

Cold Storage

National
Agricultural
Statistics
Service

United States
Department of
Agriculture

Washington, D.C.

Released October 21, 1994, by the Agricultural Statistics Board. Estimates refer to September 30, 1994.

Frozen food stocks in refrigerated warehouses on September 30, 1994, were greater than year earlier levels for chicken, eggs, concentrated fruit juices, vegetables, meat, potatoes, and fruit. Cooler items with stocks above those of the previous year included pecans and fresh fruit.

Total red meat supplies in freezers increased 1 percent from August and were 16 percent more than those on hand September 1993. Frozen pork stocks decreased 3 percent during the month but were 13 percent above the previous year. Stocks of pork bellies were down 41 percent from last month but were 66 percent above last year's level.

Total frozen poultry supplies increased 3 percent from last month and were 2 percent above last year. Total stocks of chicken increased 2 percent during the month and were 25 percent above 1993. Total pounds of turkey in freezers were up 4 percent from last month but were down 9 percent from last year.

Public cooler occupancy was at 53 percent of capacity, 3 points below a year ago. Public freezer occupancy at 68 percent was up 1 point from last month and up 2 points from last year.

The index is located on page 17. For information call John Lange at (202) 720-0585. Office hours are 8:00 a.m. to 4:30 p.m. ET.

Survey Procedures: Questionnaires are mailed about the 24th of each month to all operators on the list of approximately 1,650 public and private cold storage warehouses. In addition, apple data are obtained from special surveys and other sources (State Departments of Agriculture, American Apple Institute, etc.). All survey data represent stocks as of the end of the month.

Data are collected from warehouses artificially cooled to a temperature of 50 degrees Fahrenheit or lower, and whose food products are normally stored for 30 days or more. All food items in these facilities are reported regardless of the number of days stored at the time of the report. Also included are specialized storage facilities meeting the 30 day requirement, such as fruit houses, dairy manufacturing plants, frozen fruit, fruit juice, and vegetable processors, and poultry and meat packing plants. Excluded are stocks in space maintained by wholesalers, jobbers, distributors, chain stores, locker plants containing individual lockers, meat packer branch houses, and frozen food processors whose entire inventories are turned over more than once a month.

Estimating Procedures: Data for reporting firms are added to estimates for non-reporting firms to obtain regional and National totals. Estimates for non-reporting firms are obtained by multiplying the previous month's figure by a percent change from the previous month. The percent change is calculated for each item from totals of the current and previous month summed from firms that reported both months.

Revision Policy: Data are revised the following month based on late reports or corrected data. Final figures are published in the annual summary in February of the following year.

Reliability: Reports are received from 900 firms each month which represent about 70 percent of the total capacity. Firms that are not on the list or firms who have never reported are not represented in the data. Monthly data can vary due to different firms reporting month to month. Survey data are also subject to non-sampling errors such as omissions and mistakes in reporting and in processing the data. While these errors cannot be measured directly, they are minimized by carefully reviewing all reported data for consistency and reasonableness.
