the provisions of Title III, Subtitle A, Section 301(a) of the Agricultural Adjustment Act of 1938 as amended by the Agricultural Acts of 1948, 1949, 1954, and 1956.

The major provisions of the amended Act relating to the calculation of parity prices are as follows:

"(1) (A) The 'parity price' for any agricultural commodity, as of any date, shall be determined by multiplying the adjusted base price of such commodity as of such date by the parity index as of such date."

"(B) The 'adjusted base price' of any agricultural commodity, as of any date, shall be (i) the average of the prices received by farmers for such commodity, at such time as the Secretary may select during each year of the ten-year period ending on the 31st of December last before such date, or during each marketing season beginning in such period if the Secretary determines use of a calendar year basis to be impracticable, divided by (ii) the ratio of the general level of prices received by farmers for agricultural commodities during the period January 1910 to December 1914, inclusive."

"(C) The 'parity index', as of any date, shall be the ratio of (i) the general level of prices for articles and services that farmers buy, wages paid hired farm labor, interest on farm indebtedness secured by farm real estate, and taxes on farm real estate, for the calendar month ending last before such date to (ii) the general level of such prices, wages, rates, and taxes during the period January 1910 to December 1914, inclusive."

"(D) The prices and indexes provided for herein, and the data used in computing them, shall be determined by the Secretary, whose determination shall be final."

Section 301(a) (1) (F) outlines authority for the Secretary of Agriculture to make special adjustments in the method of computing parity prices for particular commodities if the method outlined in the Act results in parity prices seriously out of line with those of other commodities.

The parity prices shown in this report are based on the provisions of the amended Act. Briefly, the actual method of computation is as follows:

a. The average of prices received by farmers for individual commodities for the 10 preceding years is calculated (for 2017 it is the 2007-2016 average). An allowance for unredeemed loans and other supplemental payments resulting from price support programs, such as the deficiency payments for grains and cotton, is included for those commodities for which applicable.

b. This 10-year average is divided by the average of the Index of Prices Received by Farmers for the same 10 preceding calendar years, adjusted to include an allowance for unredeemed loans and other supplemental price support operations, to give an "adjusted base price".

c. Parity prices are computed by multiplying the "adjusted base prices" by the current Parity Index (the Index of Prices Paid by Farmers, including Interest, Taxes, and Wage Rates, 1910-1914=100).

Parity prices are calculated in terms of prices received by farmers in the local markets in which they ordinarily sell. This means that the parity prices apply to the average of all classes and grades of the commodity as sold by all farmers in the United States, except as otherwise specified. Fruits and vegetables for fresh use and for processing are usually considered separate commodities and separate parity prices are calculated. The Agricultural Marketing Agreement Act of 1937 provided for parity prices for certain commodities covered by a marketing agreement or order program. Under present legislation, United States parity prices, with appropriate adjustments where needed, may be used for the purpose of this Act.

The indexes used in the computation of parity prices are published currently in *Agricultural Prices*. For the purpose of illustrating the computation of parity prices, the calculation of the parity price for corn based on data for January 2017 is given below.

The 120-month, January 2007-December 2016 average of prices received by farmers for corn was \$4.59 per bushel, adjusted to allow for unredeemed loans and other supplemental payments resulting from price support operations. The 120-month average of the Index of Prices Received by Farmers, adjusted to include an allowance for unredeemed loans, etc., was 976 (1910-1914=100). The adjusted base price is obtained by dividing \$4.59 by 9.76 (0.451). The adjusted base prices when multiplied by 2881percent, the Parity Index (1910-1914=100), results in the corn parity price of \$13.00 for January 2016.

Prices Received For Average Base Period – United States: January 1910-December 1914

Commodity and unit	Average Price
All wheat dollars/bushel	0.880
Rice rough dollars/cwt	1.81
Corn dollars/bushel	0.649
Oats dollars/bushel	0.399
All barley dollars/bushel	0.617
All hay, baled dollars/ton	11.90
Cotton, Upland cents/pound	11.92
Peanuts cents/pound	4.83
Cottonseed dollars/ton	21.80
Flaxseed dollars/bushel	1.68
Potatoes dollars/cwt	1.13
Sweet potatoes dollars/cwt	1.61
Dry edible beans dollars/cwt	3.39
All beef cattle dollars/cwt	5.52
Calves dollars/cwt	6.84
All hogs dollars/cwt	7.29
Lambs dollars/cwt	5.96
Sheep dollars/cwt	4.59
All milk dollars/cwt	1.61
All eggs cents/dozen	21.60
Turkeys, live cents/pound	14.30
Wool cents/pound	17.80

Parity Ratio

The parity ratio (the Index of Prices Received by Farmers for the products they sell divided by the Parity Index (1910-1914=100) provides an indication of the per unit purchasing power of farm commodities generally in terms of the goods and services currently bought by farmers, in relation to purchasing power of farm products in the 1910-1914 base period. Thus, a Parity Ratio less than 100 indicates that the average per unit purchasing power of all farm products is lower than during the 1910-1914 period.

The parity ratio is a measure of price relationships. The ratio is not a measure of farm income, farmers' total purchasing power, or farmers' welfare. The latter depends upon a number of factors other than price relationships, such as changes in production efficiency and technology, quantities of farm products sold, and supplementary income, including that from off-farm jobs and federal programs.

An adjusted parity ratio is computed and published which incorporates supplementary income for federal farm programs. A "preliminary adjusted parity ratio reflecting government payments" based on the forecast of direct government payments for the year is published each quarter in *Agricultural Prices*.

Prices Received Adjusted Base Prices and Parity Prices – United States: July 2017 (continued)

(NA) Not available.

- 1/ Adjusted base price 1910-1914 derived by dividing the average of 10 season average prices 2007-2016, including an allowance where appropriate for unredeemed loans and other supplemental payments resulting from price support operations, by 978 percent (120-month, January 2007-December 2016 average of the index of prices received by farmers adjusted to include an allowance for unredeemed loans and other supplemental payments) unless otherwise noted.
- 2/ Legally applicable parity prices for the following calendar month.
- 3/ Adjusted base price 1910-1914 derived from 120-month, January 2007-December 2016 average including an allowance where appropriate for unredeemed loans and other supplemental payments resulting from price support operations.
- 4/ The previous year marketing year average prices are not available until after late June when the Non-citrus Fruit and Nut report is released. Therefore, the adjusted base prices are carried forward until July, except citrus items (excluding limes) and cranberries.
- 5/ Dried basis.
- 6/ Prices are equivalent packinghouse-door returns for California, Michigan, New York (apples only), and Washington (apples, peaches, and pears). Prices "as sold" for other states.
- 7/ Equivalent returns at packinghouse-door.
- 8/ Equivalent returns at processing plant door.
- 9/ Equivalent returns for bulk fruit at first delivery point.
- 10/ Based on 'as sold' prices for fresh fruit in all states.
- 11/ Prices are average FOB shipping point.
- 12/ Relates to prices including average conditional payments per ton made under the sugar acts of 1937 and 1948. Crop deficiency and abandonment payments not included.
- 13/ Prices on in-shell basis except almonds which are on shelled basis.
- 14/ Includes some processing.
- 15/ Monthly and/or season average prices are no longer estimated for these items. Therefore, the adjusted base price is brought forward from July 1986.
- 16/ Monthly and/or season average prices are no longer estimated for this item. The adjusted base price is brought forward from 2016
- 17/ Monthly and/or season average prices are no longer estimated for this item. The adjusted base price is brought forward from 1988.
- 18/ Processing prices combined with fresh beginning in 2002.

(D) Withheld to avoid disclosing data for individual operations.

¹ Average local market price; does not include incentive payment per pound, the 2006-2015 and 2007-2016 averages for parity purposes include this allowance.

² Consistent with legislation quoted in this report, citrus prices shown for 2016 relate to the citrus crop designated as 2015-2016 in the production reports.

³ Equivalent returns at processing plant door.

⁴ Based on "as sold" prices for fresh fruit in all states.

⁵ Dried basis.

⁶ Equivalent returns at packinghouse-door. Includes some processing beginning in 2002.

⁷ Processed estimates discontinued in 2009.

⁸ Equivalent returns for bulk fruit at first delivery point.

⁹ Equivalent packinghouse-door returns for California, New York (applies only starting in 1985), Oregon (except peaches), and Washington. Prices "as sold" for other states.

¹⁰ Average F.O.B. shipping point prices.

¹¹ Includes strawberries for processing in states where the processing crop is not estimated separately.

¹² Prices include average conditional payments per ton made under the sugar acts of 1937 and 1948. Crop deficiency and abandonment payments not included.

¹³ Prices on in-shell basis except almonds which are on shelled basis.

¹⁴ Includes some processing.

Reliability of Prices Received Estimates

Definition: Prices received represent sales from producers to first buyers. They include all grades and qualities. The average commodity price from the survey multiplied by the total quantity marketed theoretically should give the total cash receipts for the commodity.

Survey procedures: Primary sales data used to determine grain prices were obtained from probability samples of about 1,900 mills and elevators. These procedures ensure that virtually all grain moving into commercial channels has a chance of being included in the survey. Generally, States surveyed account for 90 percent or more of total United States production. Livestock prices are obtained from packers, stockyards, auctions, dealers, and market check data from AMS-USDA, private marketing organizations, and state commodity groups and agencies. Inter-farm sales of grain and livestock are not included since they represent very small percentages of the total sales. Grain marketed for seed is also excluded. Fruit and vegetable prices are obtained from sample surveys and market check data from AMS-USDA, private marketing organizations, state agencies, and universities.

Summary and estimation procedures: Survey quantities sold are expanded by strata to state levels and used to weight average strata prices to a state average. State prices are then weighted to a United States price based on expanded sales. Recommendations are prepared by the Regional Field Offices and reviewed by the Agricultural Statistics Board in Washington, D.C. State recommendations are reviewed for reasonableness with survey data, other States, and recent historic estimates.

Revisions: In general, revisions are made during annual commodity market year estimation time, following five-year Census revisions, or when later information is received. Revisions are published in monthly issues of *Agricultural Prices*.

Reliability: United States price estimates based on probability surveys generally have a sampling error of less than one percent for the major commodities such as corn, wheat, soybeans, cotton, and rice. Current methods of summarization for non-probability commodities are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors at around five percent. Any non-sampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these non-sampling errors.

Program Changes: After the Council on Food, Agricultural and Resource Economics (C-FARE) 2009 program review which included changes in farm production practices, plans were implemented to make necessary program improvements in the agricultural price program. The index group structure for prices received was modified to maintain a more universal structure and consistency with the required 1910-1914 series.

Modifications implemented January 2014 include the following: update the current 1990-1992 base reference period to 2011, link the 1910-1914 series to the updated base reference period, 2011, create index groups used universally by researchers, data users, and policymakers, re-classify agricultural commodities into the index groups, expand the commodity coverage for vegetable, melon, non-citrus, and tree nuts, update monthly market weights, and adjust (normalization) current five year moving average cash receipts and farm input cost weights.

Modifications implemented January 2015 discontinued preliminary prices and replaced the annual average index with an annual index.

The February 2016 program update changed the rounding of the 2011 base period indexes to nearest tenth of a percent. The 1910-1914 base period indexes remain rounded to the nearest whole number.

See Price Program Links at end of this report for program change details.

June Prices Paid by Farmers

The June Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 106.9, is down 0.1 percent from May 2017 but is up 0.3 percent from June 2016.

Production: The June index, at 104.8, is down 0.2 percent from May and is 0.5 percent lower than last year. Lower prices for concentrates, feeder pigs, hay & forages, and complete feeds more than offset higher prices for other services, feeder cattle, tractors, and supplies & repairs.

Feed: At 95.2, the June index decreased 1.2 percent from May and is down 13 percent from last June. Since May, prices are lower for concentrates, hay & forages, and complete feeds.

Livestock and poultry: The June index, at 107.9, increased 0.1 percent from May and is up 3.1 percent from last year. Since May, higher prices for feeder cattle more than offset lower prices for feeder pigs. The June feeder cattle price, at \$150.00 per cwt, is up \$1.00 per cwt from the May price. June feeder pigs averaged \$126.00 per cwt, down \$7.00 per cwt from May.

Fertilizer: The index for June, at 69.8, is down 1.0 percent from May and is 6.7 percent below June a year ago. Since May, prices are lower for mixed fertilizer, potash & phosphate, and nitrogen.

Chemicals: The June index, at 108.3, is down 0.1 percent from May and is down 0.6 percent from last June.

Fuels: At 59.9, the June index is down 3.1 percent from May but is 1.2 percent above June 2016. Compared with May, prices are lower for LP gas, diesel, and gasoline.

Machinery: The index for June, at 117.8, was unchanged from May but is 2.4 percent above last June. Compared with last month, unchanged prices for self-propelled machinery and other machinery offset higher prices for tractors.

Consumer Price Index: The June 2017 Consumer Price Index for All Urban Consumers (CPI-U), as issued by the Bureau of Labor Statistics, increased 1.6 percent over the last 12 months to an index level of 244.955 (1982-1984=100). For the month, the index increased 0.1 percent prior to seasonal adjustment.

Feed price ratio ¹	June 2016	May 2017	June 2017
Broiler-feed: pounds of broiler grower feed equal in value to 1 pound of broiler, live weight ²	5.1	6.6	6.7
Market egg feed: pounds of laying feed equal in value to 1 dozen eggs ³	2.5	4.2	4.5
Hog-corn: bushels of corn equal in value to 100 pounds of hog, live weight	15.9	15.5	18.1
Milk-feed: pounds of 16% mixed dairy feed equal in value to 1 pound of whole milk ⁴	1.91	2.21	2.32
Steer & heifer-corn: bushels of corn equal in value to 100 pounds of steer & heifers, live weight	33.2	40.0	38.8
Turkey-feed: pounds of turkey grower equal in value to 1 pound of turkey, live weight ⁵	8.9	7.7	7.4

¹ Effective January 1995, prices of commercial prepared feeds are based on current United States prices received for corn, soybeans, alfalfa hay, and all wheat.

² The price of commercial prepared broiler feed is based on current United States prices received for corn and soybeans. The modeled feed uses 58 percent corn and 42 percent soybeans.

³ The price of commercial prepared layer feed is based on current United States prices received for corn and soybeans. The modeled feed uses 75 percent corn and 25 percent soybeans.

⁴ The price of commercial prepared dairy feed is based on current United States prices received for corn, soybeans, and alfalfa. The modeled feed uses 51 percent corn, 8 percent soybeans, and 41 percent alfalfa.

⁵ The price of commercial prepared turkey feed is based on current United States prices received for corn, soybeans, and wheat. The modeled feed uses 51 percent corn, 28 percent soybeans, and 21 percent wheat.

Prices Received Used to Calculate Feed Price Ratios – United States: June 2017 with Comparisons

[Price data source for livestock and poultry commodities is United States Department of Agriculture's Agriculture Marketing Service]

Item	June 2016	May 2017	June 2017
	(dollars)	(dollars)	(dollars)
Broilers, livepound	0.570	0.660	0.660
Eggs, marketdozen	0.231	0.359	0.376
Hogs, allcwt	60.60	53.60	62.10
Milk, allcwt	14.80	16.70	17.30
Steers and heiferscwt	127.00	138.00	133.00
Turkeys, livepound	0.865	0.686	0.658
Cornbushel	3.82	3.45	3.43
Hay, alfalfaton	142.00	155.00	152.00
Soybeansbushel	10.20	9.29	9.10
Wheat, allbushel	4.20	4.05	4.37

Prices Paid for Feeder Livestock – United States: June 2017 with Comparisons

[Price data source is United States Department of Agriculture's Agriculture Marketing Service]

Item	June 2016	May 2017	June 2017
	(dollars)	(dollars)	(dollars)
Feeder cattle & calvescwt	142.00	149.00	150.00
Feeder pigscwt	126.00	133.00	126.00

Reliability of Prices Paid Estimates

Definition: Prices paid by farmers represent the average costs of inputs purchased by farmers and ranchers to produce agricultural commodities. Conceptually, the average price when multiplied by quantity purchased should equal total producer expenditures for the item.

Survey procedures: The prices paid data are obtained from establishments that sell goods and services to farmers and ranchers. Annually, about 8,500 firms are randomly selected from lists by type of item sold with an average response rate in the range of 75-80 percent. Firms are asked to report the price for the specified item "most commonly bought by farmers" or that was the "volume seller". Approximately 135 items are surveyed each March to represent all production input items purchased. The survey reference period for most items is the five business days centered at the 15th of the month. Separate prices paid surveys are conducted for agricultural chemicals, fuels, feed, fertilizer, machinery, and seed.

Summary and estimation procedures: The annual March Prices Paid Survey is summarized as a non-probability survey. Average prices reported are aggregated to the region and United States level using weights available from expenditure data and other administrative sources. Price recommendations are prepared by the Regional Field Offices and Headquarters for review by the Agricultural Statistics Board in Washington, D.C. Also, the change in price level for individual items surveyed are combined to the regional and United States levels, and are published as prices paid indexes referenced to a specific base period. Prices paid indexes for new autos and trucks, building materials, farm supplies, motor supplies, and marketing containers are updated based on price changes measured in selected Bureau of Labor Statistics (BLS) indexes.

Revisions: Any revisions are published in the monthly and in annual issues of Agricultural Prices. The basis for revision must be supported by additional data that directly affect the level of the estimate. More revisions are likely for March when separate prices paid surveys are conducted, in lieu of BLS indexes, by the USDA to measure price change.

Reliability: Current methods of summarization for the March data are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors for major items around 10 percent. Any non-sampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these non-sampling errors.

Program change: Effective January 2014, the National Agricultural Statistics Service modified the five-year moving weights and updated the base reference period. In January 2015, publication of preliminary prices was suspended, and the annual average index was replaced by an annual index.

As of January 2014, the 1990-1992 base reference period was updated to 2011. Five-year moving average weights are adjusted (normalized) to minimize the effects of price changes. The 1910-1914=100 price indexes, required by statute for computing parity prices, were linked forward based on the changes in the new 2011=100 indexes. The new indexes were constructed by multiplying the ratios of the current prices to the base period prices by the moving average weights.

Modifications implemented January 2015 discontinued preliminary prices and replaced the annual average index with an annual index.

The April 2015 program update discontinued publication of the annual March survey prices paid data.

The February 2016 program update changed the rounding of the 2011 base period indexes to nearest tenth of a percent. The 1910-1914 base period indexes remain rounded to the nearest whole number.

See Price Program Links at end of this report for program change details.

Information Contacts

General

Jody McDaniel, Chief, Environmental, Economics and Demographics Branch..... (202) 720-6146

Crop Prices Received

Lance Honig, Chief, Crops Branch (202) 720-2127

Anthony Prillaman, Head, Field Crops Section (202) 720-2127

Chris Hawthorn – Corn, Flaxseed, Proso Millet (202) 720-9526

James Johanson – County Estimates, Hay (202) 690-8533

Jeff Lemmons – Oats, Soybeans (202) 690-3234

Scott Matthews – Barley, Crop Weather..... (202) 720-7621

Sammy Neal – Peanuts, Rice (202) 720-7688

Jean Porter – Rye, Wheat (202) 720-8068

Bianca Pruneda – Cotton, Cotton Ginnings, Sorghum..... (202) 720-5944

Travis Thorson – Canola, Mustard Seed, Rapeseed, Safflower, Sunflower (202) 720-7369

Jorge Garcia-Pratts, Head, Fruits, Vegetables and Special Crops Section..... (202) 720-2127

Vincent Davis – Cherries, Fresh and Processing Vegetables, Onions, Strawberries, Sugar Crops (202) 720-2157

Fleming Gibson – Citrus, Coffee, Tropical Fruits..... (202) 720-5412

Greg Lemmons – Berries, Cranberries, Potatoes, Sweet Potatoes (202) 720-4285

Dan Norris – Austrian Winter Peas, Dry Beans, Dry Edible Peas, Lentils, Mint, Mushrooms, Peaches,
Pears, Wrinkled Seed Peas (202) 720-3250

Daphne Schauber – Floriculture, Grapes, Hops, Maple Syrup, Nursery, Tree Nuts (202) 720-4215

Chris Singh – Apples, Apricots, Plums, Prunes, Tobacco (202) 720-4288

Livestock Prices Received

Vacant, Chief, Livestock Branch (202) 720-3570

Scott Hollis, Head, Livestock Section..... (202) 720-3570

Dave Colwell – Sheep and Goats (202) 720-8784

Michael Klamm – Cattle and Cattle on Feed (202) 720-3040

Mike Miller – Milk, Milk Cows (202) 720-3278

Seth Riggins – Hogs and Pigs (202) 720-3106

Bruce Boess, Head, Poultry and Specialty Commodities Section..... (202) 720-3570

Aaron Cosgrove – Turkeys (202) 690-3237

Kim Linonis – Eggs..... (202) 690-8632

Josh O’Rear – Honey (202) 690-3676

Miste Salmon – Broilers..... (202) 720-3244

Indexes, Prices Paid, and Parity Prices

Jody McDaniel, Chief, Environmental, Economics and Demographics Branch..... (202) 720-6146

Tony Dorn, Head, Economics Section (202) 690-3223

Daryl Brinkman – Prices Received Indexes, Parity Prices..... (202) 720-8844

Liana Cuffman – Prices Received Indexes, Parity Prices, Prices Paid Indexes, Prices Paid for Feed,
Fertilizer, Chemicals, Seeds, Fuels, Farm Supplies and Repairs, Farm Machinery, Feeder Livestock,
Poultry Chicks, Feed Price Ratios..... (202) 690-3229

Joe Hagedorn – Cash Rents, Grazing Fees..... (202) 690-3231

Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site: www.nass.usda.gov
- Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit www.nass.usda.gov and click on “National” or “State” in upper right corner above “search” box to create an account and select the reports you would like to receive.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the basis of race, color, national origin, age, disability, sex, gender identity, religion, reprisal, and where applicable, political beliefs, marital status, familial or parental status, sexual orientation, or all or part of an individual's income is derived from any public assistance program, or protected genetic information in employment or in any program or activity conducted or funded by the Department. (Not all prohibited bases will apply to all programs and/or employment activities.)

If you wish to file a Civil Rights program complaint of discrimination, complete the [USDA Program Discrimination Complaint Form](#) (PDF), found online at http://www.ascr.usda.gov/complaint_filing_cust.html, or at any USDA office, or call (866) 632-9992 to request the form. You may also write a letter containing all of the information requested in the form. Send your completed complaint form or letter to us by mail at U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, by fax (202) 690-7442 or email at program.intake@usda.gov.
