PRICES RECEIVED INDEX DOWN 4 POINTS
PARITY INDEX UP 1 POINT
ADJUSTED PARITY RATIO DOWN 2 POINTS

During the month ended November 15, the Index of Prices Received by Farmers dropped 4 points (1 1/2 percent) to 270 percent of its 1910-14 average, according to the Crop Reporting Board. Contributing most to the decline were lower prices for hogs, beef cattle, and corn. Partially offsetting were higher prices for eggs, milk, and tomatoes. The index was 4 percent below November 1969.

The Index of Prices Paid by Farmers for Commodities and Services, Including Interest, Taxes, and Farm Wage Rates advanced to 395, a record high. The index was 1 point above mid-October and 17 points above a year earlier.

With the Parity Index rising slightly but the Prices Received Index declining during the month ended November 15, the Adjusted Parity Ratio was 73 and the Parity Ratio 68. Each declined 2 points from mid-October.

CROP REPORTING BOARD

Pr 1 (11-70)

WASHINGTON, D.C. 20250

PRICES RECEIVED BY FARMERS

The Prices Received Index declined 4 points ($1\frac{1}{2}$ percent) from mid-October to mid-November. Of the subgroups shown on page 7, the following 6 contributed most to the net change.

MEAT ANIMALS: Continued declines in hog and cattle prices were mainly responsible for the 7 percent decline in the November index of prices received by farmers for meat animals to 352 percent of the 1910-14 average. Prices for hogs continued their decline to average \$15.40 per cwt., off \$2.60 from mid-October. Beef cattle averaged \$25.20 per cwt., down \$1.30. Calves were off \$1.10 to average \$33.00 per cwt.; sheep were down only 2 cents to average \$7.16; and lambs were off 80 cents to average \$25.20. The meat animal index was 12 percent below a year earlier, and 20 percent below the record high of last March. Receipts at reporting stockyards during the 4 weeks ended November 14 showed increases from the preceding 4 weeks of 9 percent for hogs, and 6 percent for cattle.

POULTRY AND EGGS: A 10 percent increase in egg prices was mainly responsible for lifting the index 7 percent during the month to 145. Prices received for eggs averaged 36.4 cents per dozen, compared with 33.2 cents a month earlier and 49.2 cents in November 1969. The average October to November price change is an increase of 3 percent. Prices for broilers averaged slightly higher at 12.9 cents per pound, while other poultry items were unchanged. The index was 22 percent below November 1969.

DAIRY PRODUCTS: The index of prices received by farmers for dairy products advanced 2 percent during the month to 366. Fluid market milk sold to plants averaged \$6.44 per cwt., during November, 6 cents above the revised October price, and 17 cents above a year earlier. Manufacturing grade milk averaged \$4.94 per cwt., 5 cents above the revised October price, and 18 cents more than in November 1969. The November index was 3 percent above a year earlier.

COMMERCIAL VEGETABLES: The index of prices received by farmers for commercial vegetables, at 284 in mid-November was 9 percent above a month earlier. Contributing most to the advance were higher prices for tomatoes, lettuce, and green peppers. The average price received for tomatoes, at \$15.20 per cwt., was 80 percent above the first half of October, but 25 percent below November a year earlier. Partially offsetting were lower prices for cantaloups and cucumbers. The index was 22 percent below November 1969.

COTTON: Prices received by farmers for upland cotton declined .73 cents per pound (3 percent) from mid-October to average 22.09 cents per pound in mid-November. The average October to November change is a decrease of 5 percent. Harvesting progress was normal or ahead of normal except in Delta States where wet weather caused delays, some dropping of bolls, and lowering of quality. Mid-November upland cotton prices averaged 3 percent above a year earlier.

TOBACCO: The average price received for tobacco sold by farmers in November was 71.3 cents per pound, 1.5 cents above October. The index increased 3 percent to 605. Lower prices than a month earlier for flue-cured types were more than offset by sizable sales of the higher-priced burley type 31 during the last week of November. The index was $\frac{1}{2}$ of one percent above a year earlier.

PRICES PAID BY FARMERS

The index of prices paid by farmers was unchanged from a month earlier at 340 percent of its 1910-14 average. Compared to a year earlier, the index was up 13 points (4 percent).

PRODUCTION INDEX UNCHANGED

The November 15 index of prices paid by farmers for production goods was unchanged from a month earlier at 319. Lower feeder livestock prices offset higher prices for motor vehicles, farm supplies, and building and fencing materials. Compared with a year earlier, the mid-November production index showed a 4 percent advance.

MOTOR VEHICLES: The index of prices paid by farmers for motor vehicles (including tractors) in mid-November, at 586, was 3 percent higher than September 1970. The inclusion of 1971 model autos and trucks in the index for the first time accounted for most of the increase. Price advances were also recorded for used vehicles. The index was 6 percent above a year earlier.

FEEDER LIVESTOCK: The mid-November index of prices for feeder livestock, at 435, was 12 points (3 percent) below a month earlier. Lower feeder cattle and calf prices led the decline with feeder pigs, feeder lambs, and poultry also down. The index was 9 points (2 percent) below November 15, 1969.

FARM SUPPLIES: Prices paid by farmers for farm supplies averaged $\frac{1}{2}$ -percent above a month earlier. Hog feeding equipment and small tools accounted for most of the increase with other surveyed items also higher. Compared with mid-November last year, prices were 3 percent higher.

FARM FAMILY LIVING INDEX ADVANCES

The index of prices paid by farmers for family living items advanced to 371, up two points ($\frac{1}{2}$ percent) from October 15. Food price decreases were more than offset by price increases for other family living items. During the past year, the farm family living index increased 4 percent.

CLOTHING: Compared with a month earlier, mid-November clothing prices averaged $1\frac{1}{2}$ percent higher. Women's apparel was largely responsible for the increase with most other clothing items in the group also up. Mid-November prices were 7 percent above a year earlier.

FOOD PRICES: Prices paid by farmers for food items averaged 1 percent lower than at mid-October 1970. Meat and fruit prices were largely responsible for the decrease while higher vegetable prices were partially offsetting. This was the second consecutive month that overall food prices have declined. Compared with a year earlier, food prices were 3 percent higher.

BUILDING MATERIALS, HOUSE: Prices for building materials used in farm housing construction averaged $\frac{1}{2}$ percent above a month earlier. Higher prices for metal products, millwork, paint and household equipment were partially offset by lower prices for framing lumber, flooring, and masonry products. Prices averaged $1\frac{1}{2}$ percent above a year earlier.

1/ Parity prices are computed under the provisions of Title III, Subtitle A, Section 301 (a) of the Agricultural Adjustment Act of 1938 as amended by the Agricultural Acts of 1948, 1949, 1954, and 1956.

2/ Adjusted base price 1910-14 derived from 120-month, January 1960-December 1969 average (including an allowance where appropriate for unredeemed loans and other supplemental payments resulting from price support operations) by dividing by 257 percent (the 120-month average of the Index of Prices Received by Farmers adjusted to include an allowance for unredeemed loans and other supplemental payments) unless otherwise noted. 3/ Parity prices as computed currently using base prices in effect and indexes for months indicated. These parity prices are the legally applicable parity prices for the following calendar month. 4/ Adjusted base price 1910-14 derived from 10 season average prices 1960-69 (including an allowance, where appropriate, for unredeemed loans and other supplemental payments resulting from price support operations). 5/ Adjusted base price 1910-14 derived from 10 weighted calendar year prices 1960-69. 6/ Seasonally adjusted price as percentage of parity price. 7/ Revised. 8/ Adjusted base price derived from State annual average prices weighted by production. 9/ Average local market price, excluding incentive payments. 10/ Equivalent packinghouse-door returns for apples for Washington and Oregon, equivalent first delivery point returns for California, and price at point of first sale for other States. 11/ Equivalent returns for bulk fruit at first delivery point. 12/ Based on prices for fresh peaches in New York, Pennsylvania, Michigan, North Carolina, South Carolina, Georgia, Washington, and California and average price for all methods of sale for other States. 13/ Based on packinghouse-door returns for fresh pears for Washington and Oregon, equivalent first delivery point returns for fresh pears for California, average prices for fresh use for New York and Michigan, and average prices for all methods of sale for other States. 14/ Not available. 15/ Includes some processing.

See Supplement No. 1 July 1970 AGRICULTURAL PRICES for details on parity prices computations.

1/ Data for current month are preliminary. 2/ Pounds of concentrate ration equal in value to 1 pound milk sold to plants. 3/ Value per 100 pounds of concentrate ration fed to milk cows.

4/ Revised.

Parity price equivalent for manufacturing milk 1/, United States
November 1970 with comparisons

| | | : | November 1969 | : | October 1970 | : | November 1970 |
|-----------------------------|---------------|---|------------------|---|-----------------|---|------------------|
| Parity equivalent | Dol. per cwt. | : | 5.27 | | 5.60 | | 5.62 |
| Average price-f.o.b. plants | Dol. per cwt. | : | 4.76 | | 4.89 | | 2/4.94 |
| Average fat test of milk | Percent | : | 3.84 | | 3.80 | | 2/3.83 |

1/ Based on prices received by farmers for all manufacturing grade milk. Parity price equivalent relates to the national average price for all manufacturing grade milk of average milkfat content sold by farmers. The parity price equivalent during 1970 is 79.9 percent of the parity price of all milk sold to plants, which compares with 79.3 percent in 1969. For additional details see Supplement No. 1 to the January 1970 issue of AGRICULTURAL PRICES.

2/ Preliminary.

1/ Current coverage includes Chevrolet Chevelle Malibu, Ford Torino 500, and Plymouth Satellite, Custom.

2/ Current coverage includes Chevrolet Impala, Ford Galaxie 500, and Plymouth Fury III.

3/ Estimated prices based on current differentials applied to previously published prices of 8 cylinder price series.

4/ Current coverage includes Pontiac Catalina, and Buick LeSabre.

5/ Coverage includes Ford and Chevrolet.

6/ Coverage includes Ford, Chevrolet, International, and Dodge.

Farms Continue to Use More Electricity

The use of electricity on farms in the United States (excluding Alaska and Hawaii) continued to increase, averaging 918 kilowatt hours per farm during the summer of 1970 according to an annual survey conducted by the Crop Reporting Board. This is a 38 KWH increase over a year earlier and a 301 KWH increase since 1960.

The average monthly farm electric bill for the U. S. was \$19.50, up \$1.10 from a year earlier. The cost per KWH paid by farmers averaged 2.12 cents, compared with 2.09 cents a year earlier. The higher cost per KWH this year reverses the downward trend of the past 5 years.

Page 19

Cottonseed meal 41% protein for Iowa should be changed from \$4.80 to \$5.80.

Page 22 - Poultry Feed:

The headings for turkey grower and broiler grower columns are reversed.

The third column with U. S. price of \$99 per ton is broiler grower.

The fourth column with U. S. price of \$96 per ton is turkey grower.
