Released September 23, 1991, by the Agricultural Statistics Board. Estimates refer to August 31, 1991.

PORK BELLY STOCKS ABOVE YEAR EARLIER LEVEL

Frozen food stocks in refrigerated warehouses on August 31, 1991, were greater than the year earlier levels for butter, potatoes, chicken, pork, beef, vegetables, turkey, and juice concentrates. Cooler items with stocks above those of the previous year include fresh vegetables, evaporated and condensed milk, and natural cheese.

Total red meat supplies in freezers declined 5 percent from July but were 10 percent more than those on hand August 1990. Frozen pork stocks dropped 4 percent during the month but were 19 percent above the previous year. Stocks of pork bellies were down 35 percent from last month but were 28 percent above 1990. This is the first time since September 1989 that pork belly stocks were above the level of a year earlier.

Total frozen poultry supplies increased 5 percent from last month and were 9 percent above last year. Total stocks of chicken declined 1 percent during the month but were 19 percent above 1990. Total pounds of turkey in freezers were up 8 percent from last month and up 4 percent from last year.

Public cooler occupancy was at 47 percent of capacity, 4 points below last month. Public freezer occupancy at 73 percent was 4 points above last month and last year.

Table of contents is located on page 2. For information, call John Lange (202) 382-9185. Office hours are 8:00 a.m. to 4:30 p.m. ET.

COLD STORAGE REGIONS

Survey Procedures and Reliability of Estimates

Survey procedures: Questionnaires are mailed about the 24th of each month to all operators on our list of approximately 1,650 public and private cold storage warehouses. In addition, apple data is obtained from special surveys and other sources (State Departments of Agriculture, American Apple Institute, etc.). All survey data represent stocks as of the end of the month.

Data are collected from warehouses artificially cooled to a temperature of 50 degrees Fahrenheit or lower, and whose food products are normally stored for 30 days or more. All food items in these facilities are reported regardless of the number of days stored at the time of the report. Also included are specialized storage facilities meeting the 30 day requirement, such as fruit houses, dairy manufacturing plants, frozen fruit, fruit juice, and vegetable processors, and poultry and meat packing plants. Excluded are stocks in space maintained by wholesalers, jobbers, distributors, chain stores, locker plants containing individual lockers, meat packer branch houses, and frozen food processors whose entire inventories are turned over more than once a month.

Estimating procedures: Data for reporting firms are added to estimates for non-reporting firms to obtain regional and National totals. Estimates for non-reporting firms are set by multiplying the previous month's figure by a percent change from the previous month. The percent change is calculated for each item from totals of the current and previous month summed from firms that reported both months.

Revision policy: Data is revised the following month based on late reports or corrected data. Final figures are published in the annual summary in February of the following year.

Reliability: Reports are received from 900 firms each month which represent about 70 percent of the total capacity. Firms that are not on the list or firms who have never reported are not represented in the data. Monthly data can vary due to different firms reporting month to month. Survey data are also subject to non-sampling errors such as omissions and mistakes in reporting and in processing the data. While these errors cannot be measured directly, they are minimized by carefully reviewing all reported data for consistency and reasonableness.
