## COLD STORAGE REPORT, AUGUST 1, 1967

### Commodity Summary

Warehouse stocks of dairy products, frozen fruits, and vegetables increased during July while total meats except poultry decreased, according to the Crop Reporting Board.

The August 1 inventory of creamery butter totaled 225 million pounds, 33 million more than a month earlier and more than double holdings of a year earlier. The 1961-65 average for August 1 is 315 million pounds. Stocks of American cheese increased 15 million pounds during July and totaled 404 million on August 1.

Holdings of frozen eggs increased during July but stocks of shell eggs decreased. There were 92 million pounds of frozen eggs in storage on August 1 compared with 62 million a year earlier and the average of 111 million. A decrease of 58 thousand cases of shell eggs lowered the inventory to 369 thousand on August 1. Year-earlier holdings were 79 thousand cases and average is 320 thousand.

August 1 frozen fruit inventories totaled 498 million pounds--5 percent less than year-earlier stocks but 2 percent more than average. Holdings of frozen vegetables of 1,247 million pounds were 204 million above the August 1, 1966 inventory and 306 million above average.

Stocks of frozen orange concentrate decreased 5 million gallons during July and totaled 82 million on August 1, about 34 million more than a year earlier. Average August 1 holdings are 46 million gallons.

Total beef in storage on August 1 of 266 million pounds was 10 million less than on July 1 but 46 million pounds above a year-earlier. Total pork inventories declined 58 million pounds during July to 235 million on August 1, about 56 million more than a year earlier but 4 million less than average.

### Space Occupancy in Public Warehouses

Utilization of cooler space increased 1 point during July and freezer space 3 points. Occupancy of cooler rooms at 60 percent on August 1 was 9 points above a year earlier and 3 points above average. Higher occupancy in the Mid-Atlantic, East and West North Central, and South Atlantic more than offset decreases during July in other regions.

Utilization of freezer space decreased in the South Atlantic region but increased in all other regions. Occupancy at 74 percent on August 1 was 3 points above July 1 and 12 points above August 1, 1966. Average occupancy for August 1 is 69 percent.

### Cooler and Freezer Stock Changes

August 1 stocks in cooler rooms totaled 1.5 billion pounds, 100 million pounds less than on July 1. Stocks of most commodities were lower except for canned meats, cheese, "other dairy products," and "other fresh fruits."

Freezer-held commodities increased 136 million pounds during July to 4.5 billion on August 1. Larger stocks of butter, eggs, poultry, fruits and vegetables and "miscellaneous freezer commodities" more than offset lower holdings of other commodities. Total weight of freezer-held commodities was 29 percent higher than a year earlier.

### Juices, Fruits, and Vegetables

August 1 stocks of frozen orange concentrate were 82 million gallons compared with 48 million a year earlier and the average of 46 million gallons. The July disappearance of 5 million gallons was one million less than in 1966 but average for the month.

Frozen fruit holdings on August 1 totaled 498 million pounds after a 115-million-pound July gain. Increases were primarily in cherries, red raspberries, and strawberries. August 1 stocks were 5 percent below year earlier holdings but 2 percent above average.

Frozen vegetables in storage on August 1 were 34 million pounds larger than a month earlier. The 1,247 million pounds on hand August 1 compared with 1,043 million last year and the average of 941 million pounds. During July, stocks of frozen peas increased 149 million pounds to 327 million. Also increasing were stocks of snap beans, cauliflower, and peas and carrots, mixed. Partially offsetting was a 100-million pound decline in french fry holdings and smaller declines in other frozen vegetable packs.

#### Dairy Products

Cream in storage on August 1 totaled 17 million pounds, one-million pounds less than on July 1 and 2 million short of the August 1, 1966 stocks. Average holdings for the date are 16 million pounds. Bulk condensed milk stocks rose slightly to 1.8 million pounds and a 2-million pound gain in case goods of evaporated milk raised warehouse stocks to 16 million pounds. These stocks were below those of a year earlier and average.

Butter in storage amounted to 225 million pounds after a July increase of 33 million pounds. August 1 holdings were more than twice the stocks of a year earlier but 29 percent below average for the date. Government-owned butter advanced from 147 million pounds on July 1 to 179 million on August 1.

American cheese stocks were up to 404 million pounds on August 1 compared with 389 million a month earlier. The 15-million pound July gain was 5 million pounds less than in 1966 and 7 million less than average. Holdings, however, were 19 percent above year earlier stocks and slightly above average.

#### Meat and Meat Products

August 1 holdings of meat were 600 million pounds, down 64 million from a month earlier. With the exception of canned hams, which increased 6 million to 56 million pounds and a small gain in cured beef, stocks of all meat items were lower than on July 1.

Total beef declined 10 million pounds to 266 million and total pork was down to 235 million pounds after a July decrease of 58 million. August 1 stocks of veal were 11 million pounds, one million less than the previous month. Lamb and mutton declined 2 million to 13 million pounds.

Total stocks of meat were about 100 million more than on August 1, 1966 and 73 million more than average.

#### Poultry and Poultry Products

Frozen poultry stocks on August 1 were 371 million pounds, 63 million more than a month earlier. On August 1, 1966, stocks totaled 209 million pounds and the average is 210 million pounds. About 60 percent of the poultry in storage was frozen turkeys. Stocks totaled 220 million pounds, up 60 million from a month earlier. August 1, 1966 turkey stocks were 104 million pounds and the average is 109 million.

August 1 shell egg holdings were 369 thousand cases after a 58-thousand case decline in July. Holdings were almost 5 times as large as on August 1, 1966 but 15 percent above average. Frozen egg stocks increased 8 million pounds to 92 million. These stocks were 50 percent above year earlier holdings but 17 percent below average.
