### Update Alert

The oats table on page 17 was corrected. Changes were made to the price per bushel and value of production for 1999. Changes were made to the 1999 U.S. oats price and value of production on pages 6 and 7. Based on the corrected 1999 value of production for oats, the 1999 total value for field and miscellaneous crops was changed on pages 7 and 13. The 1999 total value of all crops was changed on pages 11 and 13.

## Crop Values

### Marketing Year Average Prices and Value of Production, by States and United States, 1998, 1999, and 2000

**"Crop Values"** includes average prices and value of production for major field crops and for many specialty crops. All prices in this report are marketing year average (MYA) prices which do not include allowances or adjustments for commodities under government loan at the end of the marketing year, commodities forfeited to the Commodity Credit Corporation, or crop deficiency and disaster payments.

Each State MYA price is based on sales in the months comprising its marketing year, while United States marketing year averages are based on sales during the standard U.S. marketing year for each crop. See page three of this report for a listing of U. S. marketing years for selected crops.

United States MYA prices for most crops are computed by weighting State MYA prices by the estimated quantity sold in each State. The exceptions are for corn, sorghum, oats, barley, wheat, rice, soybeans, flaxseed, sunflower, upland cotton, and dry edible beans which are computed by weighting U.S. monthly prices by monthly marketings for the U.S. marketing year. State MYA prices for these monthly crops are computed by weighting monthly prices by the monthly percentages of total sales during their marketing year. See page four for the list of States in the monthly price program for these crops.

State and U. S. preliminary 2000 MYA prices for wheat, oats, barley, corn, sorghum, soybeans, flaxseed, peanuts, rice, potatoes, dry edible beans, sunflower, and upland cotton are based on entire month price data through December 2000. Except for cotton and peanuts, allowances are made for the portion of the 2000 crops to be marketed during the remainder of the 2000 marketing year. State MYA prices for crops not in the monthly price program are based on annual surveys.

State value of production is computed by multiplying each State price by its production. Value of production for the United States is the sum of State values for all States listed for the crop. Value of production estimates in this report relate to the crop year. These estimates should not be confused with cash receipts, which relate to sales during a calendar year irrespective of the year of production.

### Final 2000 MYA Price Publication Schedule

August 2001	<b>"Agricultural Prices"</b> :	Barley (All, Feed, and Malting), Hay, Oats, Rye, Wheat (All, Winter, Durum, and Other Spring).
October 2001	<b>"Agricultural Prices"</b> :	Upland and American-Pima Cotton and Cottonseed.
November 2001	<b>"Agricultural Prices"</b> :	Corn, Dry Beans, Flaxseed, Peanuts, Proso Millet, Sorghum, Soybeans, and Sunflowers.
January 2002	<b>"Agricultural Prices"</b> :	Rice.

## Marketing Year Average Prices

Marketing year average prices received by farmers at the United States level for the crops listed below, with the exception of hay, are based on U. S. monthly prices weighted by monthly marketings during specific periods. These periods, by crop, are shown below. U. S. monthly prices are State average prices weighted by marketings during the month. The States included in monthly surveys generally account for 90 percent or more of total marketings and are shown on the next page. The monthly prices for hay are based on estimates derived from State marketing years and thus may extend over a period exceeding 12 months.

<sup>1</sup> Equivalent packinghouse-door returns for all citrus sales. Prices and values in column headed 1998 are 1997-1998 crop; 1999 are 1998-1999 crop; 2000 are 1999-2000 crop.

<sup>2</sup> The 2000 value of production will be available July 6, 2001 in the "Noncitrus Fruits and Nuts Annual" report.

<sup>3</sup> The 2000 value of production will be available August 21, 2001 in the "Cranberries" report.

<sup>4</sup> The 2000 value of production was derived by using 2000 prices except for California grapes utilized for raisins where 1999 prices were used. The 2000 value of production for California grapes utilized for raisins is not available, but will be published July 6, 2001.

<sup>5</sup> Includes estimated value of production for crops noted by footnotes 2 and 3. Used 1999 price to compute the 2000 value. 1999 value carried forward for Avocados and Guavas.
