Cold Storage

Released December 21, 2006, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on *Cold Storage* call David Colwell at (202) 720-8784, office hours 7:30 a.m. to 4:00 p.m. ET.

Highlights

Frozen food stocks in refrigerated warehouses on November 30, 2006 were greater than year earlier levels for butter, beef, cheese, and pork.

Butter stocks were down 36 percent from last month, but up 47 percent from a year ago.

Total red meat supplies in freezers were up 2 percent from last month and up 11 percent from the previous year. Frozen pork supplies were down 1 percent from last month, but up 6 percent from last year. Stocks of pork bellies were up 96 percent from last month and up 8 percent from last year.

Total frozen poultry supplies on November 30, 2006 were down 20 percent from the previous month and down 16 percent from a year ago. Total stocks of chicken were down 4 percent from the previous month and down 21 percent from last year. Total pounds of turkey in freezers were down 48 percent from last month, but up 7 percent from November 30, 2005.

Special Note

Mandatory reporting for dairy products in cold storage has improved the reporting on the Cold Storage Survey. As a result, additional data for some commodities have been collected that were not previously reported on the survey. In order to maintain the month-to-month and year-to-year comparisons, estimates have been adjusted to exclude the newly acquired data in the summary tables. The September estimates have been revised accordingly for selected commodities. NASS will provide data for these commodities in a new table found on the contents page. This table will be updated monthly until the end of the calendar year. All commodities for 2006 will be further revised, if necessary, in the annual *Cold Storage* report issued in February 2007.

This page is intentionally blank.

¹ Higher cold storage levels are due to mandatory reporting. Estimates are not comparable with 2005 monthly figures due to this increase. For the months of January through August, revisions for these selected commodities will be published in the February annual publication. All estimates are subject to revision in the annual publication.

² Items not listed here are not affected by increased reporting.

Cold Storage Regions

Reliability of Cold Storage Estimates

Survey Procedures: Questionnaires are mailed about the 24th of each month to all operators on the list of approximately 1,400 public and private cold storage warehouses. In addition, apple data are obtained from special surveys and other sources (State Departments of Agriculture, U.S. Apple Association, etc.). All survey data represent stocks as of the end of the month.

Data are collected from warehouses artificially cooled to a temperature of 50 degrees Fahrenheit or lower, and whose food products are normally stored for 30 days or more. All food items in these facilities are reported regardless of the number of days stored at the time of the report. Also included are specialized storage facilities meeting the 30 day requirement, such as fruit houses, dairy manufacturing plants, frozen fruit, fruit juice, and vegetable processors, and poultry and meat packing plants. Excluded are stocks in space maintained by wholesalers, jobbers, distributors, chain stores, locker plants containing individual lockers, meat packer branch houses, and frozen food processors whose entire inventories are turned over more than once a month.

Estimating Procedures: Data for reporting firms are added to estimates for non-reporting firms to obtain regional and National totals. Estimates for non-reporting firms are obtained by multiplying the previous month's figure by a percent change from the previous month. The percent change is calculated for each item from totals of the current and previous month summed from firms that reported both months.

Revision Policy: Data are revised the following month based on late reports or corrected data. Final figures are published in the annual summary in February of the following year.

Reliability: Reports are received from 900 firms each month which represent about 70 percent of the total capacity. Firms that are not on the list or firms who have never reported are not represented in the data. Monthly data can vary due to different firms reporting month to month. Survey data are also subject to non-sampling errors such as omissions and mistakes in reporting and in processing the data. While these errors cannot be measured directly, they are minimized by carefully reviewing all reported data for consistency and reasonableness.
