

Agricultural Prices

Released September 27, 2001, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on "Agricultural Prices" or other assistance, see page B-11.

Prices Received Index Down 3 Points

The Preliminary All Farm Products Index of Prices Received in September was 106 based on 1990-92=100, down 3 points (2.8 percent) from the August Index. Higher prices for lettuce, milk, broilers, and wheat were partially offset by lower prices for hogs, soybeans, strawberries, and cattle. The seasonal change in the mix of commodities farmers sell often affects the overall index. Lower seasonal marketings of cattle, broilers, wheat, and milk were partially offset by higher marketings of soybeans, peanuts, corn, and potatoes.

Compared with September 2000, the All Farm Products Index was 9 points (9.3 percent) higher. Price increases from September 2000 for milk, corn, broilers, and cattle were partially offset by lower prices for cotton, apples, tomatoes, and turkeys.

Prices Paid Index Up 1 Point

The September Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW) was 124 percent of the 1990-92 average. The index rose one point (0.8 percent) from August and was 4 points (3.3 percent) above September 2000. Higher prices in September for complete feeds, diesel fuel, gasoline, and LP gas more than offset lower prices paid for nitrogen fertilizers, mixed fertilizers, feeder cattle and calves, and potash and phosphorus fertilizers.

Index Summary Table

Index 1990-92=100	2000		2001	
	Aug	Sep	Aug	Sep
Prices Received	96	97	109	106
Prices Paid	119	120	123	124
Ratio 1/	81	81	89	85

1/ Ratio of index of prices received by farmers to index of prices paid.

Prices Received by Farmers

The September All Farm Products Index was 106 percent of its 1990-92 base, down 2.8 percent from the August index but 9.3 percent above the September 2000 index.

All Crops: The September index was 103, down 3.7 percent from August but up 6.2 percent from September 2000. From August, price decreases for fruits and nuts, potatoes and dry beans, feed grains and hay, oil-bearing crops and cotton were partially offset by price increases for vegetables, tobacco, and food grains.

Food Grains: The September index, at 91, was up 1.1 percent from the previous month and 11 percent above September 2000. The September all wheat price, at \$2.80 per bushel, was up 7 cents from August and 37 cents above September 2000.

Feed Grains & Hay: The September index was 93, down 3.1 percent from last month but 19 percent above September 2000. The corn price, at \$1.92 per bushel, was up 2 cents from August and 31 cents above the September 2000 price. From August, decreases in the all barley and sorghum prices more than offset increases in corn, oats, and hay. The September corn production forecast was down slightly from August and down 7 percent from 2000.

Oil-Bearing Crops: The September index, at 84, was down 3.4 percent from August but unchanged from September 2000. The soybean price, at \$4.59 per bushel, decreased 24 cents from August but was 2 cents above September 2000.

Cotton: The September index, at 57, was down 3.4 percent from a month ago and 31 percent below September 2000. The cotton price, at 34.3 cents per pound, was down 1.7 cents from August and 16.3 cents below a year ago. The potential for record high U.S. and World production, coupled with world economic uncertainty, continues to drive cotton prices down.

Potatoes and Dry Beans: The September index, at 110, was 3.5 percent below last month but 41 percent above September 2000. The all potato price, at \$6.72 per cwt, was down 12 cents from the previous month, but \$2.07 above last September. Potato prices for September were above a year ago because of prospects for lower production and a late harvest start. The dry edible bean price at \$18.00 per cwt, was 50 cents above last month and \$2.40 above a year ago.

Fruit and Nuts: The September fruit and nuts index, at 121, was down 4.0 percent from the previous month but up 5.2 percent from 2000. Price decreases in strawberries, pears, and lemons more than offset price increases for peaches, grapes, and apples. Increased supplies of strawberries, pears, and lemons have caused prices to drop.

Commercial Vegetables: The September index, at 146, was up 2.8 percent from last month and 2.1 percent above September 2000. Price increases during September for lettuce, asparagus, and cucumbers more than offset price decreases for tomatoes, carrots, cantaloupes, and onions. Adverse weather conditions in California have caused lower supplies of lettuce resulting in higher prices.

Livestock and Products: The September index, at 111, was unchanged from last month but up 13 percent from September 2000. Compared with a year ago, prices were higher for all milk, broilers, cattle, hogs, and calves but lower for eggs and turkeys.

Meat Animals: The September index, at 97, was down 3.0 percent from last month but up 7.8 percent from a year ago. The September hog price was \$45.80 per cwt, down \$4.80 from August but up \$4.20 from a year ago. Market hog supplies increased seasonally during September. The September beef cattle price of \$70.00 was down 70 cents from last month but up \$4.70 from September 2000. August cattle on feed numbers were up 5 percent from last year.

Dairy Products: The September index, at 129, was up 2.4 percent from August and 30 percent above September 2000. The September all milk price, at \$16.80 per cwt, was up 40 cents from August and \$3.90 above last year. September prices increased for both fluid and manufacturing grade milk. Cheese prices increased the first three weeks of September.

Poultry and Eggs: The September 2001 index, at 122, was up 1.7 percent from August and 7 percent above a year ago. The September broiler price, at 43.0 cents per pound, was up 1 cent from August. Broiler markets were steady as production moderated and export demand continued extremely strong. September market egg prices, at 37.6 cents per dozen, were down 0.8 cents from August. August egg production was up 2 percent. September turkey prices increased 1.6 cents to 40.4 cents per pound but were 4.4 cents below a year earlier. August stocks of frozen whole turkeys were 9 percent above year ago. Placements for the marketing year were up 1 percent.

- 1/ Parity prices are computed under the provisions of Title III, Subtitle a, Section 301 (a) of the Agricultural Adjustment Act of 1938 as amended by the Agricultural Acts of 1948, 1949, and 1956. See January "Agricultural Prices" for details on adjusted base price and parity price computations.
- 2/ Seasonally adjusted price as percentage of parity price.
- 3/ Wholesale extracted. Adjusted base price derived from state annual average prices weighted by production. For 1982 through 1985 the national averages are the support prices.
- 4/ Equivalent packinghouse-door returns for CA, NY (apples only), OR (except peaches), and WA. Price at point of first sale for other states.
- 5/ Equivalent returns for bulk fruit at first delivery point.
- 6/ Equivalent returns at processing plant door.
- 7/ Equivalent returns at packinghouse door.
- 8/ Includes some processing.
- 9/ Based on "as sold" prices for fresh fruit in all states.
- 10/ Prices in-shell basis except almonds which are shelled basis.
- 11/ F.O.B. shipping point prices.

1/ State Marketing Year Average Prices are computed by weighting state monthly prices by estimated sales for the month during the crop year. U.S. Marketing Year Average Price is computed by weighting state Marketing Year Average Prices by estimated sales for the crop year. Monthly prices refer to all potatoes sold in a given month regardless of the year harvested.

2/ Estimates discontinued in 2000.

3/ Estimates began in 2000.

Citrus Prices

Revised State and U.S. monthly average prices and equivalent returns, and marketing year average prices for the 1998-1999, 1999-2000 and 2000-2001 citrus crops are shown on pages 27 through 52 of this publication. These data, together with the September Agricultural Prices 1966-2000 issues, supplement to the September 1965 issue, supplements to the October 1953-1964 issues and Statistical Bulletin No. 322 published in September 1962, bring to date the citrus price bulletin published as a supplement to the November 1952 issue of Agricultural Prices.

Revised monthly prices refer to all fruit sold in a given month regardless of the crop year in which the fruit was harvested.

Marketing year average prices refer to the prices received by growers for the entire marketing season for any one crop year. The crop year 2000-01 as shown on all citrus tables in this publication refers to the crop which bloomed in 2000 and was marketed during the 2000-01 season. For example, the 2000-01 marketing year average price received by California growers for tangerines refers to marketings from October 2000 through April 2001. In some years the season may vary a month or two, but a price was estimated only for those months with sufficient movement.

Monthly and marketing year average prices are weighted by box size at the U.S. level for grapefruit, oranges, and tangerines. Approximate net contents per box are as follows: Grapefruit: Arizona and California - 67 lbs., Florida - 85 lbs., and Texas - 80 lbs; Lemons - 76 lbs; Limes - 88 lbs.; Oranges: Arizona and California - 75 lbs., Florida - 90 lbs., and Texas - 85 lbs.; Tangelos - 90 lbs.; Tangerines: Arizona and California - 75 lbs. and Florida - 95 lbs.; Temples - 90 lbs.

Citrus prices are based on weighted average f.o.b. packed prices received for fresh fruit and weighted average prices received at the processing plant door for processing fruit. Equivalent returns for fresh and processed fruit are calculated at the packinghouse-door level and on-tree level by deducting hauling, picking, sorting, grading, packing, cooling, marketing, and other costs from the two base prices. In some cases, this results in negative returns.

1/ Percentages used to calculate marketing year average prices.

Reliability of Prices Received Estimates

Definition: Prices received represent sales from producers to first buyers. They include all grades and qualities. The average commodity price from the survey multiplied by the total quantity marketed theoretically should give the total cash receipts for the commodity.

Survey Procedures: Primary sales data used to determine grain prices were obtained from probability samples of 2600 mills and elevators. These procedures ensure that virtually all grain moving into commercial channels has a chance of being included in the survey. Generally, States surveyed account for 90 percent or more of total U.S. production. Livestock prices are obtained from packers, stockyards, auctions, dealers, and market check data from AMS-USDA, private marketing organizations, and state commodity groups and agencies. Inter-farm sales of grain and livestock are not included since they represent very small percentages of the total marketings. Grain marketed for seed is also excluded. Fruit and vegetable prices are obtained from sample surveys and market check data from AMS-USDA, private marketing organizations, state agencies, and universities.

Summary and Estimation Procedures: Survey quantities sold are expanded by strata to state levels and used to weight average strata prices to a state average. State prices are then weighted to a U.S. price based on expanded marketings. Recommendations are prepared by the State Statistical Offices and reviewed by the Agricultural Statistics Board in Washington, D.C. State recommendations are reviewed for reasonableness with survey data, other States, and recent historic estimates.

Revisions: For most items, the current month's price represents a 3-5 day period around the mid-month. Previous month's prices represent actual dollars received for quantities sold during the entire month. Revisions are published in monthly issues of "**Agricultural Prices**".

Reliability: U.S. price estimates based on probability surveys generally have a sampling error of less than one percent for the major commodities such as corn, wheat, soybeans, cotton, and rice. Current methods of summarization for non-probability commodities are not designed directly to calculate sampling errors. However, analytical measures approximate the U.S. relative sampling errors at around five percent. Any nonsampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these nonsampling errors.

Prices Paid by Farmers

The September Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW) was 124 (1990-92=100), up 0.8 percent from August and 3.3 percent above September 2000.

Production Index: The September farm production, goods, and services index, at 120, was unchanged from last month but 3.4 percent above last year. Lower prices in September for nitrogen fertilizers, mixed fertilizers, feeder cattle and calves, and potash and phosphorus fertilizers offset higher prices paid for complete feeds, diesel fuel, gasoline, and LP gas.

Feed: The Feed Index, at 113, was 1.8 percent more than August and 14 percent greater than last September. Higher prices for complete feeds, feed supplements, and feed grains subcomponents of the Feed Index account for the increase. Hay and forages and feed concentrate subcomponents were unchanged.

Livestock and Poultry: The index for livestock and poultry purchases, at 112, was 0.9 percent less than August but 6.7 percent above last year. Lower prices for feeder cattle and calves and feeder pigs since August account for the index decline. The September feeder cattle price, at \$92.80 per cwt, was down \$0.60 per cwt from the August price.

Fertilizer: The Fertilizer Index, at 112, was down 3.4 percent from August and was 0.9 percent less than a year ago. Lower nitrogen material prices had the most impact on the index decline as other fertilizer subcomponents also lower.

Agricultural Chemicals: The chemical index, at 118, was unchanged from last month and 1.7 percent below last September. Slightly lower prices in September for insecticides had no effect on the index.

Fuels: The Fuels Index, at 126, was up 7.7 percent from a month earlier but 17 percent less than September 2000. Compared to last month, prices were higher for diesel fuel, gasoline, and LP gas.

Farm Machinery: The September Farm Machinery Index was 143, unchanged from August but 1.4 percent above last September. Since August, prices for the other machinery component of the machinery index was fractionally higher.

Consumer Price Index: The August 2001 Consumer Price Index for All Urban Consumers (CPI-U) was unchanged, before seasonal adjustment, remaining at the July index level of 177.5 (1982-84=100). For the 12-month period ended in August, the overall index has increased 2.7 percent.

Prices Paid by Farmers

Definition: Prices paid by farmers represent the average costs of inputs purchased by farmers and ranchers to produce agricultural commodities. Conceptually, the average price when multiplied by quantity purchased should equal total producer expenditures for the item.

Survey Procedures: The prices paid data are obtained from establishments that sell goods and services to farmers and ranchers. Annually, about 8,500 firms are randomly selected from lists by type of item sold with an average response rate in the range of 75-80 percent. Firms are asked to report the price for the specified item "most commonly bought by farmers" or that was the "volume seller". Approximately 135 items are surveyed each April to represent all production input items purchased. The survey reference period for most items is the 5 business days centered around the 15th of the month. Separate prices paid surveys are conducted for agricultural chemicals, fuels, feed, fertilizer, machinery, and seed.

Summary and Estimation Procedures: The annual April Paid Survey is summarized as a nonprobability survey. Average prices reported are aggregated to the region and U.S. level using weights available from expenditure data and other administrative sources. Price recommendations are prepared by the State Statistical Offices and Headquarters for review by the Agricultural Statistics Board in Washington, D.C. Also, the change in price level for individual items surveyed are combined to the regional and U.S. levels, and are published as prices paid indexes referenced to a specific base period. Prices paid indexes for new autos and trucks, building materials, farm supplies, motor supplies, and marketing containers are updated based on price changes measured in selected Bureau of Labor Statistics (BLS) indexes.

Revisions: Any revisions are published in the monthly and in annual issues of "Agricultural Prices". The basis for revision must be supported by additional data that directly affect the level of the estimate. More revisions are likely in April when separate prices paid surveys are conducted, in lieu of BLS indexes, by the USDA to measure price change.

Reliability: Current methods of summarization in April are not designed directly to calculate sampling errors. However, analytical measures approximate the U.S. relative sampling errors for major items around 10 percent. Any nonsampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these nonsampling errors.

Program Change: Effective January 1, 1995, the National Agricultural Statistics Service updated the weights and changed the construction of its prices paid and received by farmers indexes. A Federal Register Notice dated October 28, 1994 discussed these program modifications.

A 1990-92 reference and base period replaced the 1977 reference and 1971-73 base weight period. Five-year moving average weights replaced the current fixed 1971-73 base period weights. The 1910-14=100 price indexes, required by statute for computing parity prices, were linked forward based on the changes in the new 1990-92=100 indexes. The new indexes were constructed by multiplying the ratios of the current prices to the base period prices by the moving average weights (adjusted for seasonal marketing patterns for the prices received indexes).

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C., 20250-9410, or call 202-720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

ACCESS TO REPORTS!!

For your convenience, there are several ways to obtain NASS reports, data products, and services:

INTERNET ACCESS

All NASS reports are available free of charge on the worldwide Internet. For access, connect to the Internet and go to the NASS Home Page at: <http://www.usda.gov/nass/>. Select "Today's Reports" or Publications and then Reports by Calendar or Publications and then Search, by Title or Subject.

E-MAIL SUBSCRIPTION

There are two options for subscribing via e-mail. All NASS reports are available by subscription free of charge direct to your e-mail address. 1) Starting with the NASS Home Page at <http://www.usda.gov/nass/>, click on **Publications**, then click on the **Subscribe by E-mail** button which takes you to the page describing e-mail delivery of reports. Finally, click on **Go to the Subscription Page** and follow the instructions. 2) If you do NOT have Internet access, send an e-mail message to: usda-reports@usda.mannlib.cornell.edu. In the body of the message type the word: **list**.

AUTOFAX ACCESS

NASSFax service is available for some reports from your fax machine. Please call 202-720-2000, using the handset attached to your fax. Respond to the voice prompts. Document 0411 is a list of available reports.

PRINTED REPORTS OR DATA PRODUCTS

CALL OUR TOLL-FREE ORDER DESK: 800-999-6779 (U.S. and Canada)
Other areas, please call 703-605-6220 FAX: 703-605-6900
(Visa, MasterCard, check, or money order acceptable for payment.)

ASSISTANCE

For **assistance** with general agricultural statistics or further information about NASS or its products or services, contact the **Agricultural Statistics Hotline** at **800-727-9540**, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.

USDA to Hold Public Forum
October 15, 2001

Holiday Inn Mart Plaza
Chicago, Illinois

The National Agricultural Statistics Service will be organizing an open forum for Data Users. The purpose will be to provide updates on pending changes in the various statistical and information programs and to seek comments and input from data users. The other USDA agencies to be represented will include the Agricultural Marketing Service, the Economic Research Service, the Foreign Agricultural Service, and the World Agricultural Outlook Board. The Foreign Trade Division from the Census Bureau and the National Weather Service will also be included in the meeting.

For registration details for the Data User's meeting, see the NASS home page at <http://www.usda.gov/nass/> Or contact Karlyn McCutcheon (NASS) at (202) 690-8141 or at karlyn_mccutcheon@nass.usda.gov.

This Public Forum precedes an Industry Outlook meeting that will be held at the same location on October 16, 2001. The outlook meeting brings together analysts from the various commodity sectors to discuss the outlook situation. For more information about the outlook meeting and to register for it contact Terry Francl at (847) 685-8769 or at terry@fb.org.
