CROP VALUES

Season Average Prices and Value of Production, by States, 1976, 1977 and 1978

Estimated season average prices and value of production for all major farm crops and for many minor crops are presented in this report. The season average prices are estimates of the average prices received by producers for that part of the crop that is or will be sold during the marketing year. The 1977 and 1978 season average price estimates are based on entire month price averages through November for wheat, corn for grain, sorghum for grain, oats, barley, soybeans, rice and potatoes, with an allowance for marketings for the remainder of the season. Upland cotton season average prices are based on monthly averages for the marketing year to January 1. For 1976 and other commodities for which monthly price estimates are prepared, season average price estimates are based on mid-month price levels through December with an allowance for marketings expected during the remainder of the marketing year. Citrus fruit prices are season averages of entire month prices for the season ending in the calendar year in the heading. For most other crops the season average price is based on special survey data. Season average prices include an allowance for unredeemed CCC loans and purchase agreement deliveries valued at average loan rate, by States, for crops under these programs. These prices are applied to production estimates to compute value of production for each State. The United States value of production is the sum of the State values.

U.S. average prices are obtained by weighting State prices by estimated State sales for each crop year. These averages may differ from the averages computed by dividing value of production by the quantity produced. The value of production estimates in this report relate to the crop year and should not be confused with cash receipts which relate to sales during a calendar year, irrespective of the year of production. All estimates for the 1978 crop are preliminary.

1/ SUFFICIENT SALES DATA WERE AVAILABLE TO ESTIMATE A SEASON AVERAGE PRICE FOR MOST OF THE STATES 1978 PRODUCTION, BUT 1977 SEASON AVERAGE PRICES WERE USED FOR SOME TYPES IN CALCULATING AN AVERAGE PRICE AND VALUE OF PRODUCTION.

2/ VALUE OF PRODUCTION FOR 1978 WAS DERIVED USING 1977 CROP SEASON AVERAGE PRICES SINCE SALES DATA FOR THE 1978 CROP ARE INSUFFICIENT FOR ESTIMATING A 1978 SEASON AVERAGE PRICE.
