COLD STORAGE REPORT

Analysis of holdings and space June 30, 1958

Data for this report are collected from public, private, and semiprivate warehouses, apple houses, and meat-packing plants where food products are generally stored for 30 days or more. Commodities in space owned or leased and operated by the armed services are not reported. All June 30 figures are preliminary.

Commodity summary

Midyear warehouse stocks of cheese, eggs, poultry, frozen vegetables, frozen juices, and red meats were below their respective levels of June 30, 1957, according to warehouse reports received by the Crop Reporting Board. On the other hand, stocks of butter and frozen fruits were larger than a year earlier. Warehouse holdings of American cheese totaled 310 million pounds on June 30, about 27 percent less than on June 30, 1957 and 33 percent less than the June 30, 1953-57 average. Shell egg holdings at 817,000 cases were only about half as large as stocks a year earlier and June 30 average holdings. An above average gain in frozen egg holdings during June raised warehouse stocks to 131 million pounds but these inventories were about one-fourth less than average and one-fifth less than a year earlier. Reductions in frozen poultry stocks brought holdings down to 137 million pounds. This compares with 190 million on June 30, 1957 and the June 30 average of 175 million pounds. Turkey stocks were down to 79 million pounds, 15 percent less than a year earlier. June gains in frozen vegetable holdings totaled 20 million pounds, about 30 percent less than in June 1957 and 29 percent less than average. Warehousing holdings of 556 million pounds compare with 657 million a year earlier and 477 million, the June 30 average. Orange juice stocks were down 5 million gallons to 33 million on June 30, 1958. During June 1957, stocks were increased by 2 million gallons to a total of 14 million. June increases in frozen fruit stocks, particularly strawberries, in the South Central and Pacific states, brought total fruit holdings to 115 million pounds. These holdings were almost 50 percent above average for June 30 and were 11 percent larger than a year earlier. Strawberry stocks totaled 226 million pounds, the largest ever reported for this time of year. Red meat holdings at 393 million pounds were almost one-third below the average for this date and almost one-fifth less than stocks on June 30, 1957.

Storage occupancy

On June 30, cooler occupancy in public refrigerated warehouses remained unchanged from a month earlier while freezer occupancy was up 2 percentage points. Utilization of cooler space on June 30 was at 50 percent. This was the lowest recorded for the date. Last year this time, 57 percent of the cooler space was occupied. The 1953-57 average is 60 percent. Small gains or losses in occupancy are noted in most regions. However, the exceptions were in the Middle Atlantic which remained unchanged; Mountain and Pacific each was down 4 points. Freezer occupancy, up 2 points from a month earlier, was at 60 percent. This was the lowest freezer occupancy rate recorded for the date. Last year this date, freezer occupancy was 68 percent which is also the June 30 average. Most of the June gain in freezer occupancy was in the Pacific region, up 10 points.

General commodity movement

Cooler-held stocks were reduced during June by 38 million pounds, leaving 1.2 billion on hand at the end of the month. Although stock increases were reported for selected fresh fruits, nutmeats, milk, cheese, eggs, and red meats, these seasonal gains were insufficient to counter decreases in stocks of apples, pears, fresh vegetables, nuts in shell, and miscellaneous cooler stocks. In freezers, stocks were up by 104 million pounds because of June gains in holdings of cream, butter, eggs, fruits, vegetables, and selected red meats. Only poultry, juices, and pork stocks were down from a month earlier.
Fruits, vegetables, and juices

Frozen fruit holdings were increased during June by 98 million pounds bringing total warehousing holdings up to 114 million. These holdings were 49 percent above average and 11 percent above a year earlier. Most fruit items were reduced during June except strawberries, Young, Logan, Boysen, and similar berries and raspberries.

Strawberry holdings were increased to 226 million pounds, up 100 million from May 31 because of the heavy influx of stocks into South Central and Pacific Coast warehouses. West Coast holdings were up to 120 million pounds; South Central to 43 million pounds. Strawberry holdings were at a record high for June 30 and only 18 million pounds short of the all-time high reported August 31, 1956. Frozen vegetable holdings were up 20 million pounds to 556 million on June 30. For most vegetable items, stocks were reduced from a month earlier but for asparagus, peas, and spinach, gains were reported. Holdings of peas were increased by 52 million bringing the total to 169 million pounds. While these stocks were 17 percent above average, they were 11 percent under a year earlier. Orange concentrate holdings at 33 million gallons were about one-fourth under the June 30, 1957 level and 9 percent under average. The June disappearance of 5 million gallons compares with a 2 million gallon gain this time last year and the average disappearance of 100,000 gallons.

Poultry and dairy products

Poultry stocks totaled 137 million pounds on June 30 which compares with 190 million in storage on June 30 last year, a record high for the date. However, current stocks were 1 percent above the 1953-57 average. Turkey stocks totaled 79 million pounds on June 30. This compares with 92 million pounds in storage June 30, 1957 which also was a record for June 30. With 79 million pounds in storage on June 30, the turkey industry has reduced its storage stocks by 162 million pounds since the record October 1957 high. From October 1956 through June 1957, stocks were reduced by 101 million pounds. Shell egg stocks totaled 8,177,000 cases on June 30, a net increase of 112,000 cases from a month earlier. Current stocks were 53 percent below those held a year earlier and 51 percent below average. Frozen egg stocks, at 131 million pounds on June 30, were up 30 million pounds from a month earlier. The June 1957 net gain was 26 million pounds while the average is also 26 million. A net gain of 20 million pounds brought cheese stocks to 350 million pounds on June 30. This compares with 471 million pounds in storage June 30 last year and 503 million, the 1953-57 average. Butter stocks totaled 171 million pounds on June 30, for a net gain of 36 million pounds. Current stocks were 16 percent above holdings of June 30 last year but 35 percent below average.

Meat and meat products

Stocks of red meats at 393 million pounds on June 30, were one-fifth less than a year ago and one-third less than average. The June net reduction of 29 million pounds was three-fifths less than a year ago and two-thirds less than the 1953-57 average. In contrast, a net gain of 7 million in beef stocks brought the June 30 stocks to 107 million pounds. Last year a 17 million pound reduction during June left 113 million in storage. The average net change is a reduction of 16 million pounds and average stocks are 129 million pounds. Pork stocks on June 30 totaled 210 million pounds, 21 percent below last year's date and 62 percent below average. On June 30 last year, the net change in pork stocks was a decline of 15 million pounds while the average is a reduction of 59 million. In the frozen pork cuts, picnic holdings at 6 million pounds were slightly below a month earlier but only one-half as much as stocks on June 30 last year. A reduction of 10 million pounds during the month left 31 million pounds of frozen hams in storage on June 30. Last year this date, nearly 49 million pounds were in storage. Frozen pork bellies were reduced by 22 million during the month and totaled 63 million on June 30.

(1) Government holdings are included in the tables of total holdings elsewhere in the report and consist of reported stocks held by USDA, the Armed Services, and other Government agencies. In addition to stocks reported above, the Armed Services hold some stocks in space owned and operated by them on which figures are not available.

(2) Based on actual reports. Estimates on late reports are not included. Current figures will be revised next month.
