Crop Values 1993 Summary

Crop Values

Marketing Year Average Prices and Value of Production,
by States and United States, 1991, 1992, and 1993

Crop Values includes average prices and value of production for major field crops and for many special crops. All prices in this report are marketing year average (MYA) prices which do not include allowances or adjustments for: commodities under government loan at the end of the marketing year; commodities forfeited to the Commodity Credit Corporation; or crop deficiency and disaster payments. Estimates for 1991 and 1992 are final. Estimates for the 1993 crops are preliminary.

The final State MYA prices for major field crops with monthly data are computed by weighting monthly prices by the estimated percentage of monthly sales during their marketing year. State MYA prices for other field crops are based on special surveys. The final U.S. MYA prices for corn, sorghum, oats, barley, wheat, rice, soybeans, flaxseed, sunflower, and upland cotton are computed by weighting U.S. monthly prices by monthly marketings for the U.S. marketing year. Marketings for the States in the monthly price program generally account for at least 90 percent of each crop's total value of U.S. marketings. United States MYA prices for other field crops are computed by weighting State MYA's by the estimated quantity sold in each State.

State and U.S. preliminary 1993 MYA prices for wheat, oats, barley, corn, sorghum, soybeans, flaxseed, peanuts, rice, potatoes, dry edible beans, sunflower, and upland cotton are based on entire month price data through November 1993. Except for cotton, allowances are made for the portion of the crop yet to be marketed during the remainder of these crops' marketing years.

United States MYA prices for noncitrus fruits and nuts and commercial vegetables are derived by dividing the sum of States' values of production by their sum of production. The States involved in estimating value and production for these items generally account for 90 percent of the U.S. value of marketings for these items. State level MYA prices are normally based on annual grower, packer, and processor surveys. However, for major fresh market items in major producing states, MYA prices are usually based on weighted market news price quotes.

United States MYA prices for citrus fruits are the average of the States' prices weighted by their box movement and approximate net weight per box. State level prices are based on a combination of grower/packer surveys, industry administrative data, and market news.

Marketing Year Average Prices

Marketing year average prices received by farmers at the United States level for the crops listed below are based on U.S. monthly prices weighted by monthly marketings during specific periods. These periods, by crop, are shown below. U.S. monthly prices are State average prices weighted by marketings during the month. The States included in monthly surveys generally account for 90 percent or more of total marketings and are shown in the table below.

Crop	U.S. Marketing Year
Wheat, Oats, Barley	Jun thru following May
Flaxseed	Jul thru following Jun
Upland Cotton, Peanuts, Rice	Aug thru following Jul

Footnotes

- 1/ U.S. average prices per unit computed by weighting State prices by estimated sales for all crops, except corn, sorghum, oats, barley, wheat, rice, soybeans, flaxseed, sunflower, and upland cotton which are computed by weighting U.S. monthly prices by estimated monthly marketings.
- 2/ Estimates began in 1992.
- 3/ Preliminary 1993 price and value available July 29, 1994, in the **"Agricultural Prices"** report. Sugarcane price is for sugar only. Sugarcane value of production includes sugar and seed.
- 4/ Available Jul 8, 1994, in the **"Noncitrus Fruits and Nuts Annual"** report.
- 5/ Estimates reinstated with the 1992 crop.
- 6/ Available Aug 16, 1994, in the **"Cranberries"** report.
- 7/ Includes processed and fresh market.
- 8/ Equivalent packinghouse-door returns for all citrus sales. Prices and values in column headed 1991-the 1990-91 crop; 1992-the 1991-92 crop; 1993-the 1992-93 crop.
- 9/ Value at processing plant door.
- 10/ Used 1992 price to compute 1993 value of production for commodities noted by footnotes 3/, 4/, and 6/. 1992 value carried forward for Avocados and Guavas.
