**NOTE:** THESE HOLDINGS INCLUDE STOCKS IN BOTH COLD STORAGE WAREHOUSES AND MEAT PACKING PLANTS, THOUSANDS, I.E. "000" OMITTED FROM ABOVE TABLES. ITEMS IN TERMS OF POUNDS EXCEPT WHERE OTHERWISE STATED.

*FIGURES SHOWN SUBJECT TO REVISION. REVISED FIGURES WILL APPEAR IN NEXT MONTH'S REPORT. WHILE THE BUREAU FEELS ASURED OF THE COMPLETENESS AND ACCURACY OF THE TOTAL AMOUNT OF POULTRY REPORTED, IT CANNOT VOUCH FOR THE ACCURACY AND CLASSIFICATION OF THE VARIOUS SIZES OF CHICKENS. THERE ARE A NUMBER OF CONCERNING WHOSE HOLDINGS ARE EXTREMELY HEAVY, WHO FIND IT IMPRACTICABLE TO MAKE SEGREGATION ON THEIR REPORTS, CONSEQUENTLY THERE WILL BE BROILERS CONTAINED IN THE FIGURES SHOWN FOR BROILERS, ROASTERS AND POSSIBLY MISCELLANEOUS POULTRY.*

---

D. G. Cummins

2/11/38 1:50 P.M.
COLD STORAGE REPORT
AS OF FEBRUARY 1, 1938

The Bureau of Agricultural Economics makes the following report based on data furnished by cold storage warehouses throughout the country. The report contains stocks on hand as of February 1, 1938, with comparisons, for the following groups of commodities: Fruits and Vegetables, Dairy and Poultry Products, and Meats (cured and frozen) and Lard. Special tables of cold storage holdings by States or geographic divisions of the country are included for cream, butter, American cheese, eggs, poultry and apples.

FRUITS AND VEGETABLES

Cold storage apple holdings on February 1 were the largest of record for that date, totaling 26,076,000 bushels. They exceeded the stocks of a year ago by 8,716,000 bushels but were only 1,400,000 bushels above the near-record supplies of February 1, 1936.

Stocks of frozen and preserved fruits held in cold storage plants were 117,804,000 pounds as of February 1, which is approximately 54,000,000 pounds greater than those held a year ago and 29,000,000 pounds in excess of the previous February 1 record-holdings of 1932.

Stocks of vegetables processed by "quick-freeze" methods totaled 28,168,000 pounds, which indicated a net out-of-storage movement of approximately 1,200,000 pounds during the month of January.

1 Includes baskets and Eastern boxes or crates.
2 Includes considerable quantities of cold pack and preserved fruits.
DAIRY AND POULTRY PRODUCTS

The net movement of creamery butter out of cold storage in January 1938 was approximately 5% of the 5-year average (1933-37) and was the smallest for any January since 1933. Stocks of creamery butter in cold storage on February 1, 1938, amounted to 21,083,000 pounds, which was about 4,000,000 pounds below the 5-year average holdings on that date.

American cheese in cold storage on February 1 amounted to 80,347,000 pounds, which was almost 8,000,000 pounds less than the stocks on the same date last year but 9,000,000 pounds more than the 5-year average for February 1. The present holdings of American cheese, however, are the second largest of record for February 1, being exceeded only by the stocks of a year earlier.

The net movement of shell eggs out of storage in January amounted to 519,000 cases compared with only 162,000 cases in January last year. The 5-year average is 473,000 cases.

Poultry in cold storage on February 1 amounted to 115,091,000 pounds, which was about 63,000,000 pounds less than the record high stocks for February 1 last year and 11,000,000 pounds less than the 5-year average. Low stocks continue to prevail for broilers, fryers, and roasters but larger-than-average stocks are in evidence for fowls, ducks, and turkeys. Supplies of turkeys, although still large, are 13,000,000 pounds less than on February 1 last year.

1/ Frozen eggs are converted on the basis of 35 pounds to the case.

2/ SPECIAL NOTE: 76 percent of the total frozen eggs reported as of February 1, 1938, were classified as follows:

- Whites .... 29 percent
- Yolks ...... 24 "
- Mixed ..... 47 "
FROZEN AND CURED MEATS
(INCLUDING LARD)

Holdings of frozen and cured meats, as reported by cold storage warehouses and meat-packing establishments on February 1, were 697,425,000 pounds compared with 1,062,304,000, the holdings a year ago, and the 5-year (1933-37) average stocks of 827,207,000 pounds.

Cold storage stocks of frozen and cured beef on February 1 were the third lowest of record - 59,770,000 pounds. A year ago similar supplies of beef amounted to 160,316,000 and the 5-year (1933-37) average was 104,991,000 pounds.

Total pork holdings, as reported to the Bureau of Agricultural Economics by the meat-packing and cold storage industries on February 1, were 25 percent less than a year earlier but only 12 percent less than average. Total supplies of pickled pork were the second lowest recorded for this date (February 1).

The beef and pork items, as reported above, actually include but a small portion of the total meat supply available for consumption. For beef, it includes mostly those items that are dried or otherwise processed, and for pork, the bulk of the holdings will ultimately become hams, bacon, salt pork or will be otherwise processed.

The smaller storage stocks of all meats on February 1 compared with those of a year earlier, therefore, do not reflect a similar change in the quantity of meats available. The total volume of livestock slaughtered under Federal inspection in January was slightly greater than during January, a year ago.
