CROP VALUES

Season Average Prices and Value of Production, by States, 1977, 1978, and 1979

Estimated season average prices and value of production for all major farm crops and for many minor crops are presented in this report. The season average prices are estimates of the average prices received by producers for that part of the crop that is or will be sold during the marketing year. Season average price estimates are based on entire month price averages through November for wheat, corn for grain, sorghum for grain, oats, barley, soybeans, flaxseed, rice and potatoes, with an allowance for marketings the remainder of the season. Upland cotton season average prices are based on entire month averages for the marketing year to January 1. Tobacco season average prices are estimates for the entire crop except certain types for 1979 which have insufficient sales and were valued the same as the previous year. Fruit and vegetable season average prices are based on entire month prices. Citrus fruit prices are season averages of entire month prices for the season ending in the calendar year in the heading. Season average prices for other commodities for which monthly price estimates are available use the mid-month prices through December with an allowance for marketings the remainder of the season. For other crops without monthly price estimates, the season average price is based on special survey data.

Season average prices include an allowance for unredeemed CCC loan and purchase agreement deliveries valued at average loan and purchase rates, by States, for crops under these programs. These prices are applied to production estimates to compute value of production for each State. The United States value of production is the sum of the State values.

U.S. average prices are obtained by weighting State prices by estimated State sales for each crop year. These averages may differ from the average computed by dividing value of production by the quantity produced. The value of production estimates in this report relate to the crop year and should not be confused with cash receipts which relate to sales during a calendar year, irrespective of the year of production. All estimates for the 1979 crop are preliminary.
