## WHEAT STOCKS UP -- OTHER GRAIN STOCKS BELOW YEAR EARLIER

April 1 stocks of all wheat at 17.4 million metric tons were 17 percent above a year earlier, the Crop Reporting Board announced. Stocks of the four feed grains (corn, oats, barley and sorghum) totaled 69.1 million metric tons, 26 percent below the 93.4 million metric tons on April 1, 1974. Decreases from a year earlier for individual feed grains ranged from 23 percent for corn to 45 percent for sorghum.

Soybean stocks at 17.9 million metric tons were 11 percent below April 1, 1974.

Corn stored in all positions on April 1, 1975 totaled 2,209 million bushels, down 23 percent from the 2,861 million bushels a year earlier and 34 percent below April 1, 1973. This is the lowest April 1 stocks in all positions since 1955. Farm stocks, at 1,504 million bushels, are the lowest for April 1 since 1956 and are 25 percent below a year ago. Off-farm stocks, at 705 million bushels, are down 17 percent.

Disappearance from all storage positions during January-March is indicated at 1,405 million bushels, 13 percent below the 1,612 million bushels used in the same quarter a year ago.

Sorghum grain stocks in all positions on April 1, 1975 totaled 209 million bushels, down sharply from the April 1, 1974 level of 381 million bushels and 42 percent below the same date in 1973. Farm stocks at 64 million bushels are down 44 percent from a year ago and off-farm holdings at 145 million bushels are 46 percent below last April.

Disappearance from all storage positions during January-March of 172 million bushels compares with 264 million during the same quarter last year.

Oats stored in all positions on April 1, 1975 totaled 327 million bushels, 25 percent less than the April 1, 1974 stocks of 436 million bushels. Farm stocks of 239 million bushels compare with 289 million bushels a year ago. The 88 million bushels held in off farm positions are 59 million bushels below last April 1.

January-March indicated disappearance of 184 million bushels compares with 200 million bushels for the same quarter in 1974.

Barley stocks in all positions April 1, 1975 totaled 134 million bushels, representing a 38 percent decrease from a year earlier and a 48 percent decrease from April 1, 1973. Farm holdings at 62 million bushels declined 49 percent from a year earlier, while off-farm stocks at 72 million bushels declined 23 percent.

Disappearance from all storage positions during the January-March 1975 quarter is 96 million bushels, the lowest for the quarter since 1970, and compares with 106 million bushels during the same quarter last year.

All wheat in storage on April 1, 1975 totaled 638 million bushels. Except for last year, this is the smallest April 1 holdings since 1952. Stocks are 17 percent above a year earlier but 31 percent less than 2 years ago. Farm stocks totaled 250 million bushels, 38 percent above a year ago while off-farm stocks at 388 million bushels are up 6 percent. Disappearance from all storage positions from January through March 1975 is indicated at 463 million bushels, compared with 380 million a year earlier.

Durum wheat stocks in all positions on April 1, 1975 totaled 43.6 million bushels, 14 percent below a year earlier and the smallest for the date since 1962. Farm holdings at 32.1 million bushels were 7 percent below a year ago, and off-farm stocks showed a 30 percent decrease. Disappearance during the January-March quarter is indicated at 24.3 million bushels, compared with 16.8 million for the same quarter a year earlier.

Rye stocks in all storage positions totaled 8.4 million bushels as of April 1, 1975. This is a 53 percent decline from April 1, 1974 stocks and the lowest April 1 stocks since 1953. Stocks were about equally split between farm and off-farm positions. Farm holdings were down 5 percent from a year earlier while off-farm stocks were less than one-third the April 1, 1974 total. The January-March disappearance is indicated at 3.5 million bushels, the same as January-March 1974.

Soybean stocks totaled 659 million bushels on April 1, down 11 percent from last April. Farm stocks at 336 million bushels were 1 percent higher than last year, while off-farm stocks at 323 million bushels were 20 percent less than a year earlier.

Stocks on April 1 indicate a September-March disappearance of 745 million bushels from the beginning supply of 1,404 million bushels (carryover of 171 plus 1974 production of 1,233 million bushels). Disappearance for the same period last year totaled 869 million bushels. During the past 7 months, approximately 296 million bushels have been exported and 415 million bushels processed for oil.

Flaxseed stocks on April 1, 1975 totaled 4.7 million bushels, 32 percent below a year earlier and the smallest April 1 stocks since the beginning of quarterly flaxseed stocks estimates in 1948. Farm stocks accounted for 2.8 million bushels compared with 2.6 million bushels a year ago. Off-farm holdings at 1.9 million bushels are down sharply from the 4.4 million bushels a year ago.

Indicated disappearance during January-March is 3.2 million bushels compared with 3.4 million bushels a year earlier. April 1 stocks indicate a 9-month disappearance of 11.2 million bushels from a total supply of 15.9 million bushels. Reported disappearance during this 9-month period includes about 10.8 million bushels crushed. This compares with 12.9 million bushels crushed during the same 9-month period a year earlier.
