Total red meat supplies in freezers increased 2 percent from October and were 21 percent more than those on hand November 1990. Frozen pork stocks rose 3 percent during the month and were 39 percent above the previous year. Stocks of pork bellies were up 89 percent from last month and were 101 percent above 1990.

Total frozen poultry supplies decreased 35 percent from October but were 8 percent above last year. Total stocks of chicken advanced 2 percent during the month and were 32 percent above 1990. Total pounds of turkey in freezers were down 53 percent from last month and down 9 percent from last year.

Public cooler occupancy was at 55 percent of capacity, 3 points above both last month and last year. Public freezer occupancy at 76 percent was the same as last month but 3 points above last year.

Survey procedures: Questionnaires are mailed about the 24th of each month to all operators on our list of approximately 1,650 public and private cold storage warehouses. In addition, apple data is obtained from special surveys and other sources (State Departments of Agriculture, American Apple Institute, etc.). All survey data represent stocks as of the end of the month.

Data are collected from warehouses artificially cooled to a temperature of 50 degrees Fahrenheit or lower, and whose food products are normally stored for 30 days or more. All food items in these facilities are reported regardless of the number of days stored at the time of the report. Also included are specialized storage facilities meeting the 30 day requirement, such as fruit houses, dairy manufacturing plants, frozen fruit, fruit juice, and vegetable processors, and poultry and meat packing plants. Excluded are stocks in space maintained by wholesalers, jobbers, distributors, chain stores, locker plants containing individual lockers, meat packer branch houses, and frozen food processors whose entire inventories are turned over more than once a month.

Estimating procedures: Data for reporting firms are added to estimates for non-reporting firms to obtain regional and National totals. Estimates for non-reporting firms are set by multiplying the previous month's figure by a percent change from the previous month. The percent change is calculated for each item from totals of the current and previous month summed from firms that reported both months.

Revision policy: Data is revised the following month based on late reports or corrected data. Final figures are published in the annual summary in February of the following year.

Reliability: Reports are received from 900 firms each month which represent about 70 percent of the total capacity. Firms that are not on the list or firms who have never reported are not represented in the data. Monthly data can vary due to different firms reporting month to month. Survey data are also subject to non-sampling errors such as omissions and mistakes in reporting and in processing the data. While these errors cannot be measured directly, they are minimized by carefully reviewing all reported data for consistency and reasonableness.

The next "Cold Storage" report will be released at 3:00 p.m. ET on January 22, 1992.
