Agricultural Prices 2000 Summary

July 2001

USDA

Update Alert

Three pages have been revised: A-41, A-55, and B-14.

Page A-41: AZ Pecan price for 2000 changed from \$3.310 to \$1.310.

Page A-55: AZ Spring Onions - footnote added: 1/ Includes small amount of processing onions; other footnotes renumbered.

Page B-14: Parity Ratios for 1999 (1910-14 = 100): Jan - changed from 40 to 41; Jul - changed from 40 to 39; and Oct - changed from 38 to 37.

Adjusted Parity Ratio for 1999, (1910-14 = 100): Oct - changed from 42 to 41.

Ratio for 1998, (1990-92 = 100): Jul - changed from 88 to 89; Oct - changed from 87 to 88; Nov - changed from 87 to 88; and Avg - changed from 88 to 89.

Ratio for 1999, (1990-92 = 100): Jul - changed from 83 to 82.

Ratio for 2000, (1990-92 = 100): Jul - changed from 81 to 80.

Agricultural Prices

2000 Summary

The 41st Annual Summary of Agricultural Prices contains prices farmers received for commodities sold as well as prices paid for production input goods and services. Prices are weighted and aggregated into price indexes. These indexes provide measures of relative price changes for agricultural outputs and inputs.

The State, Regional, and U.S. average prices for agricultural commodities and farm production inputs are based on voluntary reports from agri-business firms, merchants, dealers, and farmers throughout the Nation. These data are collected at regular intervals using mailed inquiries, telephone, and personal enumeration. We greatly appreciate the cooperation and support of all the individuals and firms that have provided data.

Estimates of prices received by farmers are published by state for crops (1999-2000), vegetables (1998-2000), and livestock and poultry (1999-2000). Estimates for prices paid by farmers for feed, fuel, and fertilizer are published by region for 1997-2000. Prices paid for all other surveyed items are published for 1997-2000 at the U.S. level. U.S. price indexes for both prices received and paid including any index revisions are published for 1993-2000.

Preliminary crop prices for 2000 and fruit and vegetable prices for 1999 and 2000 are subject to revision. Prices received for livestock and poultry are final estimates. Prices received and prices paid revisions are first published in the monthly issues of "**Agricultural Prices**" and again in the Annual Summary.

Annual Summary of Prices Received by Farmers

Agricultural Commodity Prices represent monthly and marketing year averages received by farmers at the point of first sale for all grades and qualities of the commodity sold. Points of first sale by farmers range from bulk sales at the farm to packed and graded products delivered to a local market. For crops the price refers to all sales, regardless of the year harvested. The average price concept is that price which would result from dividing the total dollars received by all farmers, before any marketing charges are deducted, by the total quantity sold. Contract sales are reported in the month of settlement, not when the contract is made. Prices are on an "as sold" basis, with the following exceptions: milk is priced f.o.b. plant or receiving station; fruit and vegetable pricing is covered in detail on page A-2.

Monthly Prices are based on all sales of the commodity during the entire month. Exceptions are hay, eggs, and turkeys which are based on the 5-day period centered on the 15th of the month. State commodity prices are estimated for months when at least 0.5 percent of the annual sales occur. Weights for computing monthly United States average prices are based on estimated marketings during the month by State.

Marketing Year Average (MYA) Prices are weighted average prices for crops, livestock, and poultry items sold during the marketing year. Commodity marketing years are defined on pages A-13 and A-14. State marketing year average prices are computed by weighting monthly prices by the estimated percentage of monthly sales during the marketing year. State and U.S. monthly and marketing year average prices for crops are open-market prices excluding Government program payments or allowances for unredeemed loans and purchases by the Government. Government payments to farmers are included in farm income accounts as a separate cash receipt item. U.S. marketing year average prices for corn, sorghum, oats, barley, wheat, rice, soybeans, flaxseed, sunflower, and upland cotton are computed by weighting U.S. monthly prices by monthly marketings for the U.S. marketing year. Other crops, livestock, and poultry U.S. marketing year average prices are computed by weighting State marketing year average prices by the estimated quantity sold in each State.

Preliminary Marketing Year Average Price estimates for 2000 are based on price data through December 2000 for all field crops except tobacco which is based on data through April 2001. Marketing years for fruit, vegetables, and nuts vary by State and commodity. Allowances are made for the portion of the crop expected to be marketed during the remainder of the marketing year for all commodities except cotton.

Monthly and Marketing Year Average Crop Prices for 1999 are final except for fruit. Crop prices for 2000 are subject to revision. These revisions will be published first in the monthly issues of Agricultural Prices and then in the "Annual Summary". Livestock, livestock products and poultry prices are final estimates for 1999 and 2000. Prices for agricultural commodities may be revised during the Agency's five-year review of production estimates. Price revisions resulting from this review are usually small and generally are the result of re-weighting State prices to the U.S. level.

State monthly and MYA prices for noncitrus fruit sold for fresh market are the weighted average of prices received by producers at the points of first sale. Points of first sale include f.o.b. shipping point, farm, roadside, U-pick, farmer's market, grower auctions, and bulk sales to a packer. The exceptions to this are California, Washington, New York (apples only), and Oregon (excluding peaches), which use equivalent returns at the packinghouse-door. This is a f.o.b. packed shipping point price adjusted back to the packinghouse-door by subtracting all costs that accumulate between the packinghouse and the f.o.b. shipping point. Costs include cleaning, grading, packing, inspecting, and marketing. U.S. monthly prices are the weighted averages of the state prices. U.S. MYA prices are derived by dividing the sum of the states' values of production by their sum of production. Monthly prices include all fruit sold in a month regardless of the crop year in which it was harvested.

State MYA prices for noncitrus fruit sold for processing are the equivalent returns producers receive for fruit delivered to the processing plant door. The exceptions are California olives and clingstone peaches, which are prices at the first delivery point, and cranberries, which is a weighted average of adjusted co-op pool proceeds and independent sales at the first delivery point. U.S. MYA prices for noncitrus processing fruits are derived by dividing the sum of states' values by their sum of production. There are no monthly price series of noncitrus processing fruits.

State and U.S. MYA prices for noncitrus crops at the "all sales" level (fresh and processing) are derived by dividing total value by total production.

State monthly citrus prices are based on weighted average f.o.b. packed prices received for fresh fruit, and weighted average prices received at the processing plant door for processing fruit. Equivalent returns for fresh and processed fruit are calculated at the packinghouse-door and on-tree levels by deducting picking, hauling, sorting, grading, packing, cooling, marketing, and other costs from the two base prices.

State MYA prices and equivalent returns for citrus are calculated from the weighted average fresh and processed prices received each month in the crop's marketing season. The crop year 1999-2000 as shown on all citrus tables in this publication refers to the crop which bloomed in 1999 and was marketed during the 1999-2000 season. (See page A-14 for a description of the citrus marketing seasons.)

Monthly and MYA citrus prices at the U.S. level are the average of the states' prices weighted by their box movement and approximate net weight per box. The box weights used are as follows: Grapefruit: Arizona and California - 67 lbs., Florida - 85 lbs. and Texas - 80 lbs.; Lemons - 76 lbs; Limes - 88 lbs.; Oranges: Arizona and California - 75 lbs., Florida - 90 lbs., and Texas - 85 lbs.; Tangelos - 90 lbs.; Tangerines: Arizona and California - 75 lbs., and Florida - 95 lbs.; Temples - 90 lbs.

State monthly fresh market vegetable prices are f.o.b. shipping point, f.o.b. equivalents, or point of first sale prices. The state MYA prices for fresh market vegetables are the weighted average of the monthly prices using estimated monthly movements. U.S. monthly prices are the weighted average of state prices. U.S. MYA prices are derived by dividing the sum of states' values of production by their sum of production. (Prices for broccoli, carrots, cauliflower, celery, and onions may include some processing.)

Marketing Years

Field Crops

Barley: June-May for CA; July-June for all other estimated States.

Canola: June-May, U. S. only.

Dry Edible Beans: September-August for all estimated States.

Corn for Grain: August-July for GA, LA, MS, and TX; September-August for IL, IN, IA, KS, KY, MO, NC, and OH; October-September for all other estimated States.

Cotton: August-July for all States.

Cottonseed: August-February for all States.

Flaxseed: July-June for all estimated States.

Hay: April-March for AZ; May-April for AR, CA, GA, KS, KY, MO, NV, NM, OK, TX, and UT; June-May for all other estimated States.

Mustard Seed: September-August, U. S. only.

Oats: May-April for TX; June-May for CA, July-June for all other estimated States.

Peanuts: August-February for all States.

Potatoes: The marketing year extends over a 21 month period beginning in November preceding the specified crop year and extending into July the following year. November (previous year)-May for winter crop potatoes; April-August for spring crop potatoes; June-December for summer crop potatoes; July-July (following year) for fall potatoes.

Rapeseed: June-May, U. S. only.

Rice: July-June for LA and TX; August-July for AR and MS; October-September for CA.

Safflower: September-August, U. S. only.

Sorghum for Grain: June-May for TX; August-July for AR and OK; September-August for IL, KS, MO, and SD; October-September for NE.

Soybeans: September-August for all estimated States.

Sunflower: September-August for all estimated States.

Tobacco: July-November for flue-cured, types 11-14; November-April for fire-cured, types 21-23; November-February for Burley, type 31, and dark air-cured, types 35-37; March-May following the year of production for Southern MD, type 32.

Wheat: May-April for AZ, CA, GA, OK, and TX; June-May for AR, IL, IN, KS, and MO; July-June for all other estimated States.

Fruit

Apples (Fresh): June-May for most South Atlantic, Southeastern, and Central States, plus CA; July-June for all other States except OR and WA where most of the crop is marketed August-July.

Marketing Years (Con't)

Oranges: October-May for AZ Navel; January-July for AZ Valencias; October-June for CA Navel; February-December for CA Valencias; October-March for FL early and mid-season; February-July for FL Valencias; October-March for TX early and mid-season; January-May for TX Valencias.

Grapefruit: October-July for AZ; September-August for CA; October-June for FL; October-May for TX.

Lemons: September-May for AZ; August-July for CA.

Limes: April-March for FL.

Tangelos: October-February for FL.

Tangerines: October-May for AZ; October-June for CA; September-May for FL.

Temples: January-April for FL.

Vegetables

Asparagus: January-October for CA; May-July for MI; April-July for WA.

Carrots: January-December for CA; July-December for MI and WA; December-May for TX.

Celery: January-June and November-December for CA Southern-Coast and FL; May-December for CA Central-Coast; July-October for MI and NY.

Onions: April-July for spring; May-September for summer (non-storage); July-April for summer (storage).

Sweet Corn: April-October for CA; January-July and October-December for FL; June-October for all other monthly states.

Tomatoes: May-November for CA; January-June and October-December for FL; April-July and November-January for TX; June-October for all other monthly states.

Livestock, Livestock Products and Poultry

Cattle: January-December.

Hogs: December-November.

Sheep: January-December.

Broilers: December-November.

Eggs: December-November.

Turkeys: January-December.

Honey: April-March.

Mohair: January-December.

Wool: January-December.

- 1/ 1999 Revised. 2/ Equivalent liveweight returns to producers. Derived from ready-to-cook (RTC) prices using the following formula: (RTC price minus processing cost)*(dressing percentage) = equivalent liveweight price
- 3/ IN, IA, MN and PA are actual liveweight prices. All other State prices are equivalent liveweight returns to producers. (See footnote 2 for formula.)
- 4/ Combined to avoid disclosure of individual firms. Broilers: CA, IA, IN, LA, ME, MI, OR and WA. Other Chickens: AK, AZ, NV, NM and ND. Turkeys: CO, KS, NE, OK, OR, TX, UT and WI.

1/ Preliminary. State Marketing Year Average Prices are computed by weighting state monthly prices by estimated sales for the month during the crop year. U.S. Marketing Year Average Price is computed by weighting state Marketing Year Average Prices by estimated sales for the crop year. Monthly prices refer to all potatoes sold in a given month regardless of the year harvested.

Annual Summary of Prices Paid

Agricultural Inputs: The Index of Prices Paid by Farmers (PPITW) measures changes in the prices paid for goods and services used in crop and livestock production and family living. The index is made up of 5 major components. In terms of total farm expenditures, the production component accounts for over 65 percent of the total and the family living component represented by the Bureau of Labor Statistics' Consumer Price Index (CPI-U) accounts for less than 20 percent of the index. The remaining three components are: (1) interest charges per acre on farm real estate debt and interest on farm non-real estate debt; (2) taxes payable per acre on farm real estate; and (3) wage rates paid to hired farm labor. Prices Paid Indexes are not seasonally adjusted and there are no adjustments for quality changes.

The 1910-14=100 base is required under the Agricultural Adjustment Act of 1938, as amended. The Index of Prices Paid by Farmers for Commodities and Services, Interest, Taxes, and Farm Wage Rates on the 1910-14=100 base is called the Parity Index. The Parity Index reflects relative price change but does not take into account the technological advancements and increased productivity of American agriculture. Federal regulations require that the National Agricultural Statistics Service publish parity prices, the indexes, and relevant price data monthly in "Agricultural Prices".

In 1995, the National Agricultural Statistics Service reweighted and reconstructed the prices paid and received by farmers indexes. The indexes are now based on 5-year moving average weights. The changes in the construction of the indexes simplifies updating component items and reference periods while maintaining appropriate weights. The overall changes to the weighting and construction of the indexes did not have a significant effect on the index levels, and therefore, had little effect on the level of parity prices. Indexes are newly published on a 1990-92=100 base using a 1990-92 reference period. As mentioned above, the 1910-14=100 base is continued for the parity index.

Beginning 1995, the Prices Paid Survey of items purchased by farm establishments is conducted annually in April. Surveys are conducted for feed, livestock purchases, seed, fertilizer, ag chemicals, fuel, and farm machinery. The Bureau of Labor Statistics, (BLS) indexes measure price changes and replace survey activity for farm supplies and repairs, autos and trucks, building materials, and marketing containers. The BLS indexes are used monthly to measure price change when no survey data are collected. Before 1995, quarterly prices paid surveys were conducted by NASS. About 135 selected items are priced to represent groups of similar items purchased which make up the major production expenditures categories. The number of input items consumed on farms is so extensive that it is not feasible to collect price data for all of the inputs.

Items on the questionnaire are described in the simplest way consistent with definite identification. Firms are requested to report the prices for the item most commonly sold which meets the general specification criteria. Reported data are summarized to regional estimates and then weighted to U.S. prices. Weights are based on available consumption or expenditure information. Average prices including state and local taxes are used in computing the indexes and are published in Agricultural Prices in the same month as the survey. Regional and U.S. prices are published for feed, fuel, and fertilizer. U.S. prices are published for the remaining items surveyed.

Revisions: Indexes are recomputed monthly to reflect the most recent price changes and include any updated prices or indexes. Prices Paid Indexes, including all components and subcomponents, are subject to annual revisions as additional data become available. In April, index revisions are published to reflect yearly change for items surveyed annually by the Prices Paid Survey and adjusted BLS indexes used for the one month time lag between the reporting and summary date. Annual revisions generally are made in the taxes, interest, and rent and farm services components of the index.

Parity Ratio: The Parity Ratio is the ratio of the Prices Received Index, 1910-14=100, to the Index of Prices Paid by Farmers for Commodities and Services, Interest, Taxes, and Wage Rates (PPITW) on a 1910-14=100 base. The Parity Ratio is a measure of price relationships; not a measure of farm income, of farmer's total purchasing power, or of farmer's welfare. The well-being of the farm community depends upon a number of factors other than price relationships such as changes in production efficiency and technology, quantities of farm products sold, and supplementary income, including income from off-farm jobs, and federal farm programs.

Ratio: The ratio of the Prices Received Index to the Prices Paid Index (PPITW) on the 1990-92=100 base provides an indication of the change that has occurred in the prices farmers receive for their commodities relative to the change in the cost of inputs using the average of 1990-92 as the reference period. When this ratio is greater than 100 percent, it implies that farm commodity prices have increased at a faster rate than farm input prices. When the ratio is less than 100 percent, farm input prices are increasing at a more rapid pace than farm commodity prices.

- 1/ Modifications in the calculation of feed price ratio are a result of Prices Paid program changes initiated in January 1995, using a different procedure. NASS uses fixed composition rations common to dairy and poultry production as established by University Animal Nutritionists'. The methodology utilizes major raw feed component prices from the NASS agricultural commodity prices published monthly. The major feed components of corn and soybeans account for 83 to 91 percent of the total ingredients in the rations. The contribution for feed additives and antibiotics are held constant, but no value has been included to the price for this contribution.
- 2/ Simple average of monthly ratios for calendar year.
- 3/ Number of pounds of 16% protein mixed dairy feed (corn-51 pounds, Soybeans 8 pounds, Alfalfa hay-41 pounds) equal in value to one pound of all milk.
- 4/ Number of pounds of turkey grower feed (corn-51 pounds, Soybeans-28 pounds, All Wheat-21 pounds) equal in value to one pound of turkey, live weight.
- 5/ Number bushels of corn equal in value to 100 pounds of steer & heifers, live weight.
- 6/ Number of bushels of corn equal in value to 100 pounds of all hogs live weight.
- 7/ Number of pounds of laying feed (corn-75 pounds, soybeans-25 pounds) equal in value to one dozen market eggs.
- 8/ Number of pounds of broiler grower feed (corn-58 pounds, Soybeans-42 pounds) equal in value to one pound of broiler, live weight.

 * The data presented in the following tables are calculated and published *
 * for use by the Forest Service, USDA and the Bureau of Land Management, *
 * USDI in computing Public Land Grazing Fees. *

2000 Prices Paid Index for Beef Cattle Production (1964-68=100) 1/: 554

1/ The Index of Prices Paid by Farmers and Ranchers for Beef Cattle Production input items is for the period of November 1999 through October 2000. The components of this index include the production indexes of Fuels & Energy, Farm & Motor Supplies, Building & Fencing Materials, Interest, Farm Wage Rates, and Farm Services. These components are weighted to the overall index value by their importance in the cost of producing beef cattle, the weights are unchanged from a year earlier.

Cattle: Prices Received, Selected States, 2000 1/

State	:	Beef Cattle
	:	Dollars Per Cwt
9 Great Plains States 2/	:	70.10
11 Western States 3/	:	68.88
16 Western States 4/	:	69.63
17 Western States 5/	:	69.69

- 1/ Average for November 1999 through October 2000, except NV, UT, and WA which are marketing year averages.
 2/ CO, KS, NE, NM, ND, OK, SD, TX, and WY.
 3/ AZ, CA, CO, ID, MT, NM, NV, OR, UT, WA, AND WY.
 4/ Eleven Western States plus KS, NE, ND, OK, and SD.
 5/ Sixteen Western States plus TX.

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotope, etc.) should contact the USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC, 20250-9410, or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

ACCESS TO REPORTS!!

For your convenience, there are several ways to obtain NASS reports, data products, and services:

INTERNET ACCESS

All NASS reports are available free of charge on the worldwide Internet. For access, connect to the Internet and go to the NASS Home Page at: <http://www.usda.gov/nass/>. Select "Today's Reports" or Publications and then Reports by Calendar or Publications and then Search, by Title or Subject.

NEW INTERNET DATA BASE

Now available at the NASS home page is access to our **On-line Published Estimates Data Base**. Limited commodities are now available for U.S. and State estimates. Data from our five year Historic Bulletins will be available in the data base when publications are released.

E-MAIL SUBSCRIPTION

All NASS reports are available by subscription free of charge direct to your e-mail address. Send an e-mail message to: usda-reports@usda.mannlib.cornell.edu. In the body of the message type the word: **list**.

AUTOFAX ACCESS

NASSFax service is available for some reports from your fax machine. Please call 202-720-2000, using the handset attached to your fax. Respond to the voice prompts. Document 0411 is a list of available reports.

PRINTED REPORTS OR DATA PRODUCTS

CALL OUR TOLL-FREE ORDER DESK: 800-999-6779 (U.S. and Canada)
Other areas, please call 703-834-0125 FAX: 703-834-0110
(Visa, MasterCard, check, or money order acceptable for payment.)

ASSISTANCE

For **assistance** with general agricultural statistics or further information about NASS or its products or services, contact the **Agricultural Statistics Hotline** at 800-727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.
