

# Agricultural Prices

ISSN: 1937-4216

Released April 27, 2017, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, United States Department of Agriculture (USDA).

## March Prices Received Index Increased 3.4 Percent

The March Prices Received Index (Agricultural Production), at 94.8, increased 3.4 percent from February 2017. At 87.4, the Crop Production Index increased 0.9 percent. At 100.6, the Livestock Production Index increased 4.7 percent. Producers received higher prices for broilers, cattle, and market eggs but lower prices for milk, strawberries, and hogs. Compared with a year earlier, the Prices Received Index is up 2.4 percent. The Crop Production Index increased 6.5 percent and the Livestock Production Index is up 0.7 percent. In addition to prices, the indexes are influenced by the monthly mix of commodities producers market. Increased monthly movement of cattle, strawberries, milk, and calves offset the decreased marketing of cotton, apples, soybeans, and hay. The Food Commodities Index, at 100.4, increased 3.7 percent from the previous month and is up 3.2 percent from March 2016.

## March Prices Paid Index Up 0.5 Percent

The March Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 106.4, is up 0.5 percent from February 2017 but is down 0.1 percent from March 2016. Higher prices in March for feeder cattle, herbicides, nitrogen, and hay & forages more than offset lower prices for LP gas, field crop seeds, other services, and mixed fertilizer.

## March Prices Received by Farmers

The March Prices Received Index for agricultural production is 94.8 percent of its 2011 base, up 3.4 percent from the February 2017 index and 2.4 percent from the March 2016 index.

**Crop production:** The March index, at 87.4, increased 0.9 percent from February and is 6.5 percent above March 2016. The Vegetable & Melon Index increase more than offset the Fruit & Tree Nut Index decrease.

**Grain and oilseed:** The March index, at 65.7, is up 0.2 percent from February and 2.0 percent higher than March 2016. The Food Grain Index and Feed Grain Index increases more than offset the lower Oilseed Index.

**Feed grain:** The March index, at 58.7, is up 1.4 percent from last month but is 2.3 percent lower than a year ago. The corn price, at \$3.49 per bushel, is up 5 cents from last month but is down 7 cents from March 2016. At \$4.89 per cwt, sorghum grain is 12 cents lower than February and down 78 cents from March a year earlier.

**Food grain:** At 65.4, the index for March is 4.5 percent higher than the previous month but is 4.2 percent below a year earlier. The March price for all wheat, at \$4.37 per bushel, is up 22 cents from February but is down 3 cents from March 2016.

**Oilseed:** At 77.3, the index for March is down 1.4 percent from February but is 12 percent higher than March 2016. The soybean price, at \$9.69 per bushel, is down 17 cents from February but is up \$1.13 from March a year earlier.

**Fruit and tree nut:** The March index, at 122.4, is down 1.4 percent from February but is 4.3 percent higher than a year earlier. Price decreases during March for strawberries and apples more than offset price increases for oranges and lemons.

**Vegetable and melon:** At 122.7, the index for March is up 5.1 percent from the previous month and is 23 percent higher than March 2016. Price increases during March for cauliflower and broccoli more than offset price declines for lettuce and sweet corn.

**Other crop:** The March index, at 78.3, is up 1.2 percent from the previous month and is 4.4 percent above March 2016. The all hay price, at \$132.00 per ton, is \$6.00 higher than February but \$4.00 lower than March 2016. At 68.8 cents per pound, the price for upland cotton is up 0.2 cents from February and 10.6 cents from March 2016.

**Livestock production:** The index for March, at 100.6, is up 4.7 percent from the previous month and 0.7 percent from March a year earlier. Compared with a year ago, prices are higher for milk, broilers, and hogs. Prices for cattle, calves, market eggs, and turkeys are down from a year earlier.

**Meat animal:** At 103.1, the March index is up 3.9 percent from the previous month but is 5.1 percent lower than a year earlier. At \$53.00 per cwt, the March hog price is down \$1.40 from February but is \$3.00 higher than a year earlier. The March beef cattle price of \$125.00 per cwt is up \$6.00 from the previous month but is down \$10.00 from March 2016.

**Dairy:** The index for March, at 86.1, is down 6.4 percent from the previous month but is 13 percent higher than March a year earlier. The March all milk price of \$17.30 per cwt is down \$1.20 from February but is up \$2.00 from March 2016.

**Poultry and egg:** At 106.4, the March index is up 15 percent from February and 1.5 percent from March 2016. The March market egg price, at 55.5 cents per dozen, increased 18.2 cents from February but is down 17.6 cents from March 2016. The March broiler price, at 55.0 cents per pound, is up 7.0 cents from February and a year earlier. At 69.0 cents per pound, the March turkey price is up 1.8 cents from the previous month but is down 9.9 cents from March 2016.

<sup>1</sup> Parity prices began January 2015.

<sup>2</sup> Seasonally adjusted price as percentage of parity price.

<sup>3</sup> Wholesale extracted. Adjusted base price derived from state annual averages prices weighted by production. For 1982 through 1985 the national averages are the support prices.

<sup>4</sup> Equivalent packinghouse-door returns for California, New York, Oregon, and Washington. Price at point of first sale for other states.

## Commodity Parity Prices – United States: March 2017 with Comparisons

[Parity prices are computed under the provisions of Title III, Subtitle a, Section 301 (a) of the Agricultural Adjustment Act of 1938 as amended by the Agricultural Acts of 1948, 1949, and 1956. See February *Agricultural Prices* for details on adjusted base price and parity price computations]

## Adjustment for Seasonal Variation - All Eggs and All Milk

Base prices used in calculating parity prices are averages of prices received by farmers for ten years; therefore, any seasonal variation is largely averaged out. To facilitate comparisons with parity prices, monthly prices for All Eggs and All Milk are adjusted for seasonal variation. The seasonally adjusted price is calculated by dividing the monthly price by the adjustment factor.

### Prices Received for All Eggs Adjusted for Seasonal Variation by Month – United States: 2013-2016

State	Prices received adjusted for seasonal variation, dollars per dozen

## Reliability of Prices Received Estimates

**Definition:** Prices received represent sales from producers to first buyers. They include all grades and qualities. The average commodity price from the survey multiplied by the total quantity marketed theoretically should give the total cash receipts for the commodity.

**Survey procedures:** Primary sales data used to determine grain prices were obtained from probability samples of about 1,900 mills and elevators. These procedures ensure that virtually all grain moving into commercial channels has a chance of being included in the survey. Generally, States surveyed account for 90 percent or more of total United States production. Livestock prices are obtained from packers, stockyards, auctions, dealers, and market check data from AMS-USDA, private marketing organizations, and state commodity groups and agencies. Inter-farm sales of grain and livestock are not included since they represent very small percentages of the total sales. Grain marketed for seed is also excluded. Fruit and vegetable prices are obtained from sample surveys and market check data from AMS-USDA, private marketing organizations, state agencies, and universities.

**Summary and estimation procedures:** Survey quantities sold are expanded by strata to state levels and used to weight average strata prices to a state average. State prices are then weighted to a United States price based on expanded sales. Recommendations are prepared by the Regional Field Offices and reviewed by the Agricultural Statistics Board in Washington, D.C. State recommendations are reviewed for reasonableness with survey data, other States, and recent historic estimates.

**Revisions:** In general, revisions are made during annual commodity market year estimation time, following five-year Census revisions, or when later information is received. Revisions are published in monthly issues of *Agricultural Prices*.

**Reliability:** United States price estimates based on probability surveys generally have a sampling error of less than one percent for the major commodities such as corn, wheat, soybeans, cotton, and rice. Current methods of summarization for non-probability commodities are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors at around five percent. Any non-sampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these non-sampling errors.

**Program Changes:** After the Council on Food, Agricultural and Resource Economics (C-FARE) 2009 program review which included changes in farm production practices, plans were implemented to make necessary program improvements in the agricultural price program. The index group structure for prices received was modified to maintain a more universal structure and consistency with the required 1910-1914 series.

Modifications implemented January 2014 include the following: update the current 1990-1992 base reference period to 2011, link the 1910-1914 series to the updated base reference period, 2011, create index groups used universally by researchers, data users, and policymakers, re-classify agricultural commodities into the index groups, expand the commodity coverage for vegetable, melon, non-citrus, and tree nuts, update monthly market weights, and adjust (normalization) current five year moving average cash receipts and farm input cost weights.

Modifications implemented January 2015 discontinued preliminary prices and replaced the annual average index with an annual index.

The February 2016 program update changed the rounding of the 2011 base period indexes to nearest tenth of a percent. The 1910-1914 base period indexes remain rounded to the nearest whole number.

See Price Program Links at end of this report for program change details.

## March Prices Paid by Farmers

The March Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 106.4, is up 0.5 percent from February 2017 but is down 0.1 percent from March 2016.

**Production:** The March index, at 104.1, is up 0.6 percent from February but is 1.2 percent lower than last year. Higher prices in March for feeder cattle, herbicides, nitrogen, and hay & forages more than offset lower prices for LP gas, field crop seeds, other services, and mixed fertilizer.

**Feed:** At 97.3, the March index increased 1.0 percent from February but is down 3.2 percent from last March. Since February, prices are higher for hay & forages, concentrates, complete feeds, feed grains, and supplements.

**Livestock and poultry:** The March index, at 102.9, increased 2.1 percent from February but is down 15 percent from last year. Since February, prices are higher for feeder cattle and feeder pigs. The March feeder cattle price, at \$135.00 per cwt, is up \$3.00 per cwt from the February price. March feeder pigs averaged \$187.00 per cwt, up \$7.00 per cwt from February.

**Fertilizer:** The index for March, at 69.5, is up 1.8 percent from February but is 7.9 percent below March a year ago. Since February, higher prices for nitrogen and potash & phosphate more than offset lower prices for mixed fertilizer.

**Chemicals:** The March index, at 108.8, is up 4.5 percent from February but is unchanged from last March.

**Fuels:** At 60.9, the March index is down 5.3 percent from February but is 18 percent above March 2016. Compared with February, prices are lower for LP gas and diesel but higher for gasoline.

**Machinery:** The index for March, at 117.8, increased 0.2 percent from February and is 3.0 percent above last March. Compared with last month, prices are higher for other machinery, self-propelled machinery, and tractors.

**Consumer Price Index:** The March 2017 Consumer Price Index for All Urban Consumers (CPI-U), as issued by the Bureau of Labor Statistics, increased 2.4 percent over the last 12 months to an index level of 243.801 (1982-1984=100). For the month, the index increased 0.1 percent prior to seasonal adjustment.

## Feed Price Ratios – United States: March 2017 with Comparisons

Feed price ratio <sup>1</sup>	March 2016	February 2017	March 2017
Broiler-feed: pounds of broiler grower feed equal in value to 1 pound of broiler, live weight <sup>2</sup> .....	5.0	4.6	5.3
Market egg feed: pounds of laying feed equal in value to 1 dozen eggs <sup>3</sup> .....	8.8	4.3	6.4
Hog-corn: bushels of corn equal in value to 100 pounds of hog, live weight .....	14.0	15.8	15.2
Milk-feed: pounds of 16% mixed dairy feed equal in value to 1 pound of whole milk <sup>4</sup> .....	2.12	2.61	2.39
Steer & heifer-corn: bushels of corn equal in value to 100 pounds of steer & heifers, live weight .....	38.5	35.2	36.4
Turkey-feed: pounds of turkey grower equal in value to 1 pound of turkey, live weight <sup>5</sup> .....	9.0	7.3	7.5

<sup>1</sup> Effective January 1995, prices of commercial prepared feeds are based on current United States prices received for corn, soybeans, alfalfa hay, and all wheat.

<sup>2</sup> The price of commercial prepared broiler feed is based on current United States prices received for corn and soybeans. The modeled feed uses 58 percent corn and 42 percent soybeans.

<sup>3</sup> The price of commercial prepared layer feed is based on current United States prices received for corn and soybeans. The modeled feed uses 75 percent corn and 25 percent soybeans.

<sup>4</sup> The price of commercial prepared dairy feed is based on current United States prices received for corn, soybeans, and alfalfa. The modeled feed uses 51 percent corn, 8 percent soybeans, and 41 percent alfalfa.

<sup>5</sup> The price of commercial prepared turkey feed is based on current United States prices received for corn, soybeans, and wheat. The modeled feed uses 51 percent corn, 28 percent soybeans, and 21 percent wheat.

## Prices Received Used to Calculate Feed Price Ratios – United States: March 2017 with Comparisons

Feeder pigs .....cwt	195.00	180.00	187.00

## Reliability of Prices Paid Estimates

**Definition:** Prices paid by farmers represent the average costs of inputs purchased by farmers and ranchers to produce agricultural commodities. Conceptually, the average price when multiplied by quantity purchased should equal total producer expenditures for the item.

**Survey procedures:** The prices paid data are obtained from establishments that sell goods and services to farmers and ranchers. Annually, about 8,500 firms are randomly selected from lists by type of item sold with an average response rate in the range of 75-80 percent. Firms are asked to report the price for the specified item "most commonly bought by farmers" or that was the "volume seller". Approximately 135 items are surveyed each March to represent all production input items purchased. The survey reference period for most items is the five business days centered at the 15th of the month. Separate prices paid surveys are conducted for agricultural chemicals, fuels, feed, fertilizer, machinery, and seed.

**Summary and estimation procedures:** The annual March Prices Paid Survey is summarized as a non-probability survey. Average prices reported are aggregated to the region and United States level using weights available from expenditure data and other administrative sources. Price recommendations are prepared by the Regional Field Offices and Headquarters for review by the Agricultural Statistics Board in Washington, D.C. Also, the change in price level for individual items surveyed are combined to the regional and United States levels, and are published as prices paid indexes referenced to a specific base period. Prices paid indexes for new autos and trucks, building materials, farm supplies, motor supplies, and marketing containers are updated based on price changes measured in selected Bureau of Labor Statistics (BLS) indexes.

**Revisions:** Any revisions are published in the monthly and in annual issues of Agricultural Prices. The basis for revision must be supported by additional data that directly affect the level of the estimate. More revisions are likely for March when separate prices paid surveys are conducted, in lieu of BLS indexes, by the USDA to measure price change.

**Reliability:** Current methods of summarization for the March data are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors for major items around 10 percent. Any non-sampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these non-sampling errors.

**Program change:** Effective January 2014, the National Agricultural Statistics Service modified the five-year moving weights and updated the base reference period. In January 2015, publication of preliminary prices was suspended, and the annual average index was replaced by an annual index.

As of January 2014, the 1990-1992 base reference period was updated to 2011. Five-year moving average weights are adjusted (normalized) to minimize the effects of price changes. The 1910-1914=100 price indexes, required by statute for computing parity prices, were linked forward based on the changes in the new 2011=100 indexes. The new indexes were constructed by multiplying the ratios of the current prices to the base period prices by the moving average weights.

Modifications implemented January 2015 discontinued preliminary prices and replaced the annual average index with an annual index.

The April 2015 program update discontinued publication of the annual March survey prices paid data.

The February 2016 program update changed the rounding of the 2011 base period indexes to nearest tenth of a percent. The 1910-1914 base period indexes remain rounded to the nearest whole number.

See Price Program Links at end of this report for program change details.
