Cold Storage

Released February 22, 2007, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on *Cold Storage* call David Colwell at (202) 720-8784, office hours 7:30 a.m. to 4:00 p.m. ET.

Highlights

Frozen food stocks in refrigerated warehouses on January 31, 2007 were greater than year earlier levels for butter and cheese.

Butter stocks were up 43 percent from last month and up 24 percent from a year ago.

Total red meat supplies in freezers were up 3 percent from last month, but down 4 percent from the previous year. Frozen pork supplies were up 10 percent from last month, but down 8 percent from last year. Stocks of pork bellies were up 11 percent from last month, but down 15 percent from last year.

Total frozen poultry supplies on January 31, 2007 were up 3 percent from the previous month, but down 16 percent from a year ago. Total stocks of chicken were down 8 percent from the previous month and down 25 percent from last year. Total pounds of turkey in freezers were up 39 percent from last month and up 17 percent from January 31, 2007.

Special Note

As a result of updated plant information, pork belly inventories for 2005 and the first half of 2006 have been revised and are published in the *Cold Storage 2006 Annual Summary* released February 22, 2007. In addition to the pork belly changes, revisions for dairy products, beef, pork, lamb and mutton are also included in the annual summary as a result of increased coverage of cold storage facilities in 2006.

Beginning with this issue, NASS has made the following changes to the *Cold Storage* monthly report:

- Discontinued published estimates on other shelled nuts, total other shelled nuts, other in-shell nuts, total in-shell nuts, canned hams, other canned meat, miscellaneous cooler and freezer items.
- Discontinued regional published estimates on ducks, pork ribs, pork trimmings and other pork.
- Added regional publication of the different chicken categories with region combinations specified in footnotes.
- Combined published nut regions specified in footnotes.
- Combined published veal, lamb and mutton regions specified in footnotes.

Cold Storage Regions

Reliability of Cold Storage Estimates

Survey Procedures: Questionnaires are mailed about the 24th of each month to all operators on the list of approximately 1,400 public and private cold storage warehouses. In addition, apple data are obtained from special surveys and other sources (State Departments of Agriculture, U.S. Apple Association, etc.). All survey data represent stocks as of the end of the month.

Data are collected from warehouses artificially cooled to a temperature of 50 degrees Fahrenheit or lower, and whose food products are normally stored for 30 days or more. All food items in these facilities are reported regardless of the number of days stored at the time of the report. Also included are specialized storage facilities meeting the 30 day requirement, such as fruit houses, dairy manufacturing plants, frozen fruit, fruit juice, and vegetable processors, and poultry and meat packing plants. Excluded are stocks in space maintained by wholesalers, jobbers, distributors, chain stores, locker plants containing individual lockers, meat packer branch houses, and frozen food processors whose entire inventories are turned over more than once a month.

Estimating Procedures: Data for reporting firms are added to estimates for non-reporting firms to obtain regional and National totals. Estimates for non-reporting firms are obtained by multiplying the previous month's figure by a percent change from the previous month. The percent change is calculated for each item from totals of the current and previous month summed from firms that reported both months.

Revision Policy: Data are revised the following month based on late reports or corrected data. Final figures are published in the annual summary in February of the following year.

Reliability: Reports are received from 900 firms each month which represent about 70 percent of the total capacity. Firms that are not on the list or firms who have never reported are not represented in the data. Monthly data can vary due to different firms reporting month to month. Survey data are also subject to non-sampling errors such as omissions and mistakes in reporting and in processing the data. While these errors cannot be measured directly, they are minimized by carefully reviewing all reported data for consistency and reasonableness.
