MONTHLY PRICES RECEIVED BY FARMERS, 1973-74 CROP AND SEASON AVERAGE PRICES, 1973-74 AND 1974-75 CROPS, BY UTILIZATION GROUPS AND BY STATES

This publication presents revised monthly average prices and equivalent per unit returns for citrus fruits, together with season average prices for the crop year 1973-74. This publication, together with supplements to the October issues of AGRICULTURAL PRICES, 1953 through 1964 and September 1965 through 1974 and Statistical Bulletin No. 322 published September 1962, brings to date the citrus price bulletin published as a supplement to the November 1952 AGRICULTURAL PRICES.

The revised monthly prices in the orange and grapefruit tables refer to all fruit sold in a given month regardless of the crop year in which the fruit was harvested. For example, the all-orange price for California for November 1973 includes sales from the 1973-74 Navel and Miscellaneous crop and tag-end sales from the 1972-73 Valencia crop.

Season average prices and equivalent returns refer to the prices received by growers for the entire marketing season for any one crop year. For example, the crop year 1973-74 as shown on all citrus tables in this publication refers to the crop which bloomed in 1972 and was marketed in the 1973-74 season. Hence, the 1973-74 season average price received by California growers for all oranges refers to the price received for Navels and Miscellaneous oranges marketed from October 1973 through June 1974 and for Valencia oranges marketed from January 1974 through November 1974.

Approximate net contents per box are as follows: Oranges - California and Arizona, 75 lbs.; Florida, 90 lbs. and Texas 85, lbs.; Tangerines - Florida, 95 lbs.; California and Arizona, 75 lbs.; Grapefruit - California Desert Valleys and Arizona, 64 lbs.; other California areas, 67 lbs.; Florida, 85 lbs.; Texas, 80 lbs.; Lemons - 76 lbs.; Limes - 80 lbs.; Tangelos - 90 lbs.; Temples - 90 lbs.
