

Agricultural Prices

Released November 30, 2009, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on Agricultural Prices see page 41, office hours 7:30 a.m. to 4:00 p.m. ET.

Update Alert

The following were corrected in the November 2009 Agricultural Prices:

Dry Edible Beans: Farm Marketings data on page 37 were corrected.

November Farm Prices Received Index Unchanged

The preliminary All Farm Products Index of Prices Received by Farmers in November, at 134 percent, based on 1990-92=100, was unchanged from October. The Crop Index is down 1 point (0.7 percent) but the Livestock Index increased 4 points (3.6 percent). Producers received higher prices for lettuce, eggs, milk, and tomatoes and lower prices for apples, broccoli, strawberries, and grapes. In addition to prices, the overall index is also affected by the seasonal change based on a 3-year average mix of commodities producers sell. Increased monthly marketings of milk, cotton, cattle, and oranges offset decreased marketings of soybeans, potatoes, peanuts, and lettuce.

The preliminary All Farm Products Index is down 8 points (5.6 percent) from November 2008. The Food Commodities Index, at 134, increased 1 point (0.8 percent) from last month but decreased 5 points (3.6 percent) from November 2008.

Prices Paid Index Unchanged

The November Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW) is 176 percent of the 1990-92 average. The index is unchanged from October but 6 points (3.3 percent) below November 2008. Lower prices in November for nitrogen, complete feeds, other services, and potash & phosphate offset higher prices for diesel, supplements, LP gas, and feeder cattle.

Prices Received by Farmers

The November All Farm Products Index is 134 percent of its 1990-92 base, unchanged from the October index but 5.6 percent below the November 2008 index.

ALL CROPS: The November index is 151, down 0.7 percent from October and 4.4 percent below November 2008. The decline in the fruits & nuts index more than offset increases for commercial vegetables, oil-bearing crops, food grains, feed grains & hay, potatoes & dry beans, and cotton.

Food Grains: The November index, at 171, increased 5.6 percent from the previous month but is 25 percent below a year ago. The November all wheat price, at \$4.79 per bushel, is up 32 cents from October but \$1.50 below November 2008.

Feed Grains & Hay: The November index is 157, up 1.3 percent from last month but 16 percent below a year ago. The corn price, at \$3.64 per bushel, is up 3 cents from last month but 62 cents below November 2008. The all hay price, at \$107 per ton, is up \$1.00 from October but down \$42.00 from last November. Sorghum grain, at \$5.79 per cwt, is 24 cents above October but 69 cents below November last year.

Cotton: The November index, at 96, is up 2.1 percent from October and 6.7 percent above last year. The November price, at 57.9 cents per pound, is up 1.2 cents from the previous month and 3.1 cents above last November.

Oil-Bearing Crops: The November index, at 165, is up 1.9 percent from October but 4.6 percent lower than November 2008. The soybean price, at \$9.48 per bushel, is up 4 cents from October and 9 cents above November 2008.

Fruits & Nuts: The November index, at 156, is down 4.3 percent from October but 7.6 percent higher than a year ago. Price decreases for apples, grapefruit, strawberries, and grapes more than offset the price increase for oranges.

Commercial Vegetables: The November index, at 194, is up 15 percent from last month and 26 percent above November 2008. Price increases during November for lettuce, tomatoes, and snap beans more than offset price declines for broccoli, cantaloups, and cucumbers.

Potatoes & Dry Beans: The November index, at 131, is up 3.1 percent from last month but 16 percent below November 2008. The all potato price, at \$7.20 per cwt, is up 17 cents from October but down \$1.57 from last November. The all dry bean price, at \$31.40 per cwt, is up \$1.50 from the previous month but \$3.20 below November 2008.

LIVESTOCK & PRODUCTS: The November index, at 114, is 3.6 percent above last month but down 7.3 percent from November 2008. Compared with a year ago, prices are lower for milk, broilers, cattle, turkeys, hogs, and eggs. The price for calves is unchanged.

Meat Animals: The November index, at 105, is up 1.9 percent from last month but 3.7 percent lower than last year. The November hog price, at \$40.00 per cwt, is up \$2.20 from October but 70 cents lower than a year ago. The November beef cattle price of \$79.80 per cwt is up 60 cents from last month but \$4.50 lower than November 2008.

Dairy Products: The November index, at 115, is up 5.5 percent from a month ago but 12 percent lower than November last year. The November all milk price of \$15.00 per cwt increased 80 cents from last month but is down \$2.10 from November 2008. The fluid grade milk price is up 80 cents from last month and the manufacturing grade milk price increased 90 cents.

Poultry & Eggs: The November index, at 137, is up 7.9 percent from October but 8.1 percent below a year ago. The November market egg price, at 87.9 cents per dozen, increased 24.4 cents from October but is 2.1 cents below November 2008. The November broiler price, at 41.0 cents per pound, is up 1.0 cent from October but 5.0 cents below a year ago. The November turkey price, at 54.4 cents per pound, is up 2.3 cents from the previous month but down 4.2 cents from a year earlier.

¹ Beginning in March 2009, Utah was added and Kentucky removed from the monthly milk price and quarterly milk cow price programs. The U.S. prices and fat test percents for fluid and all milk include Utah and exclude Kentucky beginning in January 2008. Entire month.

Parity Price Equivalent for Manufacturing Grade Milk 1: United States, October and November 2009, with Comparisons

Item	Unit	Nov 2008	Oct 2009	Nov 2009
Parity Equivalent	Dollars per Cwt	43.70	41.40	41.70
Average Price F.O.B	Dollars per Cwt	16.90	13.50	14.40
Average Fat Test of Milk	Percent	4.17	4.09	4.15

¹ The parity price equivalent during 2009 is 93.2 percent of the parity price of all milk sold to plants, compared with 92.4 percent in 2008. For additional details, see January 2009 issue of Agricultural Prices.

³ Including milk diverted to manufacturing.

⁴ IN no longer published due to insufficient manufacturing grade milk volume.

⁵ Before deductions for hauling. Includes quality, quantity, and other premiums. Excludes hauling subsidies.

⁶ Preliminary.

⁷ Animals sold for dairy herd replacement only. Prices published January, April, July and October.

Parity prices are computed under the provisions of Title III, Subtitle a, Section 301 (a) of the Agricultural Adjustment Act of 1938 as amended by the Agricultural Acts of 1948, 1949, and 1956. See January "Agricultural Prices" for details on adjusted base price and parity price computations.

Seasonally adjusted price as percentage of parity price.

³ Wholesale extracted. Adjusted base price derived from state annual averages prices weighted by production. For 1982 through 1985 the national averages are the support prices.

4 Equivalent packinghouse-door returns for CA, NY (apples only), OR (except peaches), and WA. Price at point of first sale for other states.

¹ Marketing year average (MYA) prices are weighted average prices for the U.S. marketing year of September - August. ² Monthly farm marketings, based on a sample survey, as percent of total used for calculating MYA prices.

Reliability of Prices Received Estimates

Definition: Prices received represent sales from producers to first buyers. They include all grades and qualities. The average commodity price from the survey multiplied by the total quantity marketed theoretically should give the total cash receipts for the commodity.

Survey Procedures: Primary sales data used to determine grain prices were obtained from probability samples of about 2000 mills and elevators. These procedures ensure that virtually all grain moving into commercial channels has a chance of being included in the survey. Generally, States surveyed account for 90 percent or more of total U.S. production. Livestock prices are obtained from packers, stockyards, auctions, dealers, and market check data from AMS-USDA, private marketing organizations, and state commodity groups and agencies. Inter-farm sales of grain and livestock are not included since they represent very small percentages of the total marketings. Grain marketed for seed is also excluded. Fruit and vegetable prices are obtained from sample surveys and market check data from AMS-USDA, private marketing organizations, state agencies, and universities.

Summary and Estimation Procedures: Survey quantities sold are expanded by strata to state levels and used to weight average strata prices to a state average. State prices are then weighted to a U.S. price based on expanded marketings. Recommendations are prepared by the State Field Offices and reviewed by the Agricultural Statistics Board in Washington, D.C. State recommendations are reviewed for reasonableness with survey data, other States, and recent historic estimates.

Revisions: For most items, the current month's preliminary price represents a 3-5 day period around the 15th of the month. Previous month's prices represent actual dollars received for quantities sold during the entire month. Revisions are published in monthly issues of Agricultural Prices.

Reliability: U.S. price estimates based on probability surveys generally have a sampling error of less than one percent for the major commodities such as corn, wheat, soybeans, cotton, and rice. Current methods of summarization for non-probability commodities are not designed directly to calculate sampling errors. However, analytical measures approximate the U.S. relative sampling errors at around five percent. Any nonsampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these nonsampling errors.

Prices Paid by Farmers

The November Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW) at 176 (1990-92=100), is unchanged from October 2009 but down 3.3 percent from November 2008.

PRODUCTION INDEX: The November index, at 177, is unchanged from last month but decreased 6.3 percent from last year. Lower prices in November for nitrogen, complete feeds, other services, and potash & phosphate offset higher prices for diesel, supplements, LP gas, and feeder cattle.

Feed: The November index, at 180, is unchanged percent from October but decreased 5.8 percent from last November. Since October, lower prices for complete feeds offset higher prices for supplements, feed grains, concentrates, and hay & forages.

Livestock & Poultry: The November index, at 113, increased 2.7 percent from last month but decreased 4.2 percent from last year. Since October, prices are higher for feeder cattle and feeder pigs. The November feeder cattle price, at \$94.10 per cwt, is up \$1.40 per cwt from the October price. November feeder pigs averaged \$96.00 per cwt, up \$14.00 per cwt from October.

Fertilizer: The November index, at 247, is down 2.4 percent from October and 44 percent below November a year ago. Since October, lower prices for nitrogen and potash & phosphate more than offset higher mixed fertilizer prices.

Chemicals: The November index, at 144, increased 0.7 percent from October but decreased 1.4 percent from last November. Compared with last month, prices are higher for herbicides, insecticides, and fungicides/other.

Fuels: The November index, at 265, is up 5.2 percent from a month earlier and 7.3 above percent November 2008. Compared with last month, prices are higher for diesel, LP gas, and gasoline.

Machinery: The November index, at 226, was unchanged from October but is 2.3 percent above last November. Compared with last month, prices are lower for self-propelled machinery and tractors.

CONSUMER PRICE INDEX: The October 2009 Consumer Price Index, as issued by the Bureau of Labor Statistics, for all urban consumers (CPI-U) increased 0.1 percent before seasonal adjustment to a level of 216.177 (1982-84=100). The September index is 215.969. For the 12-month period ending in October, the overall index decreased 0.2 percent.

^{*} Revised.

¹ Effective January 1995, prices of commercial prepared feeds are based on current U.S. prices received for corn, soybeans, alfalfa hay, and all wheat.

² The price of commercial prepared broiler feed is based on current U.S. prices received for corn and soybeans. The modeled feed uses 58 percent corn and

The price of commercial prepared layer feed is based on current U.S. prices received for corn and soybeans. The modeled feed uses 75 percent corn and 25 percent soybeans.

⁴ The price of commercial prepared dairy feed is based on current U.S. prices received for corn, soybeans, and alfalfa. The modeled feed uses 51 percent corn, 8 percent soybeans, and 41 percent alfalfa.

The price of commercial prepared turkey feed is based on current U.S. prices received for corn, soybeans, and wheat. The modeled feed used 51 percent

corn, 28 percent soybeans, and 21 percent wheat.

Reliability of Prices Paid Estimates

Definition: Prices paid by farmers represent the average costs of inputs purchased by farmers and ranchers to produce agricultural commodities. Conceptually, the average price when multiplied by quantity purchased should equal total producer expenditures for the item.

Survey Procedures: The prices paid data are obtained from establishments that sell goods and services to farmers and ranchers. Annually, about 8,500 firms are randomly selected from lists by type of item sold with an average response rate in the range of 75-80 percent. Firms are asked to report the price for the specified item "most commonly bought by farmers" or that was the "volume seller". Approximately 135 items are surveyed each March to represent all production input items purchased. The survey reference period for most items is the 5 business days centered around the 15th of the month. Separate prices paid surveys are conducted for agricultural chemicals, fuels, feed, fertilizer, machinery, and seed.

Summary and Estimation Procedures: The annual March Prices Paid Survey is summarized as a nonprobability survey. Average prices reported are aggregated to the region and U.S. level using weights available from expenditure data and other administrative sources. Price recommendations are prepared by the State Field Offices and Headquarters for review by the Agricultural Statistics Board in Washington, D.C. Also, the change in price level for individual items surveyed are combined to the regional and U.S. levels, and are published as prices paid indexes referenced to a specific base period. Prices paid indexes for new autos and trucks, building materials, farm supplies, motor supplies, and marketing containers are updated based on price changes measured in selected Bureau of Labor Statistics (BLS) indexes.

Revisions: Any revisions are published in the monthly and in annual issues of Agricultural Prices. The basis for revision must be supported by additional data that directly affect the level of the estimate. More revisions are likely for March when separate prices paid surveys are conducted, in lieu of BLS indexes, by the USDA to measure price change.

Reliability: Current methods of summarization for the March data are not designed directly to calculate sampling errors. However, analytical measures approximate the U.S. relative sampling errors for major items around 10 percent. Any nonsampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these nonsampling errors.

Program Change: Effective January 1, 1995, the National Agricultural Statistics Service updated the weights and changed the construction of its prices paid and received by farmers indexes. A Federal Register Notice dated October 28, 1994 discussed these program modifications.

A 1990-92 reference and base period replaced the 1977 reference and 1971-73 base weight period. Five-year moving average weights replaced the current fixed 1971-73 base period weights. The 1910-14=100 price indexes, required by statute for computing parity prices, were linked forward based on the changes in the new 1990-92=100 indexes. The new indexes were constructed by multiplying the ratios of the current prices to the base period prices by the moving average weights (adjusted for seasonal marketing patterns for the prices received indexes).

Information Contacts

General questions should be directed to Kevin Barnes, Chief, Environmental, Economics and Demographics Branch at (202) 720-6146. Below are the commodity specialists to contact for additional information.

Crop Prices Received Lance Honig, Chief, Crops Branch (202) 720-2127 Jacqueline Moore, Field Crops Section..... ACCESS TO REPORTS!!

For your convenience, there are several ways to obtain NASS reports, data products, and services:

INTERNET ACCESS

All NASS reports are available free of charge. For free access, connect to the Internet and go to the NASS Home Page at: www.nass.usda.gov.

E-MAIL SUBSCRIPTION

All NASS reports are available by subscription free of charge direct to your e-mail address. Starting with the NASS Home Page at **www.nass.usda.gov**, under the right navigation, *Receive reports by Email*, click on **National** or **State**. Follow the instructions on the screen.

PRINTED REPORTS OR DATA PRODUCTS

CALL OUR TOLL-FREE ORDER DESK: 800-999-6779 (U.S. and Canada)
Other areas, please call 703-605-6220 FAX: 703-605-6880
(Visa, MasterCard, check, or money order acceptable for payment.)

ASSISTANCE

For **assistance** with general agricultural statistics or further information about NASS or its products or services, contact the **Agricultural Statistics Hotline** at **800-727-9540**, 7:30 a.m. to 4:00 p.m. ET, or e-mail: **nass@nass.usda.gov**.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.
