## Wholesale Value of Floriculture Crops Up 2 Percent

**All Value of Production:** The 2002 wholesale value of floriculture crops is up 2 percent from the revised 2001 valuation. The total crop value at wholesale for all growers with \$10,000 or more in sales is estimated at \$4.88 billion for 2002, compared with \$4.80 billion for 2001. California is again the leading State with crops valued at \$962 million, down 4 percent from the previous year. Florida is up 4 percent from 2001 with \$877 million in wholesale value. These two States account for 38 percent of the total value. The top five States, California, Florida, Michigan, Texas, and Ohio, account for \$2.62 billion, 54 percent of the total value.

**Number of Growers:** The number of growers for 2002, at 10,216, is down 8 percent compared with the 2001 revised count of 11,081. The number of growers with sales of \$100,000 or more dropped to 4,612 for 2002 from 4,738 in 2001. The different size-groups experienced mixed results. Number of operations reporting sales in the \$20,000 to \$49,999 size groups increased while all other size-groups decreased.

**Growing Area:** Total covered area for floriculture crop production is recorded at 911 million square feet, 1 percent less than the revised 2001 estimate. Greenhouse space for 2002 accounts for 58 percent of the total covered area with 531 million square feet, virtually unchanged from 2001. Film plastic structures are up 1 percent, to 368 million square feet. Fiberglass and other rigid plastic covers are down 5 percent for the year, while glass greenhouse area is down 1 percent compared to the revised 2001 area. Shade and temporary cover constitute the remaining 380 million square feet of covered area, down 3 percent from 2001. Open ground usage totals 36,906 acres, up 4 percent over the 2001 total.

**Hired Workers:** The average number of hired workers employed on operations in 2002 is 15.3, up from a revised 14.6 in 2001. A total of 8,106 operations hired workers during 2002, compared with 8,664 a year earlier. Overall, 79 percent of the operations used some hired labor during 2002, compared to 78 percent in 2001.

### Value of Production \$100,000+ in Sales

**Total Wholesale Value:** The total wholesale value of floriculture crops grown by operations exceeding the \$100,000 sales level reached \$4.62 billion in 2002, up 3 percent from the revised 2001 total. These operations, which comprise 45 percent of all growers, account for 95 percent of the total value of floriculture crops. California has 21 percent of the total wholesale value for the 36 States surveyed. Florida ranks second with 19 percent. Michigan, Texas, and Ohio round out the top five States with 6 percent, 6 percent, and 4 percent, respectively.

Bedding and garden plants wholesale value, at \$2.28 billion, is the largest contributor to the value of production, up 5 percent from the previous year. Potted flowering plants value, at \$822 million, is virtually unchanged from 2001. The foliage category is valued at \$663 million for 2002. This is up 2 percent from the revised 2001 estimate. Value of cut flowers, at \$410 million, is down 2 percent, while cut cultivated greens, at \$111 million, is down 1 percent from 2001.

**Bedding/Garden Plants:** The wholesale value of bedding and garden plants totals \$2.28 billion, 5 percent above a year earlier. This represents 49 percent of the wholesale value of all the reported crops. California, Michigan, Texas, Ohio, and Florida account for 42 percent of the total bedding and garden value. Of the specific bedding plants in the survey, potted Geraniums (from both cuttings and seed) sold for the highest value to growers, \$150 million, virtually unchanged from the previous year. Impatien flats provide the second largest amount at \$112 million. The number of growers producing bedding and garden plants is 3,098, down 93 growers from 2001.

**Potted** bedding and garden plants wholesale value totals \$1.21 billion for 2002, representing 53 percent of the bedding and garden category. This value is 11 percent above 2001. Pansies, Vegetable-type pots, Petunias, New Guinea Impatiens, Geraniums (from seed), Begonias, and Marigolds recorded increases.

**Herbaceous perennials**, valued at \$571 million for 2002, is 15 percent above the previous year. Hardy garden mums value is up 13 percent, while potted Hosta is down 5 percent. The "Other" category is 18 percent higher.

The value of bedding and garden **flats** is down 3 percent from a year earlier to \$843 million. Flats represent 37 percent of the total value for bedding and garden plants. Average annual prices are up for all surveyed varieties, with the exception of New Guinea impatien flats and Geranium flats, from both cuttings and seed. Impatiens, Pansy/Violas, and Petunias are the top 3 items in this category and account for 37 percent of the total value.

**Flowering hanging baskets** account for \$230 million, 10 percent of the bedding and garden total value. Overall, the category is 4 percent above the 2001 level.

**Foliage Plants:** The value of 2002 foliage plant production, at \$663 million, is 2 percent above the previous year. Florida continues to dominate this category with 69 percent of the value. Potted foliage plants represent 87 percent of the total foliage value. The remainder of the value is from hanging baskets. The number of foliage producers, at 1,549, is 13 below 2001.

**Cut Flowers:** The wholesale value of domestically produced cut flowers is \$410 million for 2002, down 2 percent from 2001. This is the lowest Cut Flower wholesale value since 1986. California's value is \$279 million, 68 percent of the total cut flower value in the 36 surveyed States. The top three valued cut flower categories are Lilies at \$57.7 million, Roses at \$56.2 million, and Tulips at \$28.3 million. Cut flower growers, at 586, is 6 percent below 2001.

**Potted Flowering Plants:** Potted flowering plants, for indoor or patio use, are valued at \$822 million, virtually unchanged from 2001. California accounts for 24 percent of the category's total value. Poinsettias, which make up \$247 million of the category, are down 3 percent in total value from 2001. Four potted flowering plants are higher for 2002: Potted Florist Roses, up 17 percent; Spring Flowering Bulbs, up 13 percent; Orchids, up 4 percent; and Florist Mums, up 2 percent.

**Cut Cultivated Greens:** Cut cultivated greens for 2002 are down 1 percent in value to \$111 million from 2001. Florida's value, at \$86 million, represents 78 percent of the category total. Value of Leatherleaf ferns, at \$51.8 million, is down 6 percent from last year. The other cut cultivated greens value is 4 percent above a year earlier. The number of growers for 2002, at 233, is 15 above 2001.

**Propagative Material:** Total value of sales of material for cut flowers, potted flowering plants, annual bedding and garden plants, herbaceous perennials, foliage, and cut cultivated greens for 2002 is \$332 million, 6 percent above the previous year. Propagative material for annual bedding and garden plants account for 50 percent of the total, or \$167 million.

<sup>1</sup> Wholesale value of sales as reported by growers with \$100,000 or more in sales of floriculture crops plus a calculated wholesale value of sales for growers with sales below \$100,000. The value of sales for growers below the \$100,000 level was estimated by multiplying the number of growers in each size group by the mid-point of each dollar value range.

## Survey Procedures

The floriculture statistics presented in this publication are compiled from interviews of all known growers of floriculture crops in the 36 selected States. Growers must have annual gross sales of all floriculture crops exceeding \$10,000 to be included in this report.

These results are based upon the Commercial Floriculture questionnaire, a copy of which is included in this report. During the collection of 2002 data, previous year information was sometimes updated. Operations are classified by summing the value of actual plant sales reported in the questionnaire. This lessens the possibility that sales of non-floriculture plant material may be included.

Individual crop details including quantity sold, price, and value are summarized only from growers whose gross sales of floriculture crops exceed \$100,000.

Beginning with the 2000 crop year, the questionnaire has sections devoted to Herbaceous Perennials and Propagative Floriculture Material. Although Herbaceous Perennials have been within the scope of bedding and garden plants, with the exception of Hardy Garden Mums, prior to 2000, they were collected as part of the "Other" categories. Propagative materials are a significant part of the floriculture industry. Total value of sales of six types of material were collected: cut flowers, potted flowering plants, annual bedding/garden plants, herbaceous perennials, foliage, and cut cultivated greens.

## Survey Definitions

**Floriculture Crop:** Any item considered in the category of bedding/garden plants, cut cultivated greens, cut flowers, flowering potted plants, foliage plants, floriculture propagative material. Data for flowering potted plants and foliage plants represent only items intended for indoor or patio use. Refer to the copy of the questionnaire at the end of this report for specific examples.

**Commercial Grower:** Any operation which produces any commodity listed above and whose gross sales total \$10,000 or more during the calendar year.

**Area in Production:** All area used to grow a crop is counted, including area under glass, plastic, cloth, lath, and outdoors. Also, walkways and aisles are included. The area used for each filling is included if more than one of the same crop is produced during the year. Area devoted to producing potted foliage is counted only once even though some of the area may be refilled with additional plants.

**Growing Area:** Total growing area, by type of cover, includes the gross square feet of physical space available to grow all floriculture crops produced by the operations surveyed. It is not limited to actual area used and does not include multiple uses of the same area.

**Quantity Sold:** Sales represent both retail and wholesale quantities sold in the calendar year shown. Flowers, plants, or materials purchased from others for immediate resale are excluded. Bedding plant flats are converted to the standard 11-inch x 22-inch flat size.

**Expanded Wholesale Value:** Value of all crops grown, at wholesale, for growers above \$10,000. This figure is calculated using two parts. One part uses survey totals of wholesale value of all sales as reported by growers with \$100,000 or more of floriculture crop sales. The second part is a calculated value for operations which fall between the \$10,000 minimum and the \$99,999 level. The value is derived by multiplying the number of growers in each range of sales by the midpoint dollar value of each range. The two components are then summed to provide State and the 36 State total.

**Value of Sales at Wholesale:** The value of all crops are on a gross wholesale basis before deductions for sales commissions, transportation charges, or other similar deductions. The value shown is an equivalent value of all sales at a wholesale price. It is derived by multiplying the average wholesale price by the total quantity sold.

The data in this report for all bedding plants, cut cultivated greens, cut flowers, flowering potted plants, foliage, and propagative materials are summarized only from growers with \$100,000 or more in annual sales. The data summarized in tables showing grower numbers, hired workers, and growing area represent all growers having sales of \$10,000 or more. The tables showing selected Hawaiian crops include data for all operations with sales at, or above, the \$10,000 level.

# COMMERCIAL FLORICULTURE SURVEY

## JANUARY 2003

Form Approved  
 O.M.B. Number 0535-0093  
 Approval Expires 4/30/03  
 Project Code 148  
 QID 060099-DC

Dear Reporter:

The Department of Agriculture is conducting its annual Floriculture Survey to collect data on 2002 production. Your cooperation is essential. Completing this survey may help you identify areas of profit and plan for the new growing season. It also will help us accurately estimate floriculture production in your State, and nationally. Your response is voluntary. The information you furnish will be kept confidential, as required by law. Thank you.

Sincerely,

Frederic A. Vogel, Chairperson  
 Agricultural Statistics Board

Please make corrections to name, address and Zip Code, if necessary.

### INTRODUCTION

1. In 2002, which of the following floriculture crops did this operation produce and sell?

- Cut flowers
- Potted flowering plants
- Herbaceous perennials
- Annual bedding/garden plants
- Foliage
- Cut cultivated greens
- Propagative floriculture material and unfinished plants
- None (If none checked, please complete the back page and return by mail).

2. Did retail and wholesale sales of floriculture crops (the crops produced or finished by this operation) total \$10,000 or more during 2002?

YES    NO →

### INSTRUCTIONS

**What to Report...**

1. Report **only** flowers and plants FINISHED by this operation in Sections 1 through 6.
2. Report **only** UNFINISHED flower and plant material for the products listed in Section 7 (Propagative Material). This material was produced and sold by this operation to other growers for finishing.
3. Report **all** production whether grown under glass, fiberglass and other rigid plastics, film plastic, shade cloth, natural shade, other shade, or outdoors.
4. Report value of sales before deductions for commissions and transportation are made.

**SECTION 1: CUT FLOWERS**

1. Did this operation produce any cut flowers (including those for dried flowers) for sale during 2002?

YES - Please report production below.       NO - Go to SECTION 2.
