The total crop value at wholesale for all growers with \$10,000 or more in sales is estimated at \$5.18 billion for 2004, compared with \$5.08 billion for 2003. California is again the leading State with crops valued at \$1.02 billion, up less than 1 percent from the previous year. Florida, the next largest producer, is down 1 percent from 2003 with \$826 million in wholesale value. These two States account for 36 percent of the total value. The top 5 States are California, Florida, Michigan, Texas, and New York which account for \$2.71 billion, 52 percent of the total value.

Number of Growers: The number of growers for 2004, at 11,099, is down 7 percent compared with the revised 2003 count of 11,996. The number of growers with sales of \$100,000 or more dropped to 4,579 for 2004 from 4,732 in 2003. The number of growers in all size-groups experienced decreases from the previous year.

Growing Area: Total covered area for floriculture crop production is recorded at 926 million square feet, 1 percent less than the revised 2003 estimate. Greenhouse space for 2004, at 542 million square feet, is down 1 percent from 2003. This accounts for 59 percent of the total covered area. Film plastic structures are also down 1 percent, to 386 million square feet. Fiberglass and other rigid plastic covers are down 3 percent for the year, while glass greenhouse area is down 2 percent compared to the previous year. Shade and temporary cover constitute the remaining 383 million square feet of covered area, virtually unchanged from 2003. Open ground usage totals 38,593 acres, down 6 percent from the revised 2003 total.

Hired Workers: The average number of hired workers employed on operations in 2004 is 15.4, up from a revised 14.8 in 2003. A total of 8,506 operations hired workers during 2004, compared with 9,012 a year earlier. Overall, 77 percent of the operations used some hired labor during 2004, compared to 75 percent in 2003.

Value of Production \$100,000+ in Sales

Total Wholesale Value: The total wholesale value of floriculture crops grown by operations exceeding the \$100,000 sales level is \$4.89 billion for 2004, up 2 percent from the revised 2003 total. These operations account for 94 percent of the total value of floriculture crops, but comprise only 41 percent of all growers. California contributes 21 percent of the total wholesale value for the 36 States surveyed. Florida ranks second with 16 percent. Michigan, Texas, and Ohio round out the top 5 States with 7 percent, 6 percent, and 4 percent, respectively.

Bedding and garden plants wholesale value, at \$2.53 billion, is the largest contributor to the value of production, up 4 percent from the previous year. Potted flowering plants value, at \$815 million, is up 1 percent from the revised 2003 value. The foliage category is valued at \$639 million for 2004. This is down 2 percent from the revised 2003 estimate. Value of cut flowers, at \$422 million, is virtually unchanged, while cut cultivated greens, at \$92.4 million, is down 9 percent from 2003.

This represents 52 percent of the wholesale value of all the reported crops. California, Michigan, Texas, Ohio, and Florida, the top 5 States in this category, account for 41 percent of the total bedding and garden value. Of the specific bedding plants in the survey, potted Geraniums (from both cuttings and seed) contribute the highest value to growers, \$162 million, up 7 percent from the previous year. Pansy/Viola flats contribute the second largest amount at \$109 million. The number of growers producing bedding and garden plants is 3,121, down 67 growers from 2003.

Potted bedding and garden plants wholesale value totals \$1.43 billion for 2004, representing 57 percent of the bedding and garden category. This value is 9 percent above 2003. Every category of potted bedding and garden plants recorded increases in value from the previous year.

Herbaceous perennials, valued at \$687 million for 2004, is 8 percent above the revised previous year value. The values of potted Hosta and Hardy Garden Mums are up 7 and 11 percent, respectively. The "Other" category is up 8 percent.

The value of bedding and garden **flats** is down 4 percent from a year earlier to \$822 million. Flats represent 32 percent of the total value for bedding and garden plants. With the exception of geraniums, the values of all categories of plants grown in flats are down from the previous year. Pansy/Violas, Impatiens, and Petunias are the top 3 items in this category and account for 36 percent of the value of all flats.

¹ Wholesale value of sales as reported by growers with \$100,000 or more in sales of floriculture crops plus a calculated wholesale value of sales for growers with sales below \$100,000. The value of sales for growers below the \$100,000 level was estimated by multiplying the number of growers in each size group by the mid-point of each dollar value range.

¹ Data for selected Hawaii crops include operations having sales of \$10,000 or more. Data for operations having sales of \$100,000 or more are also included in Other Cut Flowers, Potted Orchids or Other Potted Plants, and in the appropriate summary tables.

Survey Procedures

The floriculture statistics presented in this publication are compiled from interviews of all known growers of floriculture crops in the 36 selected States. Growers must have annual gross sales of all floriculture crops exceeding \$10,000 to be included in this report.

These results are based upon the Commercial Floriculture questionnaire, a copy of which is included in this report. During the collection of 2004 data, previous year information was sometimes updated. Additionally, in order to maintain comparability within this report, data for 2003 and 2004 were collected, where appropriate, from any new operations discovered through ongoing list building activities. Operations are classified by summing the value of actual plant sales reported in the questionnaire. This lessens the possibility that sales of non-floriculture plant material may be included.

The data in this report for all bedding plants, cut cultivated greens, cut flowers, flowering potted plants, foliage, and propagative materials are summarized only from growers with \$100,000 or more in annual sales. The data summarized in tables showing grower numbers, hired workers, and growing area represent all growers having sales of \$10,000 or more. The tables showing selected Hawaiian crops include data for all operations with sales at, or above, the \$10,000 level.

Survey Definitions

Floriculture Crop: Any item considered in the category of bedding/garden plants, cut cultivated greens, cut flowers, flowering potted plants, foliage plants, floriculture propagative material. Data for flowering potted plants and foliage plants represent only items intended for indoor or patio use. Refer to the copy of the questionnaire at the end of this report for specific examples.

Commercial Grower: Any operation which produces any commodity listed above and whose gross sales total \$10,000 or more during the calendar year.

Area in Production: All area used to grow a crop is counted, including area under glass, plastic, cloth, lath, and outdoors. Also, walkways and aisles are included. Area is counted only once, even though it may be refilled with additional crops.

Growing Area: Total growing area, by type of cover, includes the gross square feet of physical space available to grow all floriculture crops produced by the operations surveyed. It is not limited to actual area used and does not include multiple uses of the same area.

Quantity Sold: Sales represent both retail and wholesale quantities sold in the calendar year shown. Flowers, plants, or materials purchased from others for immediate re-sale are excluded. Bedding plant flats are converted to the standard 11-inch x 22-inch flat size.

Expanded Wholesale Value: Value of all crops grown, at wholesale, for growers above \$10,000. This figure is calculated using two parts. One part uses survey totals of wholesale value of all sales as reported by growers with \$100,000 or more of floriculture crop sales. The second part is a calculated value for operations which fall between the \$10,000 minimum and the \$99,999 level. The value is derived by multiplying the number of growers in each range of sales by the midpoint dollar value of each range. The two components are then summed to provide State and the 36 State total.

Value of Sales at Wholesale: The value of all crops is on a gross wholesale basis before deductions for sales commissions, transportation charges, or other similar deductions. The value shown is an equivalent value of all sales at a wholesale price. It is derived by multiplying the average wholesale price by the total quantity sold.
