*Figures on miscellaneous poultry no longer comparable in that ducks were included in these figures previous to July 1, 1932.

While the Bureau feels assured of the completeness and accuracy of the total amount of poultry reported, it cannot vouch for the accuracy of the classification of the various sizes of chickens. There are a number of concerns who find it impracticable to make segregation on their reports. Consequently, there will be fryers included in the figures shown for broilers roasters and possibly miscellaneous poultry.

* Does not include 2,106 20-qt. cans of 8% plastic cream.

** The above figures for August 1, 1935 do not include any butter or cheese held by either the Agricultural Adjustment Administration or the Federal Surplus Relief Administration. Under the present policy of these agencies purchases of butter and cheese are moved into consumption as they become available for shipment.

A. H. Black
Chief of Bureau.

Note: These holdings include stocks in both cold storage warehouses and meat packing house plants. Thousands; i.e., "500" omitted from above tables. Items in terms of pounds except where otherwise indicated.

1/ Figures on miscellaneous poultry no longer comparable in that ducks were included in these figures previous to July 1, 1932.

Figures shown subject to revision. Revised figures will appear in next months report.

(a) Does not include 3,103 twenty qt. cans of 82% plastic cream.

(b) The above figures for August 1st, 1935 do not include any butter or cheese held by either the Agricultural Adjustment Administration or the Federal Surplus Relief Administration. Under the present policy of these agencies purchases of butter and cheese are moved into consumption as they become available for shipment.
