

Agricultural Prices

Released January 30, 2009, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on *Agricultural Prices* see page 88, office hours 7:30 a.m. to 4:00 p.m. ET.

January Farm Prices Received Index Advanced 2 Points From Last Month

The preliminary All Farm Products Index of Prices Received by Farmers in January, at 137 percent, based on 1990-92=100, increased 2 points (1.5 percent) from December. The Crop Index is up 8 points (5.4 percent) but the Livestock Index decreased 4 points (3.4 percent). Producers received higher prices for soybeans, lettuce, oranges, and broccoli and lower prices for milk, cotton, tomatoes, and onions. In addition to prices, the overall index is also affected by the seasonal change based on a 3-year average mix of commodities producers sell. Increased monthly marketings of corn, soybeans, cattle, and rice offset decreased marketings of cottonseed, grapes, broilers, and cotton.

The preliminary All Farm Products Index is down 7 points (4.9 percent) from January 2008. The Food Commodities Index, at 134, increased 1 point (0.8 percent) from last month but decreased 10 points (6.9 percent) from January 2008.

Prices Paid Index Unchanged

The January Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW) is 175 percent of the 1990-92 average. The index is unchanged from December but 6 points (3.6 percent) above January 2008. Higher prices in January for taxes, cash rent, feeder cattle, and interest offset lower prices for mixed fertilizer, potash & phosphate, complete feeds, and diesel.

Index Summary Table

Index 1990-92=100	2007	2008		2009
	Dec	Jan	Dec	Jan
Prices Received	135	144	135	137
Prices Paid	175	169	175	175
Ratio ¹	77	85	77	78

¹ Ratio of index of prices received by farmers to index of prices paid by farmers.

Prices Received by Farmers

The January All Farm Products Index is 137 percent of its 1990-92 base, up 1.5 percent from the December index but 4.9 percent below the January 2008 index.

ALL CROPS: The January index is 157, up 5.4 percent from December but 0.6 percent below January 2008. Index increases for commercial vegetable and oil-bearing crops more than offset the index decreases for cotton, potatoes & dry beans, fruits & nuts, and food grains.

Food Grains: The January index, at 209, is 0.5 percent below the previous month and down 16 percent from a year ago. The January all wheat price, at \$5.90 per bushel, is down 7 cents from December and \$2.06 below January 2008.

Feed Grains & Hay: The January index is 180, unchanged from last month but 4.0 percent above a year ago. The corn price, at \$4.15 per bushel, is up 5 cents from last month and 17 cents above January 2008. The all hay price, at \$136 per ton, is down \$5.00 from December but \$10.00 higher than last January. Sorghum grain, at \$5.29 per cwt, is 16 cents above December but \$2.11 below January last year.

Cotton: The January index, at 78, is down 9.3 percent from December and 23 percent below last year. The January price, at 47.4 cents per pound, is down 4.5 cents from the previous month and 14.1 cents from last January.

Oil-Bearing Crops: The January index, at 178, is up 3.5 percent from December but unchanged from January 2008. The soybean price, at \$9.92 per bushel, increased 68 cents from December but is 3 cents below January 2008.

Fruits & Nuts: The January index, at 121, is down 0.8 percent from December and 19 percent lower than a year ago. Price decreases for strawberries, apples, lemons, and pears more than offset the price increase for oranges.

Commercial Vegetables: The January index, at 172, is up 11 percent from last month and 25 percent above January 2008. Price increases during January for lettuce, broccoli, cauliflower, and sweet corn more than offset price declines for onions, tomatoes, snap beans, and cucumbers.

Potatoes & Dry Beans: The January index, at 164, is down 2.4 percent from last month but 27 percent above January 2008. The all potato price, at \$9.49 per cwt, is 13 cents below December but up \$2.16 from last January. The all dry bean price, at \$32.30 per cwt, is down \$2.20 from the previous month but \$4.90 above January 2008.

LIVESTOCK & PRODUCTS: The January index, at 115, is 3.4 percent below last month and down 11 percent from January 2008. Compared with a year ago, prices are lower for milk, cattle, eggs, calves, and turkeys. Prices for broilers and hogs are up from last year.

Meat Animals: The January index, at 105, is up 1.0 percent from last month but 5.4 percent lower than last year. The January hog price, at \$41.90 per cwt, is unchanged from December but \$4.70 higher than a year ago. The January beef cattle price of \$80.50 per cwt is up 70 cents from last month but \$6.80 lower than January 2008.

Dairy Products: The January index, at 106, is down 10.9 percent from a month ago and 33 percent lower than January last year. The January all milk price of \$13.80 per cwt declined \$1.80 from last month and \$6.70 from January 2008. The fluid grade milk price is down \$1.80 and the manufacturing grade milk price declined \$2.70 from the previous month.

Poultry & Eggs: The January index, at 149, is up 0.7 percent from December and a year ago. The January market egg price, at 89.6 cents per dozen, increased 3.6 cents from December but is 30.4 cents below January 2008. The January broiler price, at 48.0 cents per pound, is unchanged from December but 4.0 cents above a year ago. The January turkey price, at 43.7 cents per pound, declined 0.8 cent from the previous month and 1.1 cents from a year earlier.

Parity Prices

Parity prices based on data for January 2009 and adjusted base price data from which parity prices are computed, are presented in the table on pages 32 through 35. Annual average prices for 1998 through 2008 for use in parity computations, and ten-year averages for 1998-2007 and 1999-2008 are shown on pages 38 through 47.

Parity Prices shown on the following pages are computed under the provisions of Title III, Subtitle A, Section 301(a) of the Agricultural Adjustment Act of 1938 as amended by the Agricultural Acts of 1948, 1949, 1954, and 1956.

The major provisions of the amended Act relating to the calculation of parity prices are as follows:

"(1) (A) The 'parity price' for any agricultural commodity, as of any date, shall be determined by multiplying the adjusted base price of such commodity as of such date by the parity index as of such date.

"(B) The 'adjusted base price' of any agricultural commodity, as of any date, shall be (i) the average of the prices received by farmers for such commodity, at such time as the Secretary may select during each year of the ten-year period ending on the 31st of December last before such date, or during each marketing season beginning in such period if the Secretary determines use of a calendar year basis to be impracticable, divided by (ii) the ratio of the general level of prices received by farmers for agricultural commodities during the period January 1910 to December 1914, inclusive.

"(C) The 'parity index', as of any date, shall be the ratio of (i) the general level of prices for articles and services that farmers buy, wages paid hired farm labor, interest on farm indebtedness secured by farm real estate, and taxes on farm real estate, for the calendar month ending last before such date to (ii) the general level of such prices, wages, rates, and taxes during the period January 1910 to December 1914, inclusive.

"(D) The prices and indexes provided for herein, and the data used in computing them, shall be determined by the Secretary, whose determination shall be final."

Section 301(a) (1) (F) outlines authority for the Secretary of Agriculture to make special adjustments in the method of computing parity prices for particular commodities if the method outlined in the Act results in parity prices seriously out of line with those of other commodities.

The parity prices shown in this report are based on the provisions of the amended Act. Briefly, the actual method of computation is as follows:

- a. The average of prices received by farmers for individual commodities for the 10 preceding years is calculated (for 2009 this is the 1999-2008 average). An allowance for unredeemed loans and other supplemental payments resulting from price support programs, such as the deficiency payments for grains and cotton, is included for those commodities for which applicable.
- b. This 10-year average is divided by the average of the Index of Prices Received by Farmers for the same 10 preceding calendar years, adjusted to include an allowance for unredeemed loans and other supplemental price support operations, to give an "adjusted base price".
- c. Parity prices are computed by multiplying the "adjusted base prices" by the current Parity Index (the Index of Prices Paid by Farmers, including Interest, Taxes, and Wage Rates, 1910-14=100).

Parity prices are calculated in terms of prices received by farmers in the local markets in which they ordinarily sell. This means that the parity prices apply to the average of all classes and grades of the commodity as sold by all farmers in the United States, except as otherwise specified. Fruits and vegetables for fresh use and for processing are usually considered separate commodities and separate parity prices are calculated. The Agricultural Marketing Agreement Act of 1937 provided for parity prices for certain commodities covered by a marketing agreement or order program. Under present legislation, U.S. parity prices, with appropriate adjustments where needed, may be used for the purpose of this Act.

The indexes used in the computation of parity prices are published currently in "*Agricultural Prices*".

For the purpose of illustrating the computation of parity prices, the calculation of the parity price for corn based on data for January 2009 is given below.

The 120-month, January 1999-December 2008 average of prices received by farmers for corn was \$2.77 per bushel, adjusted to allow for unredeemed loans and other supplemental payments resulting from price support operations. The 120-month average of the Index of Prices Received by Farmers, adjusted to include an allowance for unredeemed loans, etc., was 775 (1910-14=100). Dividing \$2.77 by 7.75 gives \$0.357 per bushel, the adjusted base price which is multiplied by 2331 percent, the Parity Index (1910-14=100), based on data for January 2009. This gives \$8.32 per bushel, the parity price of corn during January 2009.

Average Base Period Prices Received by Farmers, US, 1910-14

The Parity Ratio

The parity ratio (the Index of Prices Received by Farmers for the products they sell divided by the Parity Index (1910-14=100)) provides an indication of the per unit purchasing power of farm commodities generally in terms of the goods and services currently bought by farmers, in relation to purchasing power of farm products in the 1910-14 base period. Thus, a Parity Ratio less than 100 indicates that the average per unit purchasing power of all farm products is lower than during the 1910-14 period.

The parity ratio is a measure of price relationships; not a measure of farm income, farmers' total purchasing power, or farmers' welfare. The latter depends upon a number of factors other than price relationships, such as changes in production efficiency and technology, quantities of farm products sold, and supplementary income, including that from off-farm jobs and federal programs.

An adjusted parity ratio is computed and published which incorporates supplementary income for federal farm programs. A "preliminary adjusted parity ratio reflecting government payments" based on the forecast of direct government payments for the year is published each quarter in "*Agricultural Prices*".

Adjusted Base Price and United States Parity Prices
Based on data for January 2009 (continued)

- 1/ Adjusted base price 1910-14 derived by dividing the average of 10 season average prices 1999-2008, including an allowance where appropriate for unredeemed loans and other supplemental payments resulting from price support operations, by 724 percent (120-month, Jan 1999-Dec 2008 average of the index of prices received by farmers adjusted to include an allowance for unredeemed loans and other supplemental payments) unless otherwise noted.
- 2/ These parity prices are the legally applicable parity prices for the following calendar month.
- 3/ Adjusted base price 1910-14 derived from 120-month, Jan 1999-Dec 2008 average including an allowance where appropriate for unredeemed loans and other supplemental payments resulting from price support operations.
- 4/ Equivalent packinghouse-door returns for CA, MI, NY (apples only), and WA (apples, peaches, and pears). Prices "as sold" for other states.
- 5/ Equivalent returns at packinghouse-door.
- 6/ Equivalent returns at processing plant door.
- 7/ Equivalent returns for bulk fruit at first delivery point.
- 8/ Based on 'as sold' prices for fresh fruit in all states.
- 9/ Average F.O.B. shipping point prices.
- 10/ Relates to prices including average conditional payments per ton made under the sugar acts of 1937 and 1948. Crop deficiency and abandonment payments not included.
- 11/ Prices on in-shell basis except almonds which are on shelled basis.
- 12/ Includes some processing.
- 13/ The 2008 marketing year average prices are not yet available for these commodities. Therefore, the adjusted base prices are brought forward from 2007, except citrus items (excluding limes) and cranberries.
- 14/ Monthly and/or season average prices are no longer estimated for these items. Therefore, the adjusted base price is brought forward from July 1986.
- 15/ Monthly and/or season average prices are no longer estimated for this item. The adjusted base price is brought forward from 1988.
- 16/ Processing prices combined with fresh beginning in 2002.

¹ Average used to compute "adjusted base prices". 2008 and 1999-2008 averages are preliminary. ² Includes an allowance for price support operations as authorized by the Secretary of Agriculture, January 30, 1956. This entry is omitted for commodities not affected by the adjustment. ³ Simple average of monthly prices. Due to rounding differences, the 10-year average of these data might differ slightly from the 120-month averages shown in the 1998-2007 and 1999-2008 columns. ⁴ Equivalent packinghouse-door returns for CA, NY (applies only starting in 1985), OR (except peaches), and WA. Prices "as sold" for other states. ⁵ Unless otherwise noted these prices are the averages for the marketing season computed by weighting state prices by quantities sold. ⁶ Not available. ⁷ Price for year harvested, from Tobacco Division, AMS. ⁸ Average local market price; does not include incentive payment per pound, the 1998-2007 and 1999-2008 averages for parity purposes include this allowance. ⁹ Consistent with legislation quoted in this report, citrus prices shown for 2007 relate to the citrus crop designated as 2007-2008 in the production reports. ¹⁰ Equivalent returns at processing plant door. ¹¹ Equivalent returns at packinghouse-door. ¹² Equivalent returns for bulk fruit at first delivery point. ¹³ Based on "as sold" prices for fresh fruit in all states. ¹⁴ Average F.O.B. shipping point prices. ¹⁵ Includes strawberries for processing in states where the processing crop is not estimated separately. ¹⁶ Prices include average conditional payments per ton made under the sugar acts of 1937 and 1948. Crop deficiency and abandonment payments not included. ¹⁷ Prices on in-shell basis except almonds which are on shelled basis. ¹⁸ Includes some processing. ¹⁹ Marketing year average prices not published to avoid disclosure of individual firms. ²⁰ Data not available for all years to calculate ten year average price.

¹ Average used to compute "adjusted base prices". 2008 and 1999-2008 averages are preliminary. ² Includes an allowance for price support operations as authorized by the Secretary of Agriculture, January 30, 1956. This entry is omitted for commodities not affected by the adjustment. ³ Simple average of monthly prices. Due to rounding differences, the 10-year average of these data might differ slightly from the 120-month averages shown in the 1998-2007 and 1999-2008 columns. ⁴ Equivalent packinghouse-door returns for CA, NY (applies only starting in 1985), OR (except peaches), and WA. Prices "as sold" for other states. ⁵ Unless otherwise noted these prices are the averages for the marketing season computed by weighting state prices by quantities sold. ⁶ Not available. ⁷ Price for year harvested, from Tobacco Division, AMS. ⁸ For 1984 through 1986 the national averages are the support prices. ⁹ Average local market price; does not include incentive payment per pound, the 1998-2007 and 1999-2008 averages for parity purposes include this allowance. ¹⁰ Consistent with legislation quoted in this report, citrus prices shown for 2007 relate to the citrus crop designated as 2007-2008 in the production reports. ¹¹ Equivalent returns at processing plant door. ¹² Equivalent returns at packinghouse-door. Includes some processing beginning in 2002. ¹³ Equivalent returns for bulk fruit at first delivery point. ¹⁴ Based on "as sold" prices for fresh fruit in all states. ¹⁵ Average F.O.B. shipping point prices. ¹⁶ Includes strawberries for processing in states where the processing crop is not estimated separately. ¹⁷ Prices include average conditional payments per ton made under the sugar acts of 1937 and 1948. Crop deficiency and abandonment payments not included. ¹⁸ Prices on in-shell basis except almonds which are on shelled basis. ¹⁹ Includes some processing. ²⁰ Marketing year average prices not published to avoid disclosure of individual firms. ²¹ Included in oranges beginning in 2007. ²² Discontinued in 2009. Included with fresh beginning in 2002.

Parity Price Equivalent for Manufacturing Grade Milk

By direction of the Secretary of Agriculture, the parity price equivalent for manufacturing grade milk is determined as follows: (1) Based on data for the 10 calendar years immediately preceding, compute the ratio of (a) the average price received by farmers, f.o.b. plant, for all manufacturing grade milk to (b) the average price by farmers, f.o.b. plant, for all milk sold to plants and dealers. (2) The parity price for all milk sold to plants is multiplied by the resulting ratio of (a) to (b) to determine the parity price equivalent for manufacturing milk. The parity price equivalent for manufacturing milk is not in itself a parity price but rather is an administrative determination based on the above price relationship.

The ratio is computed in January of each year and is used throughout the calendar year. The ratio to be used during 2009 is 93.2, up 0.8 points from 2008. The parity price for all milk sold to plants is \$44.50 per cwt. This price multiplied by 93.2 percent, results in \$41.50 per cwt as the parity price equivalent for manufacturing milk of average milkfat content. In 2008, the simple average of monthly fat tests for manufacturing grade milk was 4.02 percent. The fat test ranged from a low of 3.83 in August to a high of 4.19 percent in December.

¹ Before hauling costs are deducted and including premiums paid to farmers.

Reliability of Prices Received Estimates

Definition: Prices received represent sales from producers to first buyers. They include all grades and qualities. The average commodity price from the survey multiplied by the total quantity marketed theoretically should give the total cash receipts for the commodity.

Survey Procedures: Primary sales data used to determine grain prices were obtained from probability samples of about 2000 mills and elevators. These procedures ensure that virtually all grain moving into commercial channels has a chance of being included in the survey. Generally, States surveyed account for 90 percent or more of total U.S. production. Livestock prices are obtained from packers, stockyards, auctions, dealers, and market check data from AMS-USDA, private marketing organizations, and state commodity groups and agencies. Inter-farm sales of grain and livestock are not included since they represent very small percentages of the total marketings. Grain marketed for seed is also excluded. Fruit and vegetable prices are obtained from sample surveys and market check data from AMS-USDA, private marketing organizations, state agencies, and universities.

Summary and Estimation Procedures: Survey quantities sold are expanded by strata to state levels and used to weight average strata prices to a state average. State prices are then weighted to a U.S. price based on expanded marketings. Recommendations are prepared by the State Field Offices and reviewed by the Agricultural Statistics Board in Washington, D.C. State recommendations are reviewed for reasonableness with survey data, other States, and recent historic estimates.

Revisions: For most items, the current month's preliminary price represents a 3-5 day period around the 15th of the month. Previous month's prices represent actual dollars received for quantities sold during the entire month. Revisions are published in monthly issues of Agricultural Prices.

Reliability: U.S. price estimates based on probability surveys generally have a sampling error of less than one percent for the major commodities such as corn, wheat, soybeans, cotton, and rice. Current methods of summarization for non-probability commodities are not designed directly to calculate sampling errors. However, analytical measures approximate the U.S. relative sampling errors at around five percent. Any nonsampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these nonsampling errors.

Prices Paid by Farmers

The January Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW) at 175 (1990-92=100), is unchanged from December 2008 but is up 3.6 percent from January 2008.

PRODUCTION INDEX: The January index, at 178, decreased 0.6 percent from last month but increased 4.7 percent from last year. Prices in January are lower for mixed fertilizer, potash & phosphate, complete feeds, and diesel.

Feed: The January index, at 164, decreased 3.0 percent from December and 2.4 percent from last January. Since December, lower prices for complete feeds, hay & forages, concentrates, and supplements offset slightly higher prices for feed grains.

Livestock & Poultry: The January index, at 120, increased 4.3 percent from last month but decreased 2.4 percent from last year. Since December, higher prices for feeder cattle and feeder pigs more than offset lower prices for milk cows. The January feeder cattle price, at \$95.10 per cwt, is up \$6.60 per cwt from the December price. January feeder pigs averaged \$148.00 per cwt, up \$15.00 per cwt from December.

Fertilizer: The January index, at 358, is down 8.4 percent from December but is 30 percent above January a year ago. Since December, lower prices for mixed fertilizer and potash & phosphate more than offset higher prices for nitrogen fertilizer.

Chemicals: The January index, at 151, increased 1.3 percent from December and 14 percent from last January.

Fuels: The January index, at 202, is down 2.9 percent from a month earlier and 34 percent below January 2008. Since December, lower prices for diesel fuel more than offset higher prices for LP gas and gasoline.

Machinery: The January index, at 212, is unchanged from December but is 7.1 percent above last January.

CONSUMER PRICE INDEX: The December 2008 Consumer Price Index, as issued by the Bureau of Labor Statistics, for all urban consumers (CPI-U) decreased 1.0 percent before seasonal adjustment to a level of 210.228 (1982-84=100). This compares with the November index of 212.425. For the 12-month period ending in December, the overall index increased 0.1 percent.

¹ Effective January 1995, prices of commercial prepared feeds are based on current U.S. prices received for corn, soybeans, alfalfa hay, and all wheat.

² The price of commercial prepared broiler feed is based on current U.S. prices received for corn and soybeans. The modeled feed uses 58 percent corn and 42 percent soybeans.

³ The price of commercial prepared layer feed is based on current U.S. prices received for corn and soybeans. The modeled feed uses 75 percent corn and 25 percent soybeans.

⁴ The price of commercial prepared dairy feed is based on current U.S. prices received for corn, soybeans, and alfalfa. The modeled feed uses 51 percent corn, 8 percent soybeans, and 41 percent alfalfa.

⁵ The price of commercial prepared turkey feed is based on current U.S. prices received for corn, soybeans, and wheat. The modeled feed used 51 percent corn, 28 percent soybeans, and 21 percent wheat.

¹ The average rates are estimates based on survey indications of monthly lease rates for private, non-irrigated grazing land from the January Cattle Survey.

² Includes animal unit plus cow-calf rates. Cow-calf rate converted to animal unit (AUM) using (1 aum=cow-calf *0.833).

³ 17 Western States: AZ, CA, CO, ID, KS, MT, NE, NV, NM, ND, OK, OR, SD, TX, UT, WA, and WY.

1/ Data collection and publication schedule for average prices paid by producers.

2/ Survey estimates for previous year.

Reliability of Prices Paid Estimates

Definition: Prices paid by farmers represent the average costs of inputs purchased by farmers and ranchers to produce agricultural commodities. Conceptually, the average price when multiplied by quantity purchased should equal total producer expenditures for the item.

Survey Procedures: The prices paid data are obtained from establishments that sell goods and services to farmers and ranchers. Annually, about 8,500 firms are randomly selected from lists by type of item sold with an average response rate in the range of 75-80 percent. Firms are asked to report the price for the specified item "most commonly bought by farmers" or that was the "volume seller". Approximately 135 items are surveyed each April to represent all production input items purchased. The survey reference period for most items is the 5 business days centered around the 15th of the month. Separate prices paid surveys are conducted for agricultural chemicals, fuels, feed, fertilizer, machinery, and seed.

Summary and Estimation Procedures: The annual April Prices Paid Survey is summarized as a nonprobability survey. Average prices reported are aggregated to the region and U.S. level using weights available from expenditure data and other administrative sources. Price recommendations are prepared by the State Field Offices and Headquarters for review by the Agricultural Statistics Board in Washington, D.C. Also, the change in price level for individual items surveyed are combined to the regional and U.S. levels, and are published as prices paid indexes referenced to a specific base period. Prices paid indexes for new autos and trucks, building materials, farm supplies, motor supplies, and marketing containers are updated based on price changes measured in selected Bureau of Labor Statistics (BLS) indexes.

Revisions: Any revisions are published in the monthly and in annual issues of Agricultural Prices. The basis for revision must be supported by additional data that directly affect the level of the estimate. More revisions are likely in April when separate prices paid surveys are conducted, in lieu of BLS indexes, by the USDA to measure price change.

Reliability: Current methods of summarization in April are not designed directly to calculate sampling errors. However, analytical measures approximate the U.S. relative sampling errors for major items around 10 percent. Any nonsampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these nonsampling errors.

Program Change: Effective January 1, 1995, the National Agricultural Statistics Service updated the weights and changed the construction of its prices paid and received by farmers indexes. A Federal Register Notice dated October 28, 1994 discussed these program modifications.

A 1990-92 reference and base period replaced the 1977 reference and 1971-73 base weight period. Five-year moving average weights replaced the current fixed 1971-73 base period weights. The 1910-14=100 price indexes, required by statute for computing parity prices, were linked forward based on the changes in the new 1990-92=100 indexes. The new indexes were constructed by multiplying the ratios of the current prices to the base period prices by the moving average weights (adjusted for seasonal marketing patterns for the prices received indexes).

Information Contacts

General questions should be directed to Kevin Barnes, Chief, Environmental, Economics and Demographics Branch at (202) 720-6146. Below are the commodity specialists to contact for additional information.

Crop Prices Received

Lance Honig, Chief, Crops Branch	(202) 720-2127
Jacqueline Moore, Field Crops Section	(202) 720-2127
Todd Ballard - Wheat, Rye	(202) 720-8068
Ty Kalaus - Corn, Proso Millet, Flaxseed	(202) 720-9526
Shiela Corley - Cotton, Cottonseed	(202) 720-5944
Travis Thorson - Soybeans, Sunflower, Canola, Other Oilseeds	(202) 720-7369
Don Gephart - Hay, Oats, Sorghum	(202) 690-3234
Anthony Prillaman - Peanuts, Rice	(202) 720-7688
Jacqueline Moore - Sugarcane, Sugarbeets, Barley	(202) 720-2127
Jorge Garcia-Pratts, Fruits, Vegetables & Special Crops Section	(202) 720-2127
Dan Norris - Peaches, Pears, Hops, Pulses, Mint	(202) 720-3250
Suzanne Avilla - Citrus, Tropical Fruits	(202) 720-5412
Mike Jacobsen - Apples, Apricots, Cherries, Cranberries, Plums, Prunes	(202) 720-4288
Leslie Colburn - Grapes, Tobacco	(202) 720-7235
Faye Propsom - Potatoes, Dry Edible Beans, Sweet Potatoes	(202) 720-4285
Debbie Flippin - Vegetables, Onions, Strawberries	(202) 720-2157
Dawn Keen - Tree Nuts	(202) 720-4215

Livestock Prices Received

Dan Kerestes, Chief, Livestock Branch	(202) 720-3570
Scott Hollis, Livestock Section	(202) 720-3570
Everett Olbert - Sheep, Lambs, Goats, Wool, Mohair	(202) 720-4751
Mike Miller - Milk, Milk Cows	(202) 720-3278
Nicholas Streff - Hogs	(202) 720-3106
Jason Hardegree - Cattle	(202) 720-3040
Bruce Boess, Poultry and Specialty Commodities Section	(202) 720-3570
Fleming Gibson - Turkeys	(202) 690-3237
Sharyn Lavender - Broilers, Honey	(202) 720-3244
Kim Linonis - Eggs	(202) 690-8632

Indexes, Prices Paid, and Parity Prices

Kevin Barnes, Chief, Environmental, Economics and Demographics Branch	(202) 720-6146
Kevin Hintzman, Economics Section	(202) 720-6146
Jennifer Sissom - Prices Paid Indexes, Prices Paid for Feed, Fertilizer, Agricultural Chemicals, Seeds, Farm Supplies and Repairs, Farm Machinery, Fuels, Feeder Livestock, Poultry Chicks, Feed Price Ratios, Autos & Trucks	(202) 690-3229
Daryl Brinkman - Prices Received Indexes, Parity Prices	(202) 720-8844
Seth Riggins - Grazing Fees	(202) 720-9168

ACCESS TO REPORTS!!

For your convenience, there are several ways to obtain NASS reports, data products, and services:

INTERNET ACCESS

All NASS reports are available free of charge on the worldwide Internet. For access, connect to the Internet and go to the NASS Home Page at: www.nass.usda.gov.

E-MAIL SUBSCRIPTION

All NASS reports are available by subscription free of charge direct to your e-mail address. Starting with the NASS Home Page at www.nass.usda.gov, under the right navigation, *Receive reports by Email*, click on **National** or **State**. Follow the instructions on the screen.

PRINTED REPORTS OR DATA PRODUCTS

CALL OUR TOLL-FREE ORDER DESK: 800-999-6779 (U.S. and Canada)
Other areas, please call 703-605-6220 FAX: 703-605-6900
(Visa, MasterCard, check, or money order acceptable for payment.)

ASSISTANCE

For **assistance** with general agricultural statistics or further information about NASS or its products or services, contact the **Agricultural Statistics Hotline** at **800-727-9540**, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.
