## **Stocks of Pork, Chicken and Vegetables All Set Record June Highs**

**Frozen food stocks** in refrigerated warehouses on June 30, 1999, were greater than year earlier levels for butter, chicken, pork, vegetables, and fruit. This was the seventh month in a row that pork exceeded the 500 million pound mark and also a high for the respective month. The previous record June high total pork stocks was 461 million pounds set in 1952. Likewise, June 1999 stocks of chicken, at 842 million pounds, also broke the previous record June high of 712 million pounds set in 1997. Vegetables also set a new June record high. Cooler stocks of peanuts and apples were each higher than a year earlier.

**Total red meat supplies** in freezers were down 7 percent from May 1999, but were 10 percent above June 1998. Frozen pork stocks were 8 percent below last month, but were up 26 percent from last year. Stocks of pork bellies decreased 14 percent from last month, but were 80 percent above a year ago.

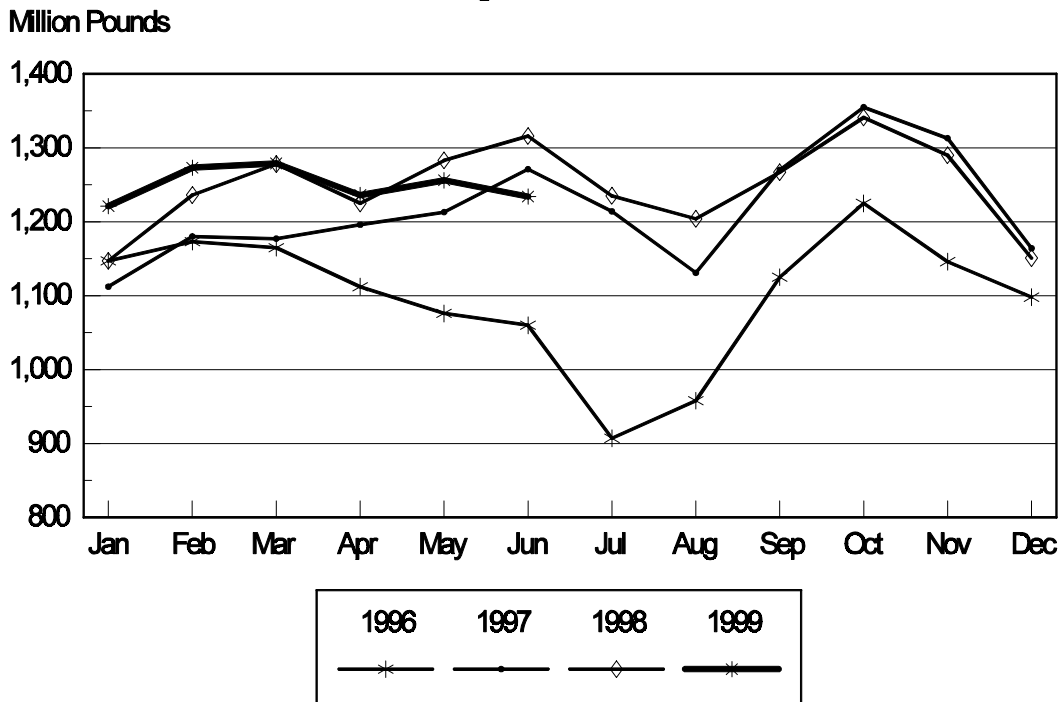

**Total frozen poultry supplies** were up 7 percent from last month and 10 percent above last year's level. Total stocks of chicken were up 3 percent from last month and were 38 percent above June 1998. Total pounds of turkey in freezers increased 12 percent from last month, but were 15 percent below last year.

**Public cooler occupancy** at 56 percent of capacity and public freezer occupancy at 62 percent were each 2 percentage points below last year.

## Cold Storage Regions

**Survey Procedures:** Questionnaires are mailed about the 24th of each month to all operators on the list of approximately 1,400 public and private cold storage warehouses. In addition, apple data are obtained from special surveys and other sources (State Departments of Agriculture, U.S. Apple Association, etc.). All survey data represent stocks as of the end of the month.

Data are collected from warehouses artificially cooled to a temperature of 50 degrees Fahrenheit or lower, and whose food products are normally stored for 30 days or more. All food items in these facilities are reported regardless of the number of days stored at the time of the report. Also included are specialized storage facilities meeting the 30 day requirement, such as fruit houses, dairy manufacturing plants, frozen fruit, fruit juice, and vegetable processors, and poultry and meat packing plants. Excluded are stocks in space maintained by wholesalers, jobbers, distributors, chain stores, locker plants containing individual lockers, meat packer branch houses, and frozen food processors whose entire inventories are turned over more than once a month.

**Estimating Procedures:** Data for reporting firms are added to estimates for non-reporting firms to obtain regional and National totals. Estimates for non-reporting firms are obtained by multiplying the previous month's figure by a percent change from the previous month. The percent change is calculated for each item from totals of the current and previous month summed from firms that reported both months.

**Revision Policy:** Data are revised the following month based on late reports or corrected data. Final figures are published in the annual summary in February of the following year.

**Reliability:** Reports are received from 900 firms each month which represent about 70 percent of the total capacity. Firms that are not on the list or firms who have never reported are not represented in the data. Monthly data can vary due to different firms reporting month to month. Survey data are also subject to non-sampling errors such as omissions and mistakes in reporting and in processing the data. While these errors cannot be measured directly, they are minimized by carefully reviewing all reported data for consistency and reasonableness.

The next "Cold Storage" report will be released at 3 p.m. ET on August 20, 1999.
