

Cattle on Feed

National
Agricultural
Statistics
Service

United States
Department of
Agriculture

Washington, D.C.

Released July 22, 1994, by the Agricultural Statistics Board. Inventory estimates refer to July 1, 1994. Placement and marketing estimates refer to the month of June and the quarter of April through June.

Cattle on Feed Down 5 Percent in 13 Quarterly States

Cattle and calves on feed for slaughter market in the 13 States preparing quarterly estimates totaled 9.02 million head, down 5 percent from a year ago but up 2 percent from July 1, 1992. The inventory included 5.92 million steers and steer calves, down 2 percent from a year ago but 3 percent above two years ago. This group accounts for 65.6 percent of the total inventory. Heifers and heifer calves accounted for 3.06 million head, 9 percent below a year ago.

Placements of cattle and calves on feed in the 13 States during the April-June 1994 quarter totaled 4.67 million, down 12 percent from last year and 11 percent below April-June 1992. Net placements of 4.34 million for April-June were 11 percent below last year and 10 percent below April-June 1992.

Marketings of fed cattle during the April-June 1994 quarter totaled 5.95 million, up 2 percent from the same quarter last year and 5 percent above two years ago.

Other disappearance totaled 329,000 head compared to 460,000 in April-June 1993 and 444,000 in April-June 1992.

Cattle on Feed in 7 Monthly States Down 4 Percent

Cattle on feed July 1, 1994, in the 7 monthly States totaled 7.55 million, down 4 percent from the previous year but 3 percent above two years ago.

Placements in feedlots during June totaled 1.20 million, 16 percent below 1993 and 10 percent below 1992.

For information call Glenda Shepler at (202) 720-3040. Office hours are 8:00 a.m. to 4:30 p.m. ET.

Marketings during June totaled 1.77 million, up 1 percent from a year ago and 3 percent above 1992.

Other disappearance during June was 101,000 head, 6 percent below last year and 13 percent below 1992.

April-June 1994 quarterly marketings for the 7 States, at 5.07 million, were up 2 percent from April-June 1993 and 6 percent above April-June 1992. Marketings for the 7 States during the April-June quarter accounted for 85 percent of the 13-State total.

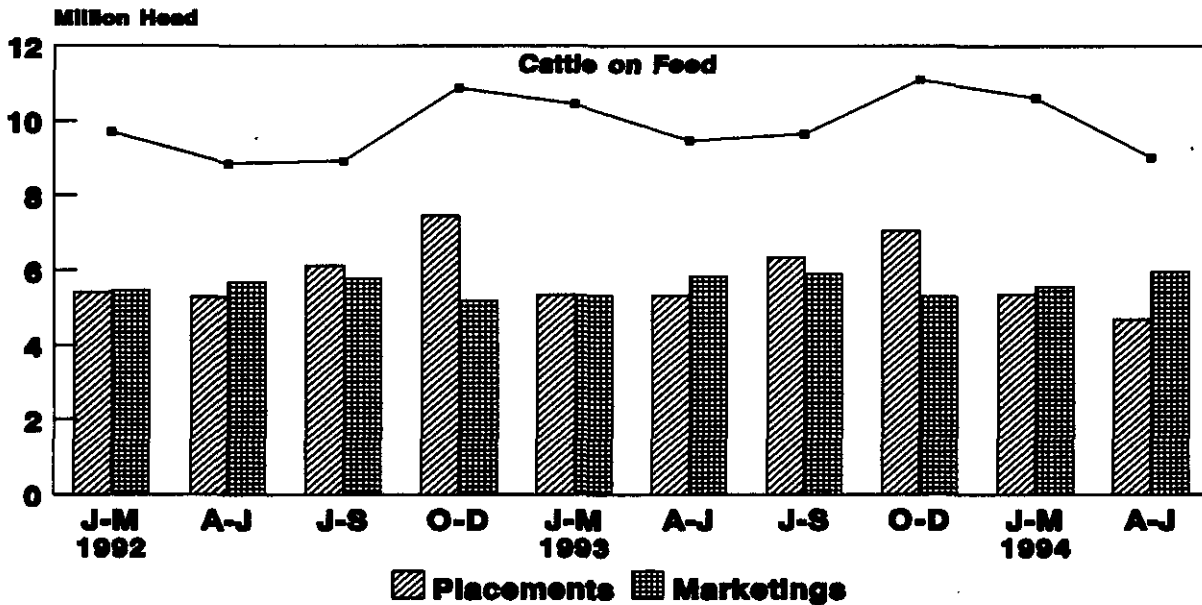

Cattle on Feed in 1000+ Capacity Feedlots Down 2 Percent

Cattle on feed July 1, 1994, for the 13 States in the feedlots with 1,000 or more head capacity totaled 7.73 million head, down 2 percent from 1993 but 5 percent above two years ago. The inventory in the 1,000+ capacity feedlots accounted for 85.7 percent of the total inventory.

U.S. Cattle on Feed

All cattle and calves on feed for the slaughter market in the United States on July 1, 1994, totaled 10.5 million head. Cattle on feed in the feedlots with 1,000 or more head capacity totaled 8.20 million head. This is the first time a July 1, 1994, U.S. cattle on feed inventory estimate has been published.

Reliability of July 1 Cattle on Feed Estimates

Terminology: Cattle on feed are animals being fed a ration of grain, silage, hay and/or protein supplement for slaughter market that are expected to produce a carcass that will grade select or better. It excludes cattle being "backgrounded only" for later sale as feeders or later placement in another feedlot.

Placements are cattle put into a feedlot, fed a ration which will produce a carcass that will grade select or better, and are intended for the slaughter market.

Marketings are cattle shipped out of feedlots to a slaughter market.

Other disappearance includes death losses, movement from feedlots to pastures and shipments to other feedlots for further feeding.

Survey Procedures: A random sample of producers in the 13 major cattle on feed States were surveyed to provide data for these estimates. Survey procedures ensured that all cattle on feed producers, regardless of size, had a chance to be included in the survey. Large producers were sampled more heavily than small operations. About 13,000 operators were contacted during the first half of July by mail, telephone, and face-to-face personal interviews and 88 percent of the reports were usable. Regardless of when operators responded, they were asked to report inventories as of July 1.

Estimation Procedures: These cattle on feed estimates were prepared by the Agricultural Statistics Board after reviewing recommendations and analysis submitted by each State office. Regional and State survey data were reviewed for reasonableness with each other and with estimates from the previous month and/or quarter when setting the current estimates.

Revision Policy: Revisions to previous estimates are made to improve month to month and/or quarter to quarter relationships. Estimates for the previous month/quarter are subject to revision in all 13 States each quarter when current quarterly estimates are made. In January, all monthly and quarterly estimates for the previous year are reviewed and subject to revisions. The reviews are primarily based on slaughter data, state check-off or brand data, and any other data that may have been received after the original estimate was made. Estimates will also be reviewed after data from the Department of Commerce's five-year Census of Agriculture are available. No revisions will be made after that date and estimates become final.

Reliability: Since all cattle on feed operators are not included in the sample, survey estimates are subject to sampling variability. Survey results are also subject to non-sampling errors such as omissions, duplications, and mistakes in reporting, recording, and processing the data. The effects of these errors cannot be measured directly. They are minimized through rigid quality controls in the data collection process and through a careful review of all reported data for consistency and reasonableness.

To assist users in evaluating the reliability of the estimates in this report, the "Root Mean Square Error" is shown for selected items in the table below. The "Root Mean Square Error" is a statistical measure based on past performance and is computed using the differences between first and latest estimates. The "Root Mean Square Error" for the July 1 cattle on feed inventory estimate over the past 10 years is 2.0 percent. This means that chances are 2 out of 3 that the final estimate will not be above or below the current estimate of 9.02 million head by more than 2.0 percent, or about 180,000 head. Chances are 9 out of 10 that the difference will not exceed 3.6 percent, or about 325,000 head (the 90 percent confidence level). The table below also shows a 10-year record of the range of differences between first and latest estimates for selected items. Using estimates of cattle on feed inventory as an example, changes between the first inventory estimate and the latest estimate during the past 10 years have averaged 125,000 head, ranging from 0 to 315,000 head. During this period, the initial inventory estimate has been below the latest estimate 7 times, above the final estimate 1 time, and unchanged 2 times. This does not imply that the July 1 estimate is likely to understate or overstate final inventory.

Reliability of July 1 Cattle on Feed Estimates 1/
