CATTLE ON FEED 21 STATES

JUL 22 1959

The number of cattle and calves on feed July 1, 1959 in 21 major feeding States totaled 5,128,000 head according to the Crop Reporting Board. In these same 21 States, 5,891,000 head were on feed April 1 and 6,225,000 head were on feed January 1.

13 STATES INCREASE 10 PERCENT

In the 13 feeding States for which comparable data are available, 4,704,000 head were on feed July 1, 1959--10 percent above the 4,281,000 head on feed a year earlier and a record high July 1 total for the series which began in 1955. The April-July decline of 11 percent for the 13 States is in line with the decline of last year, but less than the seasonal drop shown for the three earlier years.

NUMBERS UP 7 PERCENT IN NORTH CENTRAL STATES

Cattle and calves on feed in 9 North Central States at 3,464,000 head this July 1 compare with 3,252,000 head a year earlier--an increase of 7 percent. In most North Central States for which cattle on feed estimates are available for both years, the number on feed increased over a year earlier. The increases ranged from 3 percent in Ohio, Indiana, and Kansas to 14 percent in Nebraska. The exception was Illinois which showed a 2 percent decline. Shipments of stocker and feeder cattle into 9 Corn Belt States for the period April through June were up a third from a year earlier.

FOUR WESTERN STATES SHOW 21 PERCENT INCREASE

For the 4 important Western States for which comparable data are available, (Texas, Colorado, Arizona, and California) cattle on feed numbers July 1, 1959 at 1,240,000 head were up 21 percent from the 1,029,000 head July 1, 1958. These same States had 983,000 head on feed April 1, 1959. Practically all of this increase occurred in California, where numbers usually increase from April to July. July 1 numbers in this State were up 18 percent from a year earlier and a record high. In Colorado numbers were up 9 percent from July 1, 1958.

MARKETINGS AND PLACEMENTS UP FOR SECOND QUARTER OF 1959

Marketings of fed cattle during the second quarter of 1959 were 9 percent larger than a year earlier in the 13 States for which quarterly estimates are available for both years. Total sales of good, choice, and prime beef steers sold out of first hand for slaughter at 7 markets for April through June were 10 percent above the same period a year earlier. This increase was partially offset by a decline in fed heifer slaughter.

The number of cattle placed on feed during the April-June period of 1959 in 13 States was 13 percent above a year earlier. Placements in the 9 North Central States were up 14 percent and the combined total placements for Texas, Colorado, Arizona, and California showed an 11 percent increase.

For the 21 States, 2,902,000 fed cattle and calves were marketed and 2,139,000 head of cattle and calves were placed on feed during the April-June period of 1959.

WEIGHT OF CATTLE ON FEED

A breakdown of July 1 numbers by weight groups in 13 States indicates a 3 percent decrease from a year earlier in the number of cattle weighing over 900 pounds. The 1,573,000 head weighing over 900 pounds were 49,000 head less than the number in this group on July 1, 1958. The number weighing under 900 pounds totaled 3,131,000 head--up 472,000 head or 18 percent from a year earlier. For the 21 States now in the quarterly program, 3 percent of the cattle and calves on feed July 1, 1959 weighed under 500 pounds, 18 percent were in the 500-699 class, 46 percent weighed 700-899 pounds, 25 percent were in the 900-1,099 class, and 8 percent weighed over 1,100 pounds.

TIME ON FEED

Cattle on feed less than 3 months for the 13 States for which comparable data are available were 18 percent above July 1, 1958, whereas the number on feed 3-6 months was up 7 percent and the number over 6 months was up 4 percent. The number on feed less than 3 months on July 1 made up 40 percent of the total compared with 38 percent a year earlier. The number on feed 3-6 months accounted for 33 percent of the total compared with 34 percent last year. Those on feed more than 6 months comprised 27 percent of the total this July 1 and 28 percent a year earlier. In 21 States the number on feed less than 3 months July 1 was 40 percent of the total; 3-6 months, 32 percent; and over 6 months, 28 percent.

KINDS ON FEED

In the 21 States now in the quarterly reporting program, steers and steer calves comprised 71 percent of the cattle and calves on feed July 1, 1959. Heifers and heifer calves made up 28 percent of the total, while cows and other cattle made up 1 percent.

MARKETING INTENTIONS

In 13 States for which comparable data are available, cattle feeders reported that out of the cattle and calves on feed July 1, they expect to market 3,165,000 in July, August, and September. If intentions are carried out marketings for this quarter would be 25 percent above the 2,533,000 head marketed from the July 1 inventory during the same 3-month period last year. Present plans are to market 1,539,000 head of those now on feed after September 30, 1959--12 percent less than the number marketed after September 30 last year from those on hand July 1. Cattle feeders in 21 States expect to market 3,480,000 head--68 percent of the July 1 inventory during July, August, and September. Of the July 1 total number on feed, 19 percent are intended for market in July, 25 percent in August, and 24 percent in September.
