LIQUID, FROZEN AND DRIED EGG PRODUCTION
January, 1952

Liquid egg production during January totaled 22,021,000 pounds compared with 22,686,000 pounds in January last year and the 1946-50 average of 27,762,000 pounds, the Bureau of Agricultural Economics reports. The quantities used for immediate consumption and drying were smaller than a year ago. The quantity frozen during the month was larger than last year.

Dried egg production during January totaled 894,000 pounds compared with 1,761,000 pounds during January last year. Production consisted of 17,000 pounds of dried whole egg, 244,000 pounds of dried albumen and 633,000 pounds of dried yolk. During January last year production consisted of 1,611,000 pounds of dried whole egg, 122,000 pounds of dried albumen and 28,000 pounds of dried yolk.

The quantity of liquid egg frozen during January totaled 17,936,000 pounds compared with 15,462,000 pounds during January last year and with the average production of 12,623,000 pounds. Frozen egg stocks decreased 14 million pounds during January compared with 16 million pounds during January last year and the average January decrease of 17 million pounds.
