COLD STORAGE REPORT

AS OF FEBRUARY 1, 1939

4-10922A
U 576

Withdrawals of creamery butter from cold storage during January 1939 exceeded the input by 17,325,000 pounds. The net out-of-storage movement of this commodity for the same period in 1938 was 11,742,000 pounds and the 5-year (1934-38) average for January is 22,476,000 pounds. The situation as to stocks on hand on February 1 shows that commercial stocks, that is, the quantity other than holdings of the Dairy Products Marketing Association and relief butter, were 9,532,000 pounds less than on February 1 a year ago and 16,391,000 less than the 5-year (1934-38) average for February 1. Total holdings, however, were 80,336,000 pounds in excess of those of a year ago and 73,477,000 above the February 1 average. ^{1/}

Total stocks of eggs, both shell and frozen, were the equivalent of 1,581,000 cases. This quantity is 1,464,000 cases less than was on hand February 1, 1938, and 322,000 less than the February 1 average.

Seasonal out-of-storage movement of fruits and vegetables continued during January; stocks of apples were reduced by 5,624,000 bushels, which compares with 5,724,000 bushels withdrawn during January 1938 and the 5-year average out-of-storage movement of 5,195,000 bushels.

Frozen fruit stocks were reduced by 9,730,000 pounds and frozen vegetables by 3,558,000 pounds during January.

The seasonal out-of-storage movement of frozen poultry got under way during January with withdrawals from cold storage of 4,651,000 pounds. A year ago the January reduction was 3,395,000 and the 5-year average reduction 6,915,000 pounds.

Stocks of all frozen and cured meats increased during the month by nearly 17 percent. They were, however, approximately 6 percent less than total stocks on February 1, 1938, and 21 percent below the February 1 average. Lard stocks were increased during January by 23 percent and were 33 percent greater than those of February 1 last year and about 3 percent above average.

^{1/} For the computation of 5-year averages in this report, the method employed in reports prior to that of January 1939 has been restored, i.e., the years included in the average are the five immediately preceding that of the current report. Comparable January 1 averages for the same years (1934-38) are also included in the tables to replace the 1933-37 averages used in the report of January 12, 1939.

(2/13/39)

FRUITS AND VEGETABLES

FRESH FRUITS

Cold storage stocks of apples on February 1, 1939, were the equivalent of 20,585,000 bushels. This quantity is 5,695,000 bushels less than on hand February 1 last year and 519,000 bushels less than the 5-year (1931-38) average.

Holdings of all varieties of pears totaled 878,000 boxes and baskets compared with 662,000 a year earlier, and with a 5-year average of 563,000 boxes and baskets.

FROZEN FRUITS

Stocks of frozen fruits reported as in cold storage on February 1 totaled 116,031,000 pounds compared with 125,761,000 pounds on January 1, a reduction of 9,730,000 pounds. Of the total February 1 stocks, 28,775,000 pounds were unclassified as to variety.

Continuing the method used in the January report, the cold storage holdings of frozen fruits are given in totals for each variety, as in the table on page 3. The segregation by method of process - "quick frozen" or "cold packed" - as reported, is given in a table on page 7.

FROZEN VEGETABLES

Stocks of frozen vegetables were reduced during January by 3,558,000 pounds. February 1 stocks were 61,986,000 pounds as compared with 28,640,000 pounds on hand February 1, 1938. Of the February 1 holdings, 4,355,000 pounds were reported unclassified as to variety.

Contents of February 1 Cold Storage Report

Separate tables appearing in this report show United States stocks on hand on February 1, this year compared with previous periods, for the following groups of commodities:

Fruits (fresh and frozen) and Vegetables (frozen), page 3;

Dairy and Poultry Products, page 4;

Meats (cured and frozen) and Lard, page 5.

Special tables of cold storage holdings, by States or geographic divisions of the country, are included for apples and pears (page 8); cream, butter, American cheese, eggs and poultry (page 6); and frozen poultry, by classes, (page 7).

1/ Includes baskets and Eastern boxes or crates.

2/ See also table on page 7 showing reported segregation by method of processing, i.e., "quick freeze" and "cold pack".

3/ Data for this item prior to July 1, 1938, included under "other".

4/ Includes items designated by note 3/.

Stocks of creamery butter decreased during January by 17,325,000 pounds, which exceeded the out-of-storage movement of January last year by 5,583,000 pounds but was 22,476,000 less than the 5-year (1934-38) average. The Dairy Products Marketing Association holdings on February 1, 1939, were 70,043,000 pounds compared with 87,074,000 pounds on January 1. Of the purchases made by the Federal Surplus Commodities Corporation from the Dairy Products Marketing Association, 14,295,000 pounds were still in storage. There were also 5,529,000 pounds of butter held by various States and municipalities for relief distribution. The combined butter holdings of these agencies on February 1 thus totaled 89,868,000 pounds compared with 95,908,000 pounds held on January 1, 1939. The remaining stocks, held commercially, amounted to 21,679,000 pounds on February 1 compared with 32,964,000 on January 1. The February 1 commercial stocks in 1938 were 31,211,000 pounds and the average holdings during the 1934-38 period were 38,070,000.

Stocks of American cheese in cold storage on February 1 were 90,348,000 pounds, a decrease during January of 12,215,000 pounds. Holdings were 9,869,000 pounds more than on February 1, 1938, and 13,698,000 greater than the 5-year average.

Total holdings of both shell and frozen eggs were the equivalent of 1,581,000 cases. The reduction of stocks during January was the equivalent of 518,000 cases. This compares with a reduction during January last year of 906,000 and a 5-year average of 901,000 cases.

The seasonal out-of-storage movement of frozen poultry commenced in January with a net reduction in stocks between January 1 and February 1 of 4,651,000 pounds. February 1 holdings were 134,457,000 pounds, which quantity exceeds stocks on hand February 1 a year ago by 19,352,000 pounds and the 5-year average by 6,517,000.

1/ Frozen eggs are converted on the basis of 35 pounds to the case.

2/ SPECIAL NOTE: 81 percent of total frozen eggs reported as of February 1, 1939, were classified as follows: Whites - 27 percent; Yolks - 16 percent; and Mixed - 57 percent.

3/ A breakdown of frozen poultry items by geographic divisions will be found on page 7.

MEATS AND LARD

Frozen and cured beef holdings were reduced during January 1939 by 4,961,000 pounds. February 1 stocks this year were below those of a year earlier by 6,143,000 and below the 5-year (1934-38) February 1 average by 55,729,000 pounds.

Stocks of frozen and cured pork were materially increased during the month, the amount of increase being 94,381,000 pounds or approximately 22 percent. The quantity on hand February 1, 1939, was 29,543,000 pounds less than that on February 1 a year ago and 100,911,000 less than the 5-year average.

Stocks of all frozen and cured meats, which totaled 656,974,000 pounds, were less than those of a year earlier by nearly 41,000,000 pounds, and 177,000,000 pounds less than the 5-year average.

Lard stocks increased by 23 percent, or 24,719,000 pounds, during the month, which placed them nearly 33,000,000 pounds above February 1 holdings a year ago and 4,350,000 above the 5-year average.
