Statistical Methodology: Dairy Products Prices

Data collection period: Dairy Products Prices statistics are based upon survey data collected after Saturday of each week.

Sampling frames and sample size: The Dairy Products Prices program consists of 89 manufacturing plants selling one million pounds or more of dairy products as defined by Public Law Number 106-532. There are 20 plants reporting 40 pound cheddar blocks, 16 plants reporting 500 pound cheddar barrels, 23 plants reporting butter, 38 plants reporting nonfat dry milk, and 23 plants reporting dry whey. There are 7 plants in the Minnesota and Wisconsin Region reporting 40 pound cheddar blocks and 10 plants in the Minnesota and Wisconsin Region reporting 500 pound cheddar barrels.

Modes of data collection: Data are collected by electronic data reporting, telephone, and facsimile.

Term and definitions: Firms complete the weekly questionnaires using definitions from Public Law Number 106-532 and through the aid of instructions provided during the Annual Validation interview as well as provided information on the questionnaire.

Reliability: Price data included in the Dairy Products Prices report are collected through a Census of all qualifying manufacturers of the following products:

- 1) **Cheddar cheese in 40 pound blocks**, colored between 6 and 8 on the National Cheese Institute color chart, meeting Wisconsin State Brand, USDA Grade A, or better standards.
- 2) **Cheddar cheese in 500 pound barrels**, white, meeting Wisconsin State Brand, USDA Grade A, or better standards.
- 3) **Salted butter (80% butterfat)**, fresh or storage, in 25 kilogram and 68 pound boxes meeting USDA Grade AA standards.
- 4) **Non-fortified, nonfat dry milk** in 25 kilogram bags, 50 pound bags, totes, and tankers meeting USDA Extra Grade or USPH Grade A standards.
- 5) **Edible non-hygroscopic dry whey** in 25 kilogram bags, 50 pound bags, totes, and tankers meeting USDA Extra Grade standards.

Estimating Procedures: Price data reported by manufacturers are reviewed for reasonableness and consistency by comparing with data reported in prior weeks and by data reported by other firms in their region and national trends. During weekly review both field office and Agricultural Statistics Board re-contact manufacturers to verify any unusual

data relationships. The Agriculture Marketing Service conducts on-site verifications if manufacturers fail to sufficiently explain any unusual data relationships.

Revision Policy: Dairy Products Prices information is subject to revisions to the previous four weeks. The previous two calendar years of estimates for the weekly dairy products prices are subject to verification by AMS.
