# Crop Values

## 1991 Summary

**NOTICE:** The Special Oilseeds table on page 25 of the "Crop Values" report as originally released on January 23, 1992, was not correct. The "Price per Cwt" unit should have been "Dollars" instead of "Cents", and the "Value of Production" column was incorrectly calculated by multiplying dollars times pounds rather than by hundredweight. Consequently, the value of production was overstated by a factor of 100. This error also was carried forward into the U.S. totals. The tables are correct in this publication.

## Crop Values

Marketing Year Average Prices and Value of Production,  
by States and United States, 1989, 1990, and 1991

**Crop Values** includes average prices and value of production for major field crops and for many special crops. All prices in this report are marketing year average prices which do not include allowances or adjustments for commodities under government loan at the end of the marketing year, commodities forfeited to the Commodity Credit Corporation, crop deficiency payments or disaster payments. Estimates shown for 1991 crops are preliminary.

Each State price is based on months comprising its marketing year, while United States marketing year averages are based on the standard U.S. marketing year for each crop. See page 3 of this report for a listing of marketing years by crop for the United States.

Preliminary marketing year average price estimates for 1991 are based on entire month prices through November for wheat, oats, barley, corn, sorghum, soybeans, flaxseed, peanuts, rice, potatoes, dry edible beans, and sunflower with an allowance for projected prices for the remainder of the marketing year. Upland cotton prices are based on data through mid-December 1991. Tobacco prices are estimates for the entire season, except those types for 1991 which have insufficient sales and were valued the same as the previous year or estimated based on price changes of other similar types. Fruit and vegetable prices are based on entire month prices for the season ending in the calendar year specified in the heading of the table. Prices for other commodities, for which monthly data are available, are based on mid-month prices through November with allowance for projected prices the remainder of the marketing year. Crops without monthly data are based on special surveys.

United States marketing year average prices are calculated by weighting monthly U.S. prices by monthly marketings for corn, sorghum, oats, barley, wheat, rice, soybeans, flaxseed, peanuts, upland cotton, and sunflower. Estimates for other commodities are computed by weighting State marketing year averages to the U.S. level. Marketings for the States in the monthly price program generally account for at least 90 percent of the total value of U.S. marketings. See page 3 for a listing of States in the monthly program for each crop concerned.

Value of production is computed by multiplying each State price by its production. Value of production for the United States is the sum of State values for all States listed for the crop. Value of production estimates in this report relate to the crop year and should not be confused with cash receipts which relate to sales during a calendar year, irrespective of the year of production. The next issue of this report will be published January 1993.

### Marketing Year Average Prices

Marketing year average prices received by farmers at the United States level for the crops listed below are based on U.S. monthly prices weighted by monthly marketings during specific periods. These periods, by crop, are shown below. U.S. monthly prices are State average prices weighted by marketings during the month. The States included in monthly surveys generally account for 90 percent or more of total marketings and are shown in the table below.

Crop	U.S. Marketing Year
Wheat, Oats, Barley	Jun thru following May
Flaxseed	Jul thru following Jun
Upland Cotton, Peanuts, Rice	Aug thru following Jul
Corn, Sorghum Grain, Soybeans, Sunflower	Sep thru following Aug

Corn, Sweet (in Husk)	197,267	217,040	241,926
Cucumbers (for Pickles)	131,082	136,313	129,856
Peas, Green (Shelled)	119,963	131,494	123,630
Tomatoes	657,284	702,367	722,114
Total Above Crops	5,426,340	5,015,155	5,277,606
Total All Crops <u>9/</u>	80,347,024	80,863,683	79,857,734

- 1/ U.S. average prices per unit computed by weighting state prices by estimated sales for all crops, except corn, sorghum, oats, barley, wheat, rice, soybeans, flaxseed, peanuts, sunflower, and upland cotton which are computed by weighting U.S. monthly prices by estimated monthly marketings.
- 2/ Available Jul 31, 1992, in the "Agricultural Prices" report.
- 3/ Available Jul 7, 1992, in the "Noncitrus Fruits and Nuts Annual" report.
- 4/ Available Aug 18, 1992, in the "Cranberries" report.
- 5/ Discontinued after 1989.
- 6/ Includes processed and fresh market.
- 7/ Equivalent packing house-door returns for all sales for citrus. Prices and value in column headed 1989-the 1988-89 crop; 1990-the 1989-90 crop; 1991-the 1990-91 crop.
- 8/ Value at processing plant door.
- 9/ Used 1990 price to compute value of production for 1991 for commodities noted by footnotes 2/, 3/, and 4/.
- 10/ Estimates began in 1991.
