## Crop Values

Marketing Year Average Prices and Values of Production,  
by States and United States, 2007, 2008, and 2009

*Crop Values* includes average prices and values of production for major field crops and many specialty crops. All prices in this report are marketing year average (MYA) prices which do not include allowances or adjustments for commodities under government loan at the end of the marketing year, commodities forfeited to the Commodity Credit Corporation, loan deficiency payments, direct and counter cyclical payments, or disaster payments.

Each State MYA price is based on sales in the months comprising its marketing year, while U.S. MYA prices are based on sales during the standard U.S. marketing year for each crop. See page 8 of this report for a listing of State and U.S. marketing year definitions for specified field crops.

United States monthly prices, for all crops in the monthly price estimating program, are computed by weighting monthly State prices by monthly marketings for each State. For the major field crops, the States included in the monthly price estimating program are shown on pages 10 and 11. United States MYA prices for corn, sorghum, oats, barley, wheat, rice, soybeans, peanuts, flaxseed, sunflower, canola, upland cotton, hay, dry edible beans, chickpeas (garbanzo beans), dry edible peas, Austrian winter peas, and lentils are computed by weighting U.S. monthly prices by monthly marketings for the U.S. marketing year. For all other crops, U.S. MYA prices are computed by weighting State MYA prices by the estimated production in each State.

State and U.S. preliminary 2009 MYA prices for corn, sorghum, oats, barley, wheat, rice, soybeans, flaxseed, sunflower, canola, upland cotton, dry edible beans, chickpeas (garbanzo beans), dry edible peas, Austrian winter peas, lentils, peanuts, and potatoes are based on entire month price data through December 2009 and, except for cotton and peanuts, allowances are made for the portion of the 2009 crop to be marketed during the remainder of each crop's 2009 marketing year. State MYA prices for crops not in the monthly price program are based on annual surveys. See the table below for the publication dates of final MYA prices for specified crops.

State value of production is computed by multiplying each State price by its production. Value of production for the U.S. is the sum of State values for all States listed for the crop. Value of production estimates in this report relate to the crop year. These estimates should not be confused with cash receipts, which relate to sales during a calendar year irrespective of the year of production.

<sup>1</sup> Crops included for each producing State are those shown in the United States summary tables on pages 12-17.

<sup>2</sup> The United States total Field and Miscellaneous Crops column does not add because type 61 tobacco values for Connecticut and Massachusetts are not included in the States totals to avoid disclosure. Type 61 tobacco values for Connecticut and Massachusetts are included in the United States totals. The United States total Fruits and Nuts column does not add because grape values for Arizona and Arkansas are not included in the States totals to avoid disclosure. Grape values for Arizona and Arkansas are included in the United States total. The Total Value of Principal Crops column does not add due to the missing tobacco and grape values for the above mentioned States. These values are in the United States total.
