PERCENTAGE OCCUPANCY OF PUBLIC COLD-STORAGE WAREHOUSES

END OF MONTH OCCUPANCY.

COLD STORAGE REPORT, JULY 1, 1965

Commodity Summary

Mid-year supplies in cold storage warehouses totaled 4.7 billion pounds compared with 5 billion on July 1, 1964. Cooler-held products were 1.5 billion and freezer stocks 3.2 billion pounds. Total weight in storage was the smallest since 1961.

July 1 occupancy of public cooler space was 54 percent of capacity, unchanged from a month earlier but freezer occupancy dropped 1 point to 60 percent. Occupancy of cooler space was less than at this time last year but above the 1959-63 average. However, freezer use was not only below last year and average but also the lowest on record for July 1.

Supplies of frozen orange concentrate were reduced by 5 million gallons during June to 59 million gallons on July 1. For the date, supplies were half again as large as last year and 16 percent larger than average. Frozen strawberries moved into storage during June and helped to raise total frozen fruit supplies to 366 million pounds, 39 million more than on June 1. These supplies were 41 percent larger than July 1, 1964 and 4 percent above average.

Frozen vegetables in storage on July 1 were 811 million pounds, 14 percent less than a year earlier but 6 percent more than average. Gains in stocks of asparagus, peas, and spinach were more than offset by net withdrawals in the other vegetable packs. The June net reduction was 25 million compared with 57 million last year and the average June reduction of 18 million pounds.

Government-owned butter increased during June to 157 million pounds which is three-fourths of the total inventory of 207 million stored on July 1. Butter holdings were less than at this time last year and average. American cheese holdings were 334 million pounds after a June net gain of 34 million pounds. This gain was 4 million more than a year earlier but 3 million under average.

July 1 inventory of shell eggs totaled 536 thousand cases, more than twice that on July 1, 1964. Frozen egg holdings were up 18 million pounds to 85 million. Supplies were down 20 percent from a year ago and down 33 percent from average.

Frozen poultry stocks were 157 million pounds compared with 211 million on July 1, 1964. The June net decline of 19 million pounds was principally frozen turkeys, reduced 14 million to 68 million pounds on July 1.

Inventories of beef, pork, and other meats decreased 113 million pounds during June to 496 million pounds on July 1. Pork holdings were down to 228 million pounds after a 64 million decline. A drop of 32 million pounds lowered beef supplies to 173 million. Veal, lamb and mutton, and canned meats, totaled 96 million pounds, 17 million less than on June 1. The July 1 inventory of all meat was down 40 percent from last year and 12 percent from average.

Cooler and Freezer Stock Changes

July 1 stocks in cooler rooms totaled 1.5 billion pounds, down 135 million from a month earlier. June gains in stocks of dried and evaporated fruits, cheese, milk, and eggs were more than offset by declines in stocks of fresh fruits, vegetables, nuts, and meats. Cooler-held stocks were down 3 percent from a year earlier but were 8 percent more than average for July 1.

Products in freezer storage were 3.2 billion pounds on July 1, about the same as on June 1 but 6 percent less than a year earlier. Average stocks are 3.2 billion pounds for this time of year. Holdings of cream, butter, eggs, and fruits increased seasonally during June, but reductions in poultry, vegetables, juices, and meats offset these gains.

Storage Occupancy in Public Warehouses

July 1 occupancy of public cooler space was 54 percent of capacity, the same as a month earlier but 2 points less than on this date last year. Occupancy in the East and West North Central Regions increased during June but these gains were countered by losses in other areas.

Public freezer space was 60 percent filled on July 1, down 1 point from June 1 and off 6 points from a year earlier. Average freezer occupancy at mid-year is 68 percent. Regional changes in occupancy during June were mixed, varying from a 7-point decline in the Mountain States to a 2-point gain in the West North Central and East South Central.

Dairy Products

Butter in storage on July 1 was 207 million pounds, 12 percent below a year earlier and 23 percent below average. Holdings increased 41 million pounds during June, average for the month. Government-owned butter accounted for 157 million pounds of the total holdings. On July 1, American cheese stocks were 334 million pounds compared with 339 million a year earlier and 368 million, the average.

Poultry and Poultry Products

Frozen poultry supplies on July 1 were 157 million pounds, 19 million less than a month earlier. Holdings were 26 percent below a year earlier and 17 percent under average. Turkey stocks were 68 million pounds, down 14 million pounds from June 1 and 22 million pounds below average.

Shell egg holdings were 536 thousand cases, up 215 thousand during June. A year earlier, stocks were 201 thousand cases; the average July 1 inventory is 640 thousand cases. Frozen egg supplies increased 18 million pounds during June to 85 million on July 1. Stocks were one-fifth less than a year earlier and a third below average.

Meat Products

Meat in storage decreased 113 million pounds during June leaving 496 million on July 1. Holdings were 12 percent less than average and 40 percent below a year earlier. Supplies of beef were 173 million pounds compared with 287 million pounds at this time last year and the average of 156 million pounds. Frozen pork supplies totaled 200 million pounds, 47 percent less than July 1 a year earlier and 23 percent under average. Pork in coolers totaled 27 million pounds, 8 million pounds less than on July 1 a year ago and 16 million pounds below average.

Fruits, Juices, and Vegetables

July 1 supplies of frozen fruits were 366 million pounds compared with 260 million a year earlier and the average of 350 million. Holdings of frozen fruits increased 39 million pounds during June -- 11 million less than the gain a year earlier and 32 million less than average.

Frozen orange concentrate holdings totaled 59 million gallons, a decline of 5 million gallons from June 1. During June last year, supplies were reduced 3 million gallons but the average change is an increase of 1 million-gallons. July 1 stocks were 51 percent above a year earlier and 16 percent above average.

Stocks of frozen vegetables on July 1 were 811 million pounds compared with 941 million a year earlier and 762 million, the average. Holdings of frozen vegetables declined 25 million pounds during June. A year earlier the net reduction was 57 million but the average change is an 18-million pound increase.
