November Farm Prices Received Index Advanced 4 Points

The preliminary All Farm Products Index of Prices Received by Farmers in November, at 159 percent, based on 1990-1992=100, increased 4 points (2.6 percent) from October. The Crop Index is up 9 points (5.4 percent) and the Livestock Index increased 1 point (0.7 percent). Producers received higher prices for soybeans, corn, lettuce, and eggs and lower prices for hogs, milk, apples, and cucumbers. In addition to prices, the overall index is also affected by the seasonal change based on a 3-year average mix of commodities producers sell. Increased monthly marketings of milk, cotton, cattle, and corn offset decreased marketings of soybeans, potatoes, peanuts, and lettuce.

The preliminary All Farm Products Index is up 23 points (17 percent) from November 2009. The Food Commodities Index, at 155, increased 3 points (2.0 percent) from last month and increased 19 points (14 percent) from November 2009.

Prices Paid Index Up 2 Points

The November Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW) is 188 percent of the 1990-1992 average. The index is up 2 points (1.1 percent) from October and 10 points (5.6 percent) above November 2009. Higher prices in November for complete feeds, nitrogen, and supplements more than offset lower prices for other services, feeder pigs, and hay & forages.

Agricultural Prices (November 2010)
USDA, National Agricultural Statistics Service
Prices Received by Farmers

The November All Farm Products Index is 159 percent of its 1990-1992 base, up 2.6 percent from the October index and 17 percent above the November 2009 index.

All crops: The November index is 177, up 5.4 percent from October and 15 percent above November 2009. Indexes increased for oilseeds, feed grains & hay, commercial vegetables, food grains, fruits & nuts, potatoes & dry beans, and cotton.

Food grains: The November index, at 201, is 5.8 percent above the previous month and 18 percent above a year ago. The November all wheat price, at $6.21 per bushel, is up 34 cents from October and $1.42 above November 2009.

Feed grains & hay: The November index is 195, up 5.4 percent from last month and 24 percent above a year ago. The corn price, at $4.59 per bushel, is up 27 cents from last month and 94 cents above November 2009. The all hay price, at $111 per ton, is down $2.00 from October but up $6.00 from last November. Sorghum grain, at $8.34 per cwt, is 54 cents above October and $2.67 above November last year.

Cotton: The November index, at 132, is up 2.3 percent from October and 35 percent above last year. The November price, at 80.1 cents per pound, is up 2.0 cents from the previous month and 20.6 cents above last November.

Oilseeds: The November index, at 193, is up 9.7 percent from October and 17 percent higher than November 2009. The soybean price, at $11.20 per bushel, increased $1.00 from October and is $1.67 above November 2009.

Fruits & nuts: The November index, at 170, is up 4.3 percent from October and 9.7 percent higher than a year ago. Price increases for oranges, grapefruit, strawberries, and grapes more than offset price decreases for apples, pears, and lemons.

Commercial vegetables: The November index, at 185, is up 23 percent from last month but 14 percent below November 2009. Price increases during November for lettuce, broccoli, onions, and cantaloups more than offset price declines for cucumbers, snap beans, sweet corn, and celery.

Potatoes & dry beans: The November index, at 131, is up 9.2 percent from last month and 0.8 percent above November 2009. The all potato price, at $7.65 per cwt, is up 88 cents from October and up 43 cents from last November. The all dry bean price, at $24.30 per cwt, is down $1.40 from the previous month and $5.80 below November 2009.

Livestock and products: The November index, at 135, is 0.7 percent above last month and up 17 percent from November 2009. Compared with a year ago, prices are higher for cattle, milk, broilers, turkeys, hogs, calves, and eggs.

Meat animals: The November index, at 123, is down 0.8 percent from last month but 18 percent higher than last year. The November hog price, at $47.20 per cwt, is down $6.10 from October but is $6.90 higher than a year ago. The November beef cattle price of $94.10 per cwt is up $1.00 from last month and is $14.50 higher than November 2009.

Dairy products: The November index, at 137, is down 3.5 percent from a month ago but 16 percent higher than November last year. The November all milk price of $17.90 per cwt is down 60 cents from last month but is $2.50 higher than November 2009. The fluid grade milk price is down 60 cents and the manufacturing grade milk price is $1.80 lower than the previous month.

Poultry & eggs: The November index, at 161, is up 7.3 percent from October and 18 percent above a year ago. The November market egg price, at $1.02 per dozen, increased 36.6 cents from October and is 13.6 cents above November 2009. The November broiler price, at 47.0 cents per pound, is unchanged from October but 6.0 cents above a year ago. The November turkey price, at 73.6 cents per pound, is up 0.2 cent from the previous month and up 19.5 cents from a year earlier.

Reliability of Prices Received Estimates

**Definition:** Prices received represent sales from producers to first buyers. They include all grades and qualities. The average commodity price from the survey multiplied by the total quantity marketed theoretically should give the total cash receipts for the commodity.

**Survey procedures:** Primary sales data used to determine grain prices were obtained from probability samples of about 2000 mills and elevators. These procedures ensure that virtually all grain moving into commercial channels has a chance of being included in the survey. Generally, States surveyed account for 90 percent or more of total United States production. Livestock prices are obtained from packers, stockyards, auctions, dealers, and market check data from AMS-USDA, private marketing organizations, and state commodity groups and agencies. Inter-farm sales of grain and livestock are not included since they represent very small percentages of the total marketings. Grain marketed for seed is also excluded. Fruit and vegetable prices are obtained from sample surveys and market check data from AMS-USDA, private marketing organizations, state agencies, and universities.

**Summary and estimation procedures:** Survey quantities sold are expanded by strata to state levels and used to weight average strata prices to a state average. State prices are then weighted to a United States price based on expanded marketings. Recommendations are prepared by the State Field Offices and reviewed by the Agricultural Statistics Board in Washington, D.C. State recommendations are reviewed for reasonableness with survey data, other States, and recent historic estimates.

**Revisions:** For most items, the current month's preliminary price represents a 3-5 day period around the 15th of the month. Previous month's prices represent actual dollars received for quantities sold during the entire month. Revisions are published in monthly issues of Agricultural Prices.

**Reliability:** United States price estimates based on probability surveys generally have a sampling error of less than one percent for the major commodities such as corn, wheat, soybeans, cotton, and rice. Current methods of summarization for non-probability commodities are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors at around five percent. Any nonsampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these nonsampling errors.
Prices Paid by Farmers

The November Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW) at 188 (1990-1992=100), is up 1.1 percent from October 2010 and 5.6 percent from November 2009.

Production index: The November index, at 193, increased 1.6 percent from last month and 6.6 percent from last year. Higher prices in November for complete feeds, nitrogen, and supplements more than offset lower prices for other services, feeder pigs, and hay & forages.

Feed: The November index, at 203, increased 4.6 percent from October and 11 percent from last November. Since October, higher prices for complete feeds, supplements, concentrates, and feed grains more than offset lower prices for hay & forages.

Livestock and poultry: The November index, at 133, increased 0.8 percent from last month and 18 percent from last year. Since October, higher prices for feeder cattle more than offset lower prices for feeder pigs. The November feeder cattle price, at $112.20 per cwt, is up $2.10 from the October price. November feeder pigs averaged $128.00 per cwt, down $8.00 from October.

Fertilizer: The November index, at 262, is up 4.4 percent from October and is 13 percent above November a year ago. Since October, prices are higher for nitrogen, potash & phosphate, and mixed fertilizer.

Chemicals: The November index, at 146, increased 0.7 percent from October but decreased 4.6 percent from last November. Compared with last month, prices are higher for herbicides, insecticides, and fungicides/other.

Fuels: The November index, at 297, is up 2.8 percent from a month earlier and is 13 percent above November 2009. Compared with last month, prices are higher for diesel, LP gas, and gasoline.

Machinery: The November index, at 229, is unchanged from October but is 1.3 percent above last November. Compared with last month, prices are higher for self-propelled machinery and other machinery.

Consumer price index: The October 2010 Consumer Price Index, as issued by the Bureau of Labor Statistics, for all urban consumers (CPI-U) increased 0.1 percent before seasonal adjustment to a level of 218.711 (1982-1984=100). The September index is 218.439. For the 12-month period ending in October, the overall index increased 1.2 percent.

¹ Effective January 1995, prices of commercial prepared feeds are based on current United States prices received for corn, soybeans, alfalfa hay, and all wheat.
² The price of commercial prepared broiler feed is based on current United States prices received for corn and soybeans. The modeled feed uses 58 percent corn and 42 percent soybeans.
³ The price of commercial prepared layer feed is based on current United States prices received for corn and soybeans. The modeled feed uses 75 percent corn and 25 percent soybeans.
⁴ The price of commercial prepared dairy feed is based on current United States prices received for corn, soybeans, and alfalfa hay. The modeled feed uses 51 percent corn, 41 percent alfalfa hay, and 8 percent soybeans.
⁵ The price of commercial prepared turkey feed is based on current United States prices received for corn, soybeans, and wheat. The modeled feed uses 51 percent corn, 28 percent soybeans, and 21 percent wheat.

Reliability of Prices Paid Estimates

**Definition:** Prices paid by farmers represent the average costs of inputs purchased by farmers and ranchers to produce agricultural commodities. Conceptually, the average price when multiplied by quantity purchased should equal total producer expenditures for the item.

**Survey procedures:** The prices paid data are obtained from establishments that sell goods and services to farmers and ranchers. Annually, about 8,500 firms are randomly selected from lists by type of item sold with an average response rate in the range of 75-80 percent. Firms are asked to report the price for the specified item "most commonly bought by farmers" or that was the "volume seller". Approximately 135 items are surveyed each March to represent all production input items purchased. The survey reference period for most items is the five business days centered around the 15th of the month. Separate prices paid surveys are conducted for agricultural chemicals, fuels, feed, fertilizer, machinery, and seed.

**Summary and estimation procedures:** The annual March Prices Paid Survey is summarized as a nonprobability survey. Average prices reported are aggregated to the region and United States level using weights available from expenditure data and other administrative sources. Price recommendations are prepared by the State Field Offices and Headquarters for review by the Agricultural Statistics Board in Washington, D.C. Also, the change in price level for individual items surveyed are combined to the regional and United States levels, and are published as prices paid indexes referenced to a specific base period. Prices paid indexes for new autos and trucks, building materials, farm supplies, motor supplies, and marketing containers are updated based on price changes measured in selected Bureau of Labor Statistics (BLS) indexes.

**Revisions:** Any revisions are published in the monthly and in annual issues of Agricultural Prices. The basis for revision must be supported by additional data that directly affect the level of the estimate. More revisions are likely for March when separate prices paid surveys are conducted, in lieu of BLS indexes, by the USDA to measure price change.

**Reliability:** Current methods of summarization for the March data are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors for major items around 10 percent. Any nonsampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these nonsampling errors.

**Program change:** Effective January 1, 1995, the National Agricultural Statistics Service updated the weights and changed the construction of its prices paid and received by farmers indexes. A Federal Register Notice dated October 28, 1994 discussed these program modifications.

A 1990-1992 reference and base period replaced the 1977 reference and 1971-1973 base weight period. Five-year moving average weights replaced the current fixed 1971-1973 base period weights. The 1910-1914=100 price indexes, required by statute for computing parity prices, were linked forward based on the changes in the new 1990-1992=100 indexes. The new indexes were constructed by multiplying the ratios of the current prices to the base period prices by the moving average weights (adjusted for seasonal marketing patterns for the prices received indexes).
Information Contacts

Direct general questions to Kevin Barnes, Chief, Environmental, Economics and Demographics Branch at (202) 720-6146. Below are the commodity specialists to contact for additional information.

Crop Prices Received
Lance Honig, Chief, Crops Branch ................................................................. (202) 720-2127

Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site: [http://www.nass.usda.gov](http://www.nass.usda.gov)

- Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit [http://www.nass.usda.gov](http://www.nass.usda.gov) and in the “Receive NASS Updates” box under “Receive reports by Email,” click on “National” or “State” to select the reports you would like to receive.

- Printed reports may be purchased from the National Technical Information Service (NTIS) by calling toll-free (800) 999-6779, or (703) 605-6220 if calling from outside the United States or Canada. Accepted methods of payment are Visa, MasterCard, check, or money order.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, political beliefs, genetic information, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write to USDA, Assistant Secretary for Civil Rights, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, S.W., Stop 9410, Washington, DC 20250-9410, or call toll-free at (866) 632-9992 (English) or (800) 877-8339 (TDD) or (866) 377-8642 (English Federal-relay) or (800) 845-6136 (Spanish Federal-relay). USDA is an equal opportunity provider and employer.
