SPECIAL IN THIS ISSUE

Preliminary report on the 1963 survey of the
capacity of refrigerated warehouses
in the United States.

page 14

[Data for this report are collected from public, private, and semiprivate warehouses, apple houses, and meat-packing plants where food products are generally stored for 30 days or more. Commodities in space owned or leased and operated by the armed services are not reported. All May 31, data are preliminary.]

U. S. DEPARTMENT OF AGRICULTURE

PERCENTAGE OCCUPANCY OF PUBLIC COLD-STORAGE WAREHOUSES

END OF MONTH OCCUPANCY

COLD STORAGE REPORT, JUNE 1, 1964

Commodity Summary

June 1 stocks held under refrigeration totaled 5.1 billion pounds, a new high for the date, according to the Crop Reporting Board. Cooler-held products declined as a result of seasonal reductions in apples, pears, vegetables, nuts, pork and canned meats. Product weight in storage totaled 1.7 billion pounds compared with 1.5 billion a year earlier. June 1 freezer stocks were down slightly from a month earlier and at 3.4 billion were about the same as a year earlier but 20 percent larger than average. Utilization of public refrigerated storage space showed a slight change from a month earlier. Cooler occupancy advanced 1 point to 55 percent on June 1 while freezer occupancy, at 66 percent, was unchanged. Meats in storage on June 1 were 10 million pounds larger than on May 1, the result of gains of 11 million pounds of beef and 3 million of pork which were offset partially by a 4 million pound reduction in stocks of other meats. Supplies of meats were one-third larger than this time last year and almost three-fifths larger than average. Poultry stocks declined 25 million pounds during May leaving 217 million pounds in storage on June 1. These supplies were larger than both last year and average. There was a general reduction in all areas except for a small gain in the New England States. Turkey holdings, down to 99 million pounds on June 1, were principally in California, New York, Illinois, and Minnesota.

Butter supplies increased 4 percent from May 1 and at 203 million pounds were 46 percent under the June 1, 1963 level but 12 percent larger than average. Government-owned stocks totaled 154 million pounds on June 1, down slightly from a month earlier. American cheese holdings were 311 million pounds following a 27 million pound gain during May. Stocks were 33 million pounds below those of a year earlier and 11 million less than average. Shell egg holdings totaled 174 thousand cases on June 1, more than double the stocks on May 1. Frozen egg holdings were up 22 million pounds to 85 million. These supplies were 18 percent under average for June 1 but 2 percent larger than a year earlier. Frozen fruit supplies were lowered in all sections of the country except in the East South Central where gains in frozen strawberry stocks raised total frozen fruit supplies. Total warehouse stocks of frozen fruits, however, were down 15 percent from May 1 and on June 1 totaled 210 million pounds. Frozen vegetables in storage were reduced to 989 million pounds. Total supplies were lowered in all regions of the country but reductions were sharpest in the West North Central. Stocks of all vegetable items were down except asparagus, broccoli, and spinach. The May orange concentrate buildup in Florida carried total June 1 warehouse stocks to 20 percent above last month's level. These supplies were 9 percent below both a year earlier and average. Of the 43 million gallons in storage, 38 million were in South Atlantic warehouses.

Storage occupancy in public warehouses

Cooler occupancy was 55 percent of capacity on June 1, an increase of 1 point from May 1. Occupancy of cooler space was 3 points greater than the 1958-62 average for this time of year and 2 point more than June 1 a year ago. Freezer occupancy was 66 percent of capacity, unchanged from last month. Occupancy of freezer space was 1 point above a year earlier and 2 points more than average.

Cooler and freezer stock changes

Reduction in supplies of fresh apples, pears, fresh vegetables, nuts, pork and canned meats lowered national cooler holdings to 1.7 billion pounds on June 1 -- 9 percent less than a month earlier but 13 percent larger than on June 1, 1963. Average holdings for this time of year are 1.4 billion pounds. Seasonal net withdrawals in stocks of frozen poultry, fruits, vegetables, and veal more than countered May gains in other freezer items. On June 1, total weight in freezers was down to 3.4 billion, about the same as a year earlier but 18 percent larger than average.

Juices, vegetables, and fruits

Warehouse supplies of orange concentrate moved up seasonally during May to 43 million gallons. Although the 7 million gallon gain was 4 million less than average for May, it is in contrast to the 1 million gallon reduction last year. Total warehouse stocks of orange juice were 20 percent larger than the previous month but 9 percent less than a year earlier and average. Except for asparagus, broccoli, and spinach, June 1 frozen vegetable supplies were lower than on May 1. A net reduction of 79 million pounds brought the June 1 inventory down to 989 million pounds. This reduction was 13 percent less than the May 1963 withdrawal but 55 percent greater than average. Total frozen vegetable supplies, however, exceeded the June 1, 1963 inventory by 5 percent and the average by almost 50 percent. Frozen fruit holdings totaled 210 million pounds on June 1 following a 38 million pound decline during May. The reduction was slightly less than last year and more than double the average May reduction. Stocks of all frozen fruit items were reduced during the month and on June 1 total supplies were down 23 percent from a year earlier and 27 percent from average. The sharpest reduction was 9 million pounds of cherries which lowered warehouse stocks to 18 million pounds. Frozen strawberry holdings were down to 57 million pounds.

Poultry and poultry products

Frozen poultry supplies on June 1 were 217 million pounds, 17 percent more than a year earlier and 19 percent above average. The 25 million pound reduction in stocks during May was average for the date and equaled the decrease a year earlier. Turkey stocks were 99 million pounds on June 1 -- a drop of 24 million pounds during May. The inventory was 9 percent above average and 3 percent above June 1 a year earlier but 25 percent below the record June 1, 1962 stocks. Frozen egg supplies totaled 85 million pounds, a gain of 22 million during the month. A year earlier, June 1 stocks were 83 million while the average is 104 million pounds. Shell egg stocks were 174 thousand cases compared with 200 thousand cases on June 1 last year. Average holdings for the date are 604 thousand cases.

Dairy and dairy products

Stocks of butter increased to 203 million pounds on June 1. This was a gain of 8 million during May compared with a 20-million gain a year earlier and the average increase of 30 million. Government owned butter on June 1 totaled 154 million pounds leaving 49 million in commercial channels compared with 45 million a year earlier. Holdings of American cheese on June 1 were 311 million pounds, 10 percent less than a year earlier and 3 percent below average for the date. Stocks increased 27 million pounds during May compared with a 26-million-pound gain a year earlier and the 22-million-pound average May increase.

Meat and meat products

Supplies of meat and meat products increased 10 million pounds during May to 881 million pounds. A year earlier, stocks declined 25 million pounds and the average reduction is 9 million pounds. Stocks were a third larger than on June 1, 1963 and 57 percent more than average. Beef holdings, at 274 million pounds were up 11 million pounds compared with a 2-million pound reduction during May last year. The average change is a decrease of 7 million pounds. Frozen beef holdings were 256 million pounds, were the largest June 1 holdings on record. Stocks of pork were 34 percent above a year earlier and 49 percent above average. Frozen pork holdings were 439 million pounds, an increase of 4 million pounds while cooler pork stocks were 37 million pounds, a decline of 1 million. Supplies of frozen pork bellies on June 1 were 157 million pounds, 40 percent more than a year earlier and 49 percent greater than average.

Table 1. --Net change in storage holdings during May 1/

1/ Space shown includes public warehouses located in the metropolitan area.
 2/ Space reported to USDA and temperatures held on May 31, 1964.
 3/ Insufficient returns received from this city.

REFRIGERATED SPACE 8 PERCENT LARGER THAN IN 1961

Refrigerated warehouses in the United States (excluding Alaska and Hawaii) had a capacity of 1,108 million gross cubic feet as of October 1, 1963, according to a survey made by the United States Crop Reporting Board. Approximately 579 million cubic feet could hold temperatures of 0° F. or below and 529 million cubic feet could hold temperatures of 0° F. to 50° F. Since the October 1, 1961 survey, refrigerated warehouses increased their capacity by 84 million cubic feet -- three-fourths of which was in the range of 0° F. and below.

Refrigerated storage facilities are defined as places artificially cooled to temperatures of 50° F. or below in which food products are generally stored for 30 days or more.

Capacity gains were reported in all geographic regions of the country. A national summary of the 22nd biennial survey is given in the table below. Table 13 gives a more complete report by States and regions.

Table 12. --Gross Refrigerated Warehouse Capacity in the United States
October 1, 1963 1/

Type of warehouse	0° F. or below	Above 0° F. to 50° F.	Total	Percentage change since 1961
	<u>Million cu. ft.</u>	<u>Million cu. ft.</u>	<u>Million cu. ft.</u>	<u>Percent</u>
Public <u>2/</u>	422	208	630	+ 6
Private & Semiprivate <u>2/</u> .	140	287	427	+ 13
Meat Packing.	17	34	51	- 2
U. S. Total <u>3/</u>	579	529	1,108	+ 8

1/ Does not include space owned or leased and operated by the Armed Services.

2/ Includes apple houses.

3/ Does not include 4 million gross cubic feet in Alaska and Hawaii.
