Crop Values

Marketing Year Average Prices and Value of Production, by States and United States, 2003, 2004, and 2005

"**Crop Values**" includes average prices and value of production for major field crops and many specialty crops. All prices in this report are marketing year average (MYA) prices which do not include allowances or adjustments for commodities under government loan at the end of the marketing year, commodities forfeited to the Commodity Credit Corporation, loan deficiency payments, direct and counter cyclical payments, or disaster payments.

Each State MYA price is based on sales in the months comprising its marketing year, while U.S. MYA prices are based on sales during the standard U.S. marketing year for each crop. See page 3 of this report for a listing of State and U.S. marketing year definitions for specified field crops.

United States monthly prices, for all crops in the monthly price estimating program, are computed by weighting monthly State prices by monthly marketings for each State. (For the major field crops, the States included in the monthly price estimating program are shown on pages 4 and 5.) United States MYA prices for corn, sorghum, oats, barley, wheat, rice, soybeans, peanuts, flaxseed, sunflower, upland cotton, dry edible beans, chickpeas (garbanzo beans), dry edible peas, Austrian winter peas, and lentils are computed by weighting U.S. monthly prices by monthly marketings for the U.S. marketing year. The U.S. MYA price for hay is computed similarly. However, State hay prices and marketings used in the U.S. MYA price calculations vary by month due to the U.S. marketing year extending over a 14-month period. For all other crops, U.S. MYA prices are computed by weighting State MYA prices by the estimated production in each State.

State and U.S. preliminary 2005 MYA prices for corn, sorghum, oats, barley, wheat, rice, soybeans, flaxseed, sunflower, upland cotton, dry edible beans, chickpeas (garbanzo beans), dry edible peas, Austrian winter peas, lentils, peanuts, and potatoes are based on entire month price data through December 2005 and, except for cotton and peanuts, allowances are made for the portion of the 2005 crop to be marketed during the remainder of each crop's 2005 marketing year. State MYA prices for crops not in the monthly price program are based on annual surveys. See the table below for the publication dates of final MYA prices for specified crops.

State value of production is computed by multiplying each State price by its production. Value of production for the U.S. is the sum of State values for all States listed for the crop. Value of production estimates in this report relate to the crop year. These estimates should not be confused with cash receipts, which relate to sales during a calendar year irrespective of the year of production.

Final 2005 MYA Price Publication Schedule

June 2006	"Agricultural Prices" :	Barley (All, Feed, and Malting), Oats, Wheat (All, Winter, Durum, and Other Spring) for U.S. only.

¹ Preliminary 2005 value of production available July 31, 2006 in the "Agricultural Prices" report. Sugarcane value of production includes sugar and seed.

² The 2005 value of production is derived by using 2005 prices except for CT and MA type 61 where the 2004 price was used.

³ Chickpeas value is included in dry edible beans value.

⁴ The 2005 value of production will be published June 9, 2006 in the "Crop Production" report.

⁵ The 2005 total value of production includes an estimated value of production for sugarbeets, sugarcane, and maple syrup. The estimated value of production for sugarbeets, sugarcane, and maple syrup is computed using 2004 prices.

¹ See page 22 for Alaska.

² Crops included for each producing State are those shown in the U.S. summary tables on pages 6-11.

³ The U.S. total field and miscellaneous crops and total value of principal crops columns do not add because type 61 tobacco values for CT and MA are not included in State totals to avoid disclosure of individual operations. Type 61 tobacco values for CT and MA are included in the U.S. totals.

¹ For States with more than one type of tobacco marketed, the value of production is the sum of the individual types' values.

² Price and value include Type 51 only. Shade type 61 is not included in State totals to avoid disclosure of individual operations.

³ Estimates discontinued in 2005.

⁴ Type 61 only. CT and MA combined to avoid disclosure of individual operations. Price not available for 2005.

⁵ Includes estimated in 2005 value of production for CT and MA type 61. Used 2004 CT and MA type 61 price to compute the 2005 value of production.
