SPECIAL IN THIS ISSUE: Report on tree nuts in storage, by kinds (revised).. 3

[Data for this report are collected from public, private, and semiprivate warehouses, apple houses, and meat-packing plants where food products are generally stored for 30 days or more. Commodities in space owned or leased and operated by the armed services are not reported. All July 31, data are preliminary.]

# PERCENTAGE OCCUPANCY OF PUBLIC COLD-STORAGE WAREHOUSES

END OF MONTH OCCUPANCY

## COLD STORAGE REPORT, AUGUST 1, 1964

### Commodity Summary

Refrigerated warehouse holdings increased slightly during July to 5.1 billion pounds. A net gain of 38 million pounds was the result of a 75-million pound increase in freezer stocks - eggs, poultry, fruits, and vegetables, coupled with a 37-million pound loss in cooler weight - principally apples, vegetables, nuts, and meats. A year earlier, 5.0 billion pounds were in storage; the 1958-62 average is 4.5 billion pounds. Public cooler occupancy remained unchanged but freezer occupancy increased during July. On August 1, cooler rooms were 56 percent filled, the same as a month earlier and last year. Average occupancy for this time of year is 54 percent. Freezer occupancy advanced 2 points during July to 68 percent on August 1, the same level as last year but 2 points under average. Beef stocks on August 1 were a record high with 272 million pounds under refrigeration. These supplies exceeded the previous high on August 1, 1945 by 10 million pounds and compared with 193 million pounds stored this time last year. Total pork supplies of 325 million pounds were 19 percent greater than August 1, 1963 stocks and 43 percent greater than average.

Poultry supplies were 12 million pounds higher than the previous month and on August 1 totaled 224 million pounds. This was 16 percent above last year and 18 percent above average. Turkey holdings of 101 million pounds were slightly smaller than at this time last year and 8 percent above average. Frozen orange juice moved down seasonally to 34 million gallons, following a 5-million gallon reduction during July. Stocks were 2 million gallons under those of August 1 a year ago and 9 million short of average. Frozen vegetables totaled 972 million pounds, down 1 percent from a year earlier but 25 percent above average for August 1. Stocks increased 31 million pounds during July as a result of seasonal gains in holdings of snap beans, cauliflower and peas, which more than countered losses in stocks of other vegetable packs. Frozen fruits stored on August 1 amounted to 477 million pounds after a July increase of 219 million pounds. This increase was twice that of July 1963 and almost double the average gain for the month. Unusual advances occurred in cherry holdings - 95 million pounds and in strawberry stocks - 85 million pounds. August 1 supplies of frozen fruits were 7 percent larger than last year but 2 percent under average. A 5-million pound gain in butter raised supplies to 240 million pounds on August 1. The July increase compared with a 9 million-pound reduction at this time a year ago and an average July gain of 24 million pounds. American cheese stocks moved up to 359 million pounds, 36 million more than on August 1, 1963 and 16 million less than average.

### Cooler and freezer stock changes

Product weight in cooler rooms in all refrigerated warehouses totaled 1.6 billion pounds on August 1, down slightly from a month earlier. During July, gains in stocks of fresh fruits, other than apples, dried and evaporated fruits, cheese and condensed and evaporated milk were more than offset by the losses of other cooler-stored items. This resulted in a 37-million pound reduction. On August 1, 1963, cooler products totaled 1.5 billion pounds. The average for this time of year is 1.4 billion pounds. Freezer weight in storage moved up seasonally and on August 1 amounted to 3.5 billion pounds, the same as a year earlier, but 11 percent more than average. Weights for butter, eggs, poultry, fruits, and vegetables increased during July but holdings of cream, juices and meats declined.

### Storage occupancy in public warehouses

Occupancy of freezer space in public refrigerated warehouses gained 2 percentage points during July, but cooler occupancy remained unchanged. On August 1, freezer occupancy was 68 percent of capacity, the same as a year earlier, but 2 points below the 1958-62 average for the date. Cooler occupancy was 56 percent, also the same level as August 1 last year and 2 points above average.

### Poultry and poultry products

Frozen poultry supplies on August 1 were 224 million pounds, 16 percent greater than a year earlier and 18 percent above average. Stocks of frozen poultry increased 12 million pounds during July compared with a gain of 16 million pounds during July 1963 and 9 million, the average. Turkey holdings were 101 million pounds -- a gain of 12 million during July. The August 1 inventory was 1 percent below that date last year but 8 percent above average. Supplies of frozen eggs on August 1 were 114 million pounds -- a gain of 8 million pounds from July 1. On August 1 last year stocks were 108 million pounds and the average for this time of year is 139 million. Stocks of shell eggs were 185 thousand cases, 22 percent less than a year earlier and the smallest August 1 stocks on record. The average for the date is 657 thousand cases.

### Meat and meat products

Supplies of meat and meat products declined 111 million pounds during July to 722 million on August 1. A year earlier stocks declined 44 million and the average reduction is 57 million pounds. Stocks were one-fourth larger than on August 1 a year ago and were 58 percent greater than average. Beef holdings were 272 million pounds, a record for the date. Stocks declined 15 million pounds during July compared with a 3-million pound increase in July last year and the average July gain of 1 million. Frozen beef holdings were 257 million pounds. This inventory was about one-half million pounds greater than on August 1, 1945, the previous record for the date. Stocks of all pork were 19 percent above a year earlier and 43 percent more than average. Frozen pork holdings were 291 million pounds, a decrease of 86 million pounds during July, while cooler pork stocks were 34 million pounds, a reduction of 2 million during the month. Supplies of frozen pork bellies on August 1 were 86 million pounds, 31 percent more than on August 1, 1963 and the largest holdings of record for the date.

### Dairy and dairy products

Stocks of butter in storage on August 1 were 240 million pounds, 39 percent below a year earlier and 3 percent below average for August 1. Stocks increased 5 million pounds during July compared with a decrease of 9 million during July 1963. The average July gain is 24 million. Government-owned butter on August 1 was 108 million pounds, leaving 52 million in commercial channels, the same as a year earlier. Holdings of American cheese increased to 359 million pounds on August 1, a gain of 20 million during July. This increase compared with a 21-million pound gain a year earlier and the average increase of 18 million. Holdings were 9 percent less than at this time last year and 4 percent below the 5-year average.

### Juices, fruits, and vegetables

Supplies of frozen orange concentrate were reduced 5 million gallons during July to 34 million gallons on August 1. Supplies were 6 percent under stocks of August 1, 1963 and 21 percent below average. The July disappearance was average for the date but 1 million less than a year ago. Frozen fruit holdings advanced more rapidly than usual during July as a result of heavy receipts of frozen cherries, strawberries, and raspberries. The gain of 219 million pounds brought August 1 holdings up to 478 million. Frozen cherry stocks totaled 107 million pounds; strawberries, 212 million; and raspberries, 37 million. August 1 stocks of frozen vegetables totaled 972 million pounds, 31 million more than a month earlier. The July gain compared with a 27-million pound increase during July last year and the average of 93 million. Total supplies were 1 percent less than on August 1 a year ago and one-fourth larger than average.

(1) Includes fish in Alaska.

Table 10. --Commodities stored in public general cold storage warehouses, June 30, 1964

Cooler commodities	Net weight	Freezer commodities	Net weight
	<u>1,000 pounds</u>		<u>1,000 pounds</u>
Apples . . . . .	5,856	Cream . . . . .	13,753
Pears . . . . .	580	Butter, creamery . . . . .	223,595
Other fresh fruits . . . . .	4,423	Eggs . . . . .	92,040
Fresh vegetables . . . . .	19,828	Poultry . . . . .	181,860
Dried & evap. fruits . . . . .	38,632	Fruits . . . . .	179,178
Nutmeats . . . . .	197,674	Juices . . . . .	203,581
Nuts in shell . . . . .	150,122	Vegetables . . . . .	591,201
Other dairy products . . . . .	6,248	Beef . . . . .	248,912
Cheese . . . . .	190,326	Pork . . . . .	300,360
Shell eggs . . . . .	8,564	Other meats . . . . .	27,000
Beef . . . . .	480	Fish . . . . .	136,946
Pork . . . . .	732	Miscellaneous . . . . .	199,343
Canned meats . . . . .	54,376		
Fish . . . . .	10,055		
Miscellaneous . . . . .	327,051		
Total . . . . .	1,014,947	Total . . . . .	2,397,769

Table 11. --End-of-month stocks of certain commodities in storage owned by the Government 1/

Commodity	Unit	July 1958-62 average	July 1963	June 1964	July 1964 <u>2/</u>
		<u>Thou.</u>	<u>Thou.</u>	<u>Thou.</u>	<u>Thou.</u>
Butter, creamery <u>3/</u> . . . . .	lb.	176,135	340,165	181,263	187,702
American Cheddar cheese . . . . .	lb.	47,587	42,640	20,266	24,460
Pork . . . . .	lb.	2,706	1,964	1,547	1,334
Beef . . . . .	lb.	2,277	3,192	12,914	21,913

1/ Government holdings are included in the tables of total holdings elsewhere in the report and consist of reported stocks held by USDA, the Armed Services, and other Government agencies. In addition to stocks reported above, Armed Services hold some stocks in space owned and operated by them on which figures are not available. 2/ Based on actual reports. Estimates on late reports are not included. Current figures will be revised next month. 3/ Does not include butter oil, ghee, and canned butter.
