

Oilseeds: World Markets and Trade

Post-Harvest U.S. Soybean Prices Surge on Demand Pressure

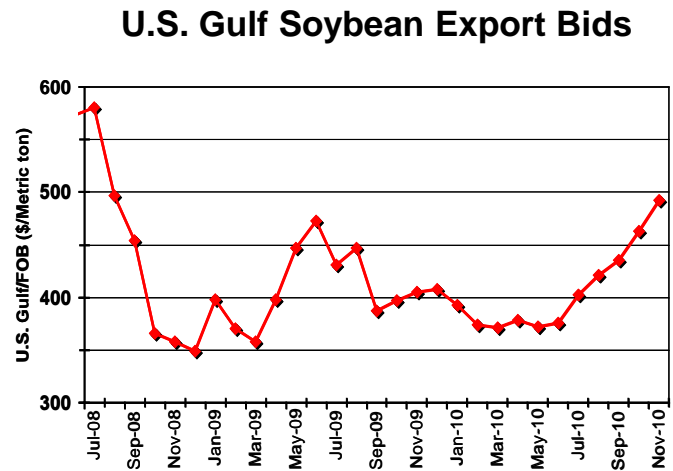

U.S. soybean prices often trend lower after harvest as new crop floods supply channels, although occasionally, post-harvest prices surge in response to supply-driven shortfalls. This year's crop is estimated to be a record, so the current price surge is unusual in that it is clearly demand-driven. China's import demand continues to expand and now accounts for 60 percent of global trade. U.S. export sales are unprecedented, and reduced supplies of feed grains in the world will mean more soybeans used in feed rations. Currently forecast smaller crops in South America and tighter supplies of corn have also contributed to greater demand for U.S. beans and to higher prices. Given strong global demand and lower forecast South American crops, U.S. prices are expected to remain elevated.

PRICES

U.S. soybean export bids, FOB Gulf, in November averaged \$493 per ton, the highest since August 2008. Strong demand for exports from China combined with concerns over South American crops supported prices higher.

As of the week-ending December 2, U.S. soybean sales commitments (outstanding sales plus accumulated exports) to China totaled 21.3 million tons, compared to 17.6 million a year ago. Total commitments to the world are a record 33.4 million tons compared to 28.6 million for the same period last year.

TRADE CHANGES IN 2010/11

- U.S. soybean exports are up 0.6 million tons to a record 43.3 million as strong sales continue led by China.
- Canada's soybean exports are up 0.3 million tons to 2.6 million on a larger crop.
- EU-27 soybean imports are up 0.5 million tons to 14.0 million to reflect stronger crush demand for meal and oil.
- Indonesia's soybean imports are up 0.2 million tons to 1.8 million to reflect strong U.S. export sales.
