2016 Farms and Land in Farms Highlights

The number of farms in the United States for 2016 is estimated at 2.06 million, down 8 thousand farms from 2015. Total land in farms, at 911 million acres, decreased 1 million acres from 2015. The average farm size for 2016 is 442 acres, up 1 acre from the previous year.

Farm numbers and land in farms are differentiated by six economic sales classes. Farms and ranches are classified into these six sales classes by summing the sales of agricultural products and government program payments. Sales class breaks occur at \$10,000, \$100,000, \$250,000, \$500,000, and \$1,000,000. Producers were asked during the 2016 mid-year surveys to report the value of sales based on production during the 2015 calendar year.

Point Farms are farms that did not have the required minimum \$1,000 in sales for the year to qualify as a farm, but had sufficient crops and livestock to normally have sales of \$1,000 or more. Point Farms are assigned a sales class based on the sum of the agricultural point (dollar) values assigned to the quantity of commodities produced but not sold. The 2012 Census of Agriculture showed that 428,810 farms or 20.3 percent of the 2.11 million farms were Point Farms. These Point Farms operated 63.0 million acres or 6.9 percent of the 914.5 million acres of farmland.

Number of farms declined by 8 thousand from 2015. The number of farms in Sales Class \$250,000 - \$499,999 increased while all other sales classes declined slightly. Fifty percent of all farms had less than \$10,000 in sales. Eighty percent of all farms had less than \$100,000 in sales. Eight percent of all farms had sales of \$500,000 or more.

Changes in the number of farms by sales class are:

- Sales Class \$1,000 - \$9,999 at 1.03 million farms, declined by 5 thousand farms.
- Sales Class \$10,000 - \$99,999 at 621 thousand farms, declined by 2 thousand farms.
- Sales Class \$100,000 - \$249,999 at 145 thousand farms, declined by 4 hundred farms.
- Sales Class \$250,000 - \$499,999 at 98 thousand farms, increased by 4 hundred farms.
- Sales Class \$500,000 - \$999,999 at 82 thousand farms, declined by 5 hundred farms.
- Sales Class \$1,000,000 or more at 82 thousand farms, declined by 2 hundred farms.

The percent of all farms by sales class are:

- Sales Class \$1,000 - \$9,999: 50.1%
- Sales Class \$10,000 - \$99,999: 30.1%
- Sales Class \$100,000 - \$249,999: 7.0%
- Sales Class \$250,000 - \$499,999: 4.8%
- Sales Class \$500,000 - \$999,999: 4.0%
- Sales Class \$1,000,000 or more: 4.0%

Land in farms, at 911 million acres, was down 1 million acres from 2015. The biggest changes for 2016 are that producers in Sales Class \$250,000-\$499,999 operated 1.29 million more acres and those in Sales Class \$1,000,000 or more operated 1.01 million fewer acres. Similar to the previous year, in 2016 nearly 31 percent of all farmland was operated by farms with less than \$100,000 in sales. Forty-one percent of all farmland was operated by farms with sales of \$500,000 or more.

Farmland changes by sales class are:

- Sales Class \$1,000 - \$9,999 at 86.9 million acres, declined by 850 thousand acres.
- Sales Class \$10,000 - \$99,999 at 192.0 million acres, increased by 410 thousand acres.
- Sales Class \$100,000 - \$249,999 at 129.9 million acres, declined by 940 thousand acres.
- Sales Class \$250,000 - \$499,999 at 127.1 million acres, increased by 1.29 million acres.
- Sales Class \$500,000 - \$999,999 at 156.5 million acres, increased by 100 thousand acres.
- Sales Class \$1,000,000 or more at 218.6 million acres, declined by 1.01 million acres.

Percent of all farmland by sales class are:

- Sales Class \$1,000 - \$9,999: 9.5%
- Sales Class \$10,000 - \$99,999: 21.1%
- Sales Class \$100,000 - \$249,999: 14.3%
- Sales Class \$250,000 - \$499,999: 14.0%
- Sales Class \$500,000 - \$999,999: 17.2%
- Sales Class \$1,000,000 or more: 24.0%

The **average farm size** continued to increase in 2016 as the number of farms declined more than land in farms. The overall average size increased by 1 acre to 442 acres per farm. Average farm sizes increased in the \$10,000 - \$99,999, \$250,000 - \$499,999, and \$500,000 - \$999,999 sales classes and decreased in the others.

Average farm size by sales class are:

- Sales Class \$1,000 - \$9,999: 84 acres
- Sales Class \$10,000 - \$99,999: 309 acres
- Sales Class \$100,000 - \$249,999: 896 acres
- Sales Class \$250,000 - \$499,999: 1,296 acres
- Sales Class \$500,000 - \$999,999: 1,897 acres
- Sales Class \$1,000,000 or more: 2,656 acres

Statistical Methodology

Survey Procedures: Data are collected by the National Agricultural Statistics Service (NASS) during the June Agricultural Survey using sampling procedures to ensure every farm and ranch has a chance of being selected. NASS uses a multiple sampling frame approach to count farms and measure land in farms. An Area Sampling Frame that divides all land into segments is built for every State except Alaska. A sample of segments is selected in each State except Alaska and Hawaii and enumerated in early June. Highly trained interviewers locate each sampled segment and identify every farm and ranch operating land in the segment and the number of acres in each operation.

These data are used to compute summaries of farm numbers and acres of land in farms. Additionally, all farms found in the segments are checked against a list of farms and ranches maintained by NASS to determine if the farm is on the list. Operations found in the Area Frame sample that are not on the list provide a measure of incompleteness of the list. The summarized totals for these non-overlap (or not-on-list) operations are combined with summarized totals collected from a sample selected from the list to calculate additional indications of farms and land in farms.

Estimation Procedures: Data are checked for reasonableness and consistency and summarized for each state. State estimates are aggregated to national totals for Headquarters review. Field Offices perform a thorough review of their survey results and historical data relationships and recommend official estimates. Headquarters establishes national estimates and ensures that state estimates are in balance with the national numbers.

Revision Policy: Estimates are subject to revision the following year and following review of the five-year Census of Agriculture. The basis for revision must be supported by additional data which directly affect the level of the estimate.

Reliability: Two types of errors, sampling and non-sampling, are possible in an estimate based on a sample survey. Both types can affect the quality of the estimates.

Sampling error occurs because a complete census is not taken. The sampling error measures the variation in estimates from the average of all possible samples. An estimate of 100 with a sampling error of 1 would mean that chances are 19 out of 20 that the estimates from all possible samples averaged together would be between 98 and 102; which is the survey estimate, plus or minus two times the sampling error. The sampling error expressed as a percent of the estimate is called the relative sampling error. In 2016, the relative sampling error for the United States number of farms is 1.6 percent and land in farms is 2.2 percent. The sampling error for total number of farms and total land in farms is less than the sampling error for each component of the total, such as number of farms by economic sales class. Relative sampling errors by economic sales class ranged from 2.3 to 6.4 percent for number of farms and 2.8 to 9.1 percent for land in farms at the United States level.

Non-sampling errors can occur in complete censuses as well as sample surveys. They are caused by the inability to obtain correct information from each person surveyed, differences in interpreting questions or definitions, and mistakes in coding or processing the data. Special efforts are taken at each step of the survey to minimize non-sampling errors.

Terms and Definitions

A **farm** is “any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the year.” Government payments are included in sales. Ranches, institutional farms, experimental and research farms, and Indian Reservations are included as farms. Places with the entire acreage enrolled in the Conservation Reserve Program (CRP), Wetlands Reserve Program (WRP), and other government conservation programs are counted as farms.

The definition of a farm was first established in 1850 and has changed nine times since. The current definition was first used for the 1974 Census.

Land in farms consists of agricultural land used for crops, pasture, or grazing. Also included is woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator’s total operation. Land in farms includes acres in CRP, WRP, and other government conservation programs.

Land in farms includes land owned and operated as well as land rented from others. Land used rent-free is included as land rented from others. All grazing land, except land used under government permits on a per-head basis, is included as land in farms provided it was part of a farm or ranch. Land under the exclusive use of a grazing association is reported by the grazing association and included as land in farms. All land in American Indian reservations used for growing crops or grazing livestock is included as land in farms. Land in reservations not reported by individual American Indians or non-Native Americans is reported in the name of the cooperative group that used the land. In many instances, the entire American Indian reservation is reported as one farm.

Economic sales classes are based on the gross value of agricultural products sold. Government program payments are also included.

Point Farms are places that did not have \$1,000 of reported sales for the year, but had sufficient crops and livestock to normally have sales of \$1,000 or more.

Farm Definition History

The definition of a farm has remained the same since 1974. Activities included as agriculture, however, have undergone modification in recent years. Beginning in 1995, operations having 5 or more horses or ponies and no other agricultural sales were counted as horse farms. An operation with 1 or more horses with agricultural sales of at least \$1,000, qualified as a farm. Two industries, maple syrup and short rotation woody crop farms, were added beginning in 1997 as a result of the new North American Industry Classification System (NAICS). These changes were made to achieve comparability with the Census of Agriculture farm definition. All the changes in the farm definition beginning in 1995 were carried back to 1993 and included in the 1993-1998 estimates. These changes bring comparability between the Census of Agriculture data and the annually published NASS estimates. Because of these changes in the farm definition, the official estimates show a level difference in the number of farms between 1992 and 1993 in some states. To further align the counting of farms with the Census of Agriculture, places with 100 acres or more of pasture only in 2002 were included in farm and land in farm numbers. The handling of Indian reservation land was changed in 2002 to provide some accounting for individual farms.

Minimum Criteria for “FARM” Definition, 1840 – Present and Enumeration of Apiaries and Fur Farms

Year	Acres in Place	Value of Agricultural Products (Produced)	Value of Sales of Agricultural Products	Required some Agricultural Operations	Apiaries and Fur Farms Enumerated
1974 - Present	--	--	\$1,000 or more	--	--
1959	Less than 10 10 or more	-- --	\$250 or more \$50 or more	-- --	-- --
1954	Less than 3 3 or more	-- \$150 or more	\$150 or more --	-- --	-- --
1950	Less than 3 3 or more	-- \$150 or more	\$150 or more --	-- --	Apiaries Fur Farms
1935 - 1945	Less than 3 3 or more	\$250 or more --	-- --	-- X	Apiaries Fur Farms
1930	Less than 3 3 or more	\$250 or more --	-- --	-- X	Apiaries --
1925	Less than 3 3 or more	\$250 or more --	-- --	-- X	-- --
1910 - 1925	Less than 3 3 or more	\$250 or more --	-- --	-- X	Apiaries --
1900	Less than 3 3 or more	-- --	-- --	-- X	Apiaries --
1870 - 1890	Less than 3 3 or more	-- --	\$500 or more --	-- X	Apiaries --
1860	--	--	--	--	--
1850	--	\$100 or more	--	--	Apiaries
1840	--	--	--	--	--

Historic Estimates: Final estimates of Farms and Land in Farms in earlier years are available in Statistical Bulletins, No.1030 for 2008-2012, No. 1018 for 2003-2007, No. 991 for 1998-2002, No. 955 for 1993-97, No. 895 for 1988-92, No. 792 for 1979-87, SpSy3 for 1975-80, No. 594 for 1969-75, No. 507 for 1959-70, No. 316 for number of farm estimates for 1910-59 and land in farms estimates for 1950-59.

Information Contacts

Listed below are the commodity statisticians in the Environmental, Economics and Demographics Branch of the National Agricultural Statistics Service to contact for additional information. Email inquiries may be sent to nass@nass.usda.gov.

Jody McDaniel, Chief, Environmental, Economics and Demographics Branch	(202) 720-6146
Tony Dorn, Head, Economics Section.....	(202) 690-3223
Rachel Antzak – Cash Receipts, Land Values	(202) 720-5446

Megan Lipke – Census of Agriculture	(202) 720-5581
Dominique Sims – Census of Agriculture.....	(202) 690-4752
Theresa Varner – Farm Labor, Chemical Use.....	(202) 690-2284

Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site: www.nass.usda.gov
- Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit www.nass.usda.gov and click on “National” or “State” in upper right corner above “search” box to create an account and select the reports you would like to receive.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the basis of race, color, national origin, age, disability, sex, gender identity, religion, reprisal, and where applicable, political beliefs, marital status, familial or parental status, sexual orientation, or all or part of an individual's income is derived from any public assistance program, or protected genetic information in employment or in any program or activity conducted or funded by the Department. (Not all prohibited bases will apply to all programs and/or employment activities.)

If you wish to file a Civil Rights program complaint of discrimination, complete the [USDA Program Discrimination Complaint Form](#) (PDF), found online at http://www.ascr.usda.gov/complaint_filing_cust.html, or at any USDA office, or call (866) 632-9992 to request the form. You may also write a letter containing all of the information requested in the form. Send your completed complaint form or letter to us by mail at U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, by fax (202) 690-7442 or email at program.intake@usda.gov.
