EGG PRODUCTS
Liquid, Frozen, Solids Production
DECEMBER 1967

January 31, 1968

Production of liquid egg products (ingredients added) during December 1967 totaled 44,223,000 pounds, according to the Crop Reporting Board. This was 12 percent less than the preceding month and 13 percent less than December 1966. Total production of liquid egg during 1967 amounted to 798,848,000 pounds, 29 percent above the 1966 total.

Liquid egg produced for immediate consumption during December totaled 4,635,000 pounds, up 7 percent from the preceding month and 76 percent from a year earlier. The quantity used for drying amounted to 15,592,000 pounds, down 23 percent from the December 1966 total. The quantity used for freezing totaled 23,996,000 pounds compared with 27,955,000 pounds used a year earlier—a decrease of 14 percent.

Egg solids production totaled 4,187,000 pounds during December 1967. This was 1 percent below the preceding month and 10 percent below the same month a year earlier. Annual production of egg solids during 1967 totaled 70,729,000 pounds compared with 51,484,000 pounds during 1966. Production of whole egg solids during December 1967 amounted to 687,000 pounds, 15 percent above the 594,000 pounds produced during November and 142 percent above a year earlier. Output of albumen solids during December totaled 1,197,000 pounds, up 2 percent from a year earlier. Output of yolk solids amounted to 1,462,000 pounds compared with 1,598,000 pounds in December 1966. Production of "other solids" totaled 841,000 pounds compared with 1,590,000 pounds produced during December a year earlier.
