Survey Procedures	124
Survey Definitions	125

Wholesale Value of Floriculture Crops Up 12 Percent

The Floriculture Crops questionnaire was redesigned for the 2000 survey. The most significant changes involved the creation of more than 30 additional breakouts of crops, and moving some prior crops into the "Other" categories. This realigned the crops collected to their relative importance in sales. Consequently, some data tables are not comparable with 1999. Separate sections were also added for Herbaceous Perennials and Propagative Materials. A copy of the questionnaire is in the back of this report, as is a more complete explanation of changes in Survey Procedures.

All Value of Production: The 2000 wholesale value of floriculture crops was up 12 percent from the revised 1999 valuation. Contributing almost half of the increase, however, was the addition of Propagative Material sales for the first time. The total crop value at wholesale for all growers with \$10,000 or more in sales is estimated at \$4.57 billion for 2000, compared with \$4.10 billion for 1999. California was again the leading state with crops valued at \$858 million, up 8 percent for the year. Florida was up 19 percent from 1999 with \$798 million in wholesale value. These two states accounted for 36 percent of the total value. The top five states--California, Florida, Michigan, Texas, and Ohio--accounted for \$2.42 billion, 53 percent of the total value.

Number of Growers: The number of growers tallied to 10,873 in 2000, a decline of 6 percent compared with 1999's revised count of 11,625. The number of growers with sales of \$100,000 or more dropped from 4,793 to 4,764 for 2000. The largest size group, \$500,000 or more, was the only one to have more members in 2000 than 1999; all other sales groupings were down from the year before.

Growing Area: Total covered area for floriculture crop production was recorded at 911 million square feet, down 1 percent. Greenhouse space accounted for 57 percent of the total covered area with 524 million square feet, down 2 percent from 1999. Film plastic structures decreased 3 percent to 357 million square feet. Fiberglass and other rigid plastic covers were up 3 percent for the year while glass greenhouse area was virtually unchanged. Shade and temporary cover constituted the remaining 388 million square feet of covered area, down 1 percent from 1999. Open ground usage totaled 36,868 acres, 5 percent over 1999's total.

Hired Workers: The average number of hired workers employed on operations in 2000 increased to 14.7, up from a revised 13.6 in 1999. A total of 8,624 operations reported hired workers during the year, compared with 9,471 a year earlier. Overall, 79 percent of the operations used some hired labor, compared with 81 percent in 1999.

Value of Production \$100,000+ in Sales: The total wholesale value of floriculture crops grown by operations exceeding the \$100,000 sales level reached \$4.27 billion in 2000, up 13 percent from 1999's total. These operations, which comprised 44 percent of all growers, accounted for 94 percent of the total value of floriculture crops. California had 20 percent of the total wholesale value for the 36 states surveyed. Florida was second with 18 percent. Michigan, Texas, and Ohio rounded out the top five states.

Bedding and garden plants, the largest contributor, recorded a 9 percent increase in wholesale value to \$2.12 billion. Potted flowering plants were up 3 percent in value to \$781 million. The foliage category was valued at \$574 million in 2000. This value is not comparable to 1999's value, which represented a net value of production. Data for 2000 represents the wholesale equivalent value of all sales. Value of cut flowers lost 1 percent to \$427 million while cut cultivated greens lost 2 percent to \$124 million.

Bedding/Garden Plants: Growers posted another large increase in bedding and garden plant production during 2000. The wholesale value of bedding and garden plants totaled \$2.12 billion, 9 percent above a year earlier. This represented 50 percent of the wholesale value of all the reported crops. California, Michigan, Texas, Ohio, and Florida accounted for 42 percent of the total bedding and garden value. Of the specified bedding plants in the survey, potted Geraniums (from cuttings and seed) returned the highest value to growers, \$148 million, virtually unchanged from the previous two years. Impatiens flats provided the second largest amount at \$116 million. The number of growers producing bedding and garden plants was 3,225, down 227 from 1999.

Potted bedding and garden plants tallied \$1.02 billion, representing 48 percent of the category total. This category showed a 24 percent increase for the year. Hardy Garden Mums, Impatiens (I. wallerana and New Guinea), Petunias, and Geraniums (from cuttings and seed) recorded increases.

Beginning with this year's questionnaire, **herbaceous perennials** are now collected in their own section of the form. In the past, they have been included within the scope of bedding/garden plants but, with the exception of Potted Hardy Mums, were included in the "Other" categories. The value of herbaceous perennials summed to \$426 million with Hardy Garden Mums accounting for 25 percent of the total.

The value of bedding and garden **flats** was off slightly from a year earlier to \$897 million. Flats represented 42 percent of the total value for bedding and garden plants. Average annual prices were up for all surveyed varieties. Impatiens, Vegetable-Type, Petunias, and Pansy/Violas were the top four items in this category and accounted for 41 percent of the total value.

Flowering hanging baskets accounted for \$207 million, 10 percent of the bedding and garden total. Hanging flowering basket prices were up for both I. wallerana Impatiens and New Guinea Impatiens but were lower for Petunias. Overall, the category recorded a 6 percent decline from 1999.

Foliage Plants: The value of foliage plant production continued upward in 2000, recording a 12 percent gain to \$574 million. Florida continued to dominate this category with 69 percent of the value. Potted foliage plants represent 85 percent of the total foliage value. The remainder of the value is from hanging baskets. In 2000, there were 1,554 foliage producers compared with 1,531 in 1999.

Cut Flowers: The wholesale value of domestically produced cut flowers lost 1 percent in 2000, totaling \$427 million. California's portion reached \$286 million, 67 percent of the total cut flower value in the 36 surveyed states. Individual flower data were collected on eleven additional cut flowers while four were dropped into the "Other" unspecified category. Pompon Chrysanthemums showed the largest price increase and Standard Carnations and Gladioli prices were down. The top three valued cut flower categories were Roses at \$69.4 million, Lilies at \$58.6 million, and Gladioli at \$32.2 million. The number of cut flower growers dropped by 23 percent to 503 during 2000.

Potted Flowering Plants: Potted flowering plants value totaled \$781 million, up 3 percent for the year. California accounted for 18 percent of the category's total value. Poinsettias, which make up \$237 million of the category, were up 5 percent in total value from 1999. Three of the remaining listed plants recorded value increases for the year—Orchids, up 26 percent; Florist Azaleas, up 28 percent; and Florist Chrysanthemums, up 4 percent. African Violets and Easter Lilies showed lower values for the year. Potted Florist Roses and Spring Flowering Bulbs were collected for the first time.

Cut Cultivated Greens: Cut cultivated greens were down 2 percent in value to \$124 million in 2000. Florida, at \$100 million, accounted for 81 percent of the category total. Value of Leatherleaf ferns, at \$68 million, was up 5 percent from last year. Other cut cultivated greens decreased 10 percent from a year earlier. The number of growers increased by 8 to 245 for 2000.

Propagative Material: A section devoted to propagative floriculture plant material was added to the 2000 questionnaire. Total value of sales of material for cut flowers, potted flowering plants, annual bedding/garden plants, herbaceous perennials, foliage, and cut cultivated greens were \$243 million during 2000. Propagative material for annual bedding/garden plants accounted for 44 percent of the total, or \$107 million. The largest single group of producers was 210 for annual bedding/garden material.

**Floriculture Crops: Operations with Hired Workers
and Workers Hired by Size of Operation, 1999-2000**

Gross Value of Sales	All Operations		Operations With Hired Workers		Average Number of Workers

¹ Wholesale value of sales as reported by growers with \$100,000 or more in sales of floriculture crops plus a calculated wholesale value of sales for growers with sales below \$100,000. The value of sales for growers below the \$100,000 level was estimated by multiplying the number of growers in each size group by the mid-point of each dollar value range.

Total	126,675	123,746		242,885	3,772,275	4,271,559

¹ Missing data were included in Other States to avoid disclosure of individual operations.

² Data for 1999 and 2000 are not comparable. Data for 1999 represents net value (total sales minus cost of young plants). Data for 2000 represents wholesale equivalent value of all sales.

³ Includes Annual Bedding Plants and Herbaceous Perennials.

⁴ Data series began in 2000; 1999 data not available.

⁵ Total data for 1999 and 2000 are not comparable, total sales of propagative materials were added in 2000. Total foliage for 1999 represents net value (total sales minus cost of young plants). Total foliage for 2000 represents the wholesale equivalent value of all sales.

¹ Missing data were included in Other States to avoid disclosure of individual operations.

² Years are not comparable. The 2000 questionnaire collected additional individual flower data which had formerly been in this category.

³ Pot sizes have been combined to avoid disclosure of individual operations.

⁴ Equivalent wholesale value of all sales.

⁵ Pot price is a weighted average of all pots reported to avoid disclosure of individual operations.

Survey Procedures

The floriculture statistics presented in this publication are compiled from interviews of all known growers of floriculture crops in the 36 selected states. Growers must have annual gross sales of all floriculture crops exceeding \$10,000 to be included in this report.

These results are based upon the Commercial Floriculture questionnaire, a copy of which is included in this report. During the collection of 2000 data, previous year information was sometimes updated.

Operations are classified by summing the value of actual plant sales reported in the questionnaire. This lessens the possibility that sales of non-floriculture plant material may be included.

Individual crop details including quantity sold, price, and value are summarized only from growers whose gross sales of floriculture crops exceed \$100,000. Area of production, which had been collected for cut flowers, cut cultivated greens, and potted foliage in 1999, was discontinued with the 2000 questionnaire.

The questionnaire used to collect 2000 data was significantly revised based largely upon industry input. Using results of the 1998 Census of Horticultural Specialties, the questionnaire was realigned to those crops having the largest sales. Over 30 additional plants or breakouts were added to the questionnaire. Eight types of plants were moved from the individual flower data collection to the Other categories due to a drop in their share of total sales. These changes will cause some data tables to be non-comparable with the previous year; these tables are footnoted as such.

The current questionnaire has sections devoted to Herbaceous Perennials and Propagative Floriculture Material. Although Herbaceous Perennials have been within the scope of bedding and garden plants, with the exception of Hardy Garden Mums, they have been collected as part of the Other categories. Propagative materials are a significant part of the floriculture industry. Total value of sales of six types of material were collected--cut flowers, potted flowering plants, annual bedding/garden plants, herbaceous perennials, foliage, and cut cultivated greens.

Foliage sales data are collected and published on a wholesale equivalent basis. Prior to 2000, a net value of sales was used. The net value was calculated by subtracting cost of plant material from gross sales. This change will put foliage on the same sales level as other categories published. Foliage data for 1999 and 2000 therefore, are not comparable.

Survey Definitions

Floriculture Crop: Any item considered in the category of bedding/garden plants, cut cultivated greens, cut flowers, flowering potted plants, foliage plants, floriculture propagative material. Data for flowering potted plants and foliage plants represent only items intended for indoor or patio use. Refer to the copy of the questionnaire at the end of this report for specific examples.

Commercial Grower: Any operation which produces any commodity listed above and whose gross sales total \$10,000 or more during the calendar year.

Area in Production (by crop): The gross area used, including walkways and aisles. All area used to grow a crop is counted, including area under glass, plastic, cloth, lath, and outdoors. The area used for each filling is included if more than one of the same crop is produced during the year. Area devoted to producing potted foliage is counted only once even though some of the area may be refilled with additional plants.

Growing Area (Total): Growing area, by type of cover, includes the gross square feet of physical space available to grow all floriculture crops produced by the operations surveyed. It is not limited to actual area used and does not include multiple uses of the same area.

Quantity Sold: Sales represent both retail and wholesale quantities sold in the calendar year shown. Flowers, plants, or materials purchased from others for immediate resale are excluded. Bedding plant flats are converted to the standard 11-inch x 22-inch flat size.

Expanded Wholesale Value: Value of all crops grown, at wholesale, for growers above \$10,000. This figure is calculated using two parts. One part uses survey totals of wholesale value of all sales as reported by growers with \$100,000 or more of floriculture crop sales. The second part is a calculated value for operations which fall between the \$10,000 minimum and the \$99,999 level. The value is derived by multiplying the number of growers in each range of sales by the midpoint dollar value of each range. The two components are then summed to provide State and 36-State totals.

Value of Sales at Wholesale: The value of all crops, except 1999 potted foliage, are on a gross wholesale basis before deductions for sales commissions, transportation charges, or other similar deductions. The value shown is an equivalent value of all sales at a wholesale price. It is derived by multiplying the average wholesale price by the total quantity sold. The 1999 value of sales for potted foliage plants is on a net sales basis. This value is determined by subtracting the reported cost of plant materials purchased from the value of all retail and wholesale sales. Beginning with 2000, potted foliage is also reported on a gross wholesale basis.

The data in this report for all bedding plants, cut cultivated greens, cut flowers, flowering potted plants, foliage, and propagative materials are summarized only from growers with \$100,000 or more in annual sales. The data summarized in tables showing grower numbers, hired workers, and growing area represent all growers having sales of \$10,000 or more. The tables showing selected Hawaiian crops include data for all operations with sales at, or above, the \$10,000 level.

Information Contacts

Listed below are the commodity specialists in the Crops Branch of the National Agricultural Statistics Service to contact for additional information.

Mark Harris, Chief (202) 720-2127

Released April 25, 2001, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on "Floriculture Crops 2000 Summary" call David Ranek at (202) 720-4215, office hours 7:30 a.m. to 4:00 p.m. ET.

The next "Floriculture Crops Summary" report will be released in April 2002.

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, D.C., 20250-9410, or call 202-720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

ACCESS TO REPORTS!!

For your convenience, there are several ways to obtain NASS reports, data products, and services:

INTERNET ACCESS

All NASS reports are available free of charge on the worldwide Internet. For access, connect to the Internet and go to the NASS Home Page at: <http://www.usda.gov/nass/>. Select "Today's Reports" or Publications and then Reports by Calendar or Publications and then Search, by Title or Subject.

E-MAIL SUBSCRIPTION

There are two options for subscribing via e-mail. All NASS reports are available by subscription free of charge direct to your e-mail address. 1) Starting with the NASS Home Page at <http://www.usda.gov/nass/>, click on **Publications**, then click on the **Subscribe by E-mail** button which takes you to the page describing e-mail delivery of reports. Finally, click on **Go to the Subscription Page** and follow the instructions. 2) If you do NOT have Internet access, send an e-mail message to: usda-reports@usda.mannlib.cornell.edu. In the body of the message type the word: **list**.

AUTOFAX ACCESS

NASSFax service is available for some reports from your fax machine. Please call 202-720-2000, using the handset attached to your fax. Respond to the voice prompts. Document 0411 is a list of available reports.

PRINTED REPORTS OR DATA PRODUCTS

CALL OUR TOLL-FREE ORDER DESK: 800-999-6779 (U.S. and Canada)
Other areas, please call 703-834-0125 FAX: 703-834-0110
(Visa, MasterCard, check, or money order acceptable for payment.)

ASSISTANCE

For **assistance** with general agricultural statistics or further information about NASS or its products or services, contact the **Agricultural Statistics Hotline** at **800-727-9540**, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.
