SOYBEAN STOCKS UP---MOST GRAIN STOCKS DOWN FROM A YEAR EARLIER

January 1 stocks of all grains except sorghum and soybeans were below a year earlier according to the Crop Reporting Board. Stocks of the four feed grains (corn, oats, barley and sorghum) totaled 161.1 million tons, 7 percent less than holdings on January 1, 1973.

Stocks of all wheat were down one-third from a year earlier while Durum supplies were down 27 percent. Soybean stocks were up sharply with 35 percent larger holdings than a year ago.

CORN in all storage positions on January 1, 1974 totaled 4,465 million bushels, down 8 percent from the 4,831 million bushels a year earlier and 5 percent less than January 1, 1972. Farm holdings, at 3,353 million bushels, were down 9 percent from last year while off-farm stocks at 1,112 million bushels were 3 percent below January 1, 1973.

Indicated disappearance during October-December totaled 1,887 million bushels, compared with 1,869 million used in the same quarter a year earlier.

SORGHUM GRAIN in storage January 1, 1974 totaled 648 million bushels, 4 percent above a year earlier but 9 percent below the same date in 1972. Farm stocks accounted for 221 million bushels, an increase of 1 percent from last year while off-farm stocks at 427 million bushels were up 6 percent.

January 1 stocks indicate October-December disappearance of 361 million bushels, 9 percent above the same period in 1972 and 40 percent above the comparable 1971 period.

OAT stocks on January 1, 1974 totaled 634 million bushels, 18 percent less than a year earlier and 33 percent below January 1, 1972. Farm holdings of 473 million bushels were down 15 percent from a year ago while off-farm stocks were down 27 percent. Indicated disappearance from October through December 1973 was 171 million bushels, 12 percent larger than during the comparable period in 1972.

BARLEY stored in all positions on January 1 totaled 323 million bushels, 11 percent less than a year earlier. Off-farm stocks of 114 million bushels were 1 percent below a year ago and farm stocks, at 209 million bushels, were 15 percent smaller. Disappearance during October-December was 101 million bushels, up 10 percent from the same quarter in 1972.

UNITED STATES DEPARTMENT OF AGRICULTURE
STATISTICAL REPORTING SERVICE CROP REPORTING BOARD
GrLg 11-1 (1-74) WASHINGTON, D.C. 20250

ALL WHEAT in storage on January 1, 1974 totaled 934 million bushels, 33 percent below a year earlier and 40 percent less than 2 years ago. This is the lowest January 1 all wheat stocks since 1952. On-farm stocks totaled 368 million bushels, 28 percent less than a year ago while off-farm stocks at 566 million bushels were 36 percent below the comparable quarter a year earlier. Disappearance from all storage positions from October through December 1973 is indicated at 515 million bushels, compared with 472 million a year earlier.

DURUM WHEAT stocks in all positions on January 1, 1974 totaled 72.0 million bushels, 27 percent less than a year earlier and 40 percent below 2 years ago. Current stocks are the lowest for January 1 since 1968. Farm holdings at 53.4 million bushels were 26 percent below last year and off-farm stocks were down 28 percent. Disappearance during the October-December quarter is indicated at 25.3 million bushels, compared with 18.1 million for the same quarter a year earlier.

RYE stocks in all storage positions on January 1, 1974 totaled 21.2 million bushels, down sharply from the January 1, 1973 level of 54 million bushels, and the lowest January 1 stocks since 1965. Off-farm stocks at 13.3 million bushels were only about one-third of the year earlier holdings. The 7.9 million bushels held on-farm is slightly less than half of the 1973 level. Indicated disappearance during October-December 1973 at 15.7 million bushels was nearly double the 8 million bushels in the comparable quarter a year earlier.

SOYBEANS in all storage positions on January 1, 1974 totaled a record high 1,169 million bushels, 35 percent more than a year earlier. Farm stocks at nearly 617 million bushels were up 44 percent. Off-farm stocks at 552 million bushels were 26 percent above a year earlier.

Stocks on January 1, 1974 indicated a September-December disappearance of 457 million bushels from a total supply of 1,626 million bushels (carryover of about 60 million bushels plus 1973 production of nearly 1,567 million bushels). This compares with a disappearance of 476 million bushels for the same period a year earlier. During the past 4 months, 249 million bushels were crushed and about 183 million bushels were exported.

FLAXSEED stocks on January 1, 1974 totaled 10.4 million bushels, 25 percent below a year earlier and 70 percent below stocks at the beginning of 1972. Flaxseed stored off-farms accounted for 6.4 million bushels, 35 percent below a year earlier. On-farm storage of flaxseed accounted for 4.0 million bushels, 3 percent above January 1, 1973.

Indicated disappearance during October-December 1973 was 3.6 million bushels, off sharply from the same period a year earlier. Disappearance during the 6-month period July-December 1973 was 9.5 million bushels compared with 20.2 million bushels a year earlier. Reported flaxseed crushing during July-December 1973 totaled 9.7 million bushels while exports totaled 0.3 million bushels.

Off-Farm Grain Storage Capacity

Capacity of off-farm commercial grain storage in the Nation totaled 5,884 million bushels on January 1, 1974, 1 percent greater than a year earlier. Expansion of capacity occurred during the year in 31 States while 11 States recorded declines.

Kansas and Texas continued to rank 1 and 2 respectively in storage capacity and combined to account for about one-fourth of the Nation's capacity.

Illinois, Iowa, and Missouri had the largest increases during the year with 29, 16, and 16 million bushel increases respectively. The largest decline, 22 million bushels, occurred in Texas.

Capacity data, by States, include all elevators, warehouses, terminals, merchant mills, other storages and oilseed crushers which store grain, soybeans or flaxseed. Capacity data exclude CCC bins, warehouses used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco warehouses, seed warehouses, and storages that handle only dry beans or peas.
