WHEAT AND FEED GRAIN STOCKS UP: SOYBEANS DOWN

January 1 stocks of all wheat at 48 million metric tons were 28 percent above a year earlier, the Crop Reporting Board announced. Stocks of the four feed grains (corn, oats, barley and sorghum) totaled 148 million metric tons, 7 percent above January 1, 1976 holdings. Increases from a year earlier for individual feed grains were 9 percent for corn and 3 percent for sorghum. Barley declined 1 percent and oats 16 percent.

Soybean stocks at 28 million metric tons were 18 percent below January 1, 1976.

CORN in all storage positions on January 1, 1977 totaled a record high 4,861 million bushels, up 9 percent from the 4,449 million bushels a year earlier and 34 percent above January 1, 1975. Farm stocks at 3,317 million bushels were up 4 percent. Off-farm stocks at 1,544 million bushels were 22 percent above January 1, 1976.

Indicated disappearance during October-December 1976 totaled 1,753 million bushels, up 3 percent from the 1,708 bushels for the same quarter a year ago.

SORGHUM GRAIN in storage January 1, 1977 amounted to 490 million bushels, 3 percent above a year earlier and 29 percent above the same date in 1975. Farm stocks totaled 161 million bushels, a decrease of 3 percent from last year while off-farm holdings at 329 million bushels were up 6 percent. January 1 stocks indicate October-December 1976 disappearance at 285 million bushels, compared with 321 in the same period last year.

OATS in storage January 1, 1977 totaled nearly 421 million bushels, 16 percent less than a year earlier and 17 percent below January 1, 1975. Current oat stocks are at a record January 1 low since records were started in 1944. Farm stocks at 347 million bushels were 15 percent below a year earlier and off-farm stocks at 73 million bushels were down 22 percent. Disappearance during the October-December quarter was 121 million bushels, compared with 126 million bushels in the same period last year.

BARLEY stored in all positions on January 1, 1977 totaled 272 million bushels, 1 percent below a year earlier. Off-farm stocks of 118 million bushels were 4 percent more than a year ago and farm stocks at nearly 155 million bushels were down 5 percent. Disappearance during October-December 1976 was 90 million bushels, up 35 percent from the same quarter in 1975 due primarily to larger exports.

See pages 29, 30 and 31 for quantity of grain moved off-farm and under producer ownership, January 1, 1977.

ALL WHEAT stored on January 1, 1977 totaled 1,777 million bushels, 28 percent more than last year and 60 percent greater than January 1, 1975. Farm stocks totaled 664 million bushels and off-farm stocks amounted to 1,113 million bushels. This is up 21 and 33 percent from last year's stocks, respectively. Disappearance during the October-December 1976 quarter amounted to 409 million bushels compared with 499 million bushels a year earlier.

DURUM WHEAT stocks on January 1, 1977 amounted to nearly 117 million bushels, 36 percent greater than last year and 65 percent more than two years ago. Durum stocks on farms totaled nearly 84 million bushels while off-farm stocks amounted to 33 million bushels. Disappearance of stocks from all storage positions during the final calendar quarter totaled 33 million bushels, compared with 29 million bushels during the same quarter last year.

RYE stored in all positions on January 1, 1977 totaled 9.2 million bushels, 5.1 million on-farms and 4.1 million off-farms. This compares with last year's total of 9.5 million with 5.7 million on-farms and 3.8 million off-farms. This is the second lowest January 1 stocks of record. Indicated disappearance during the October-December quarter totaled 5.8 million bushels, compared with 6.2 million bushels during the same quarter last year.

SOYBEANS in all positions on January 1, 1977 totaled 1,026 million bushels, down 18 percent from the record high level estimated a year ago, but 4 percent above the January 1, 1975 stocks. Farm stocks at 467 million bushels were 21 percent below a year earlier. Off-farm stocks at 559 million bushels were down 16 percent.

Based upon supplies and stocks, the September-December disappearance was 484 million bushels, 2 percent more than the 476 million bushel disappearance during the same quarter last year. During the past four months about 202 million bushels were exported and about 288 million bushels were crushed.

FLAXSEED stocks in all positions on January 1, 1977 totaled 7.0 million bushels, 27 percent below a year ago and down 8 percent from January 1, 1975. Farm stocks at 2.6 million bushels were down 36 percent from a year ago and off-farm stocks at 4.4 million bushels were down 21 percent. Indicated disappearance during October-December 1976 was 1.7 million bushels compared with 3.9 million bushels in the same 3-month period a year ago.

PRODUCERS CONTROL MAJORITY OF OFF-FARM GRAIN STOCKS

Producers retained ownership or some degree of pricing control on more than half the corn, wheat, sorghum, and soybeans stored in off-farm facilities on January 1, 1977, according to the Crop Reporting Board. Producer controlled stocks as a percentage of all grain stored off-farm varied by crops as follows: corn, 69 percent; wheat 77 percent; sorghum, 62 percent; soybeans, 52 percent.

Corn producers retain control over 1,060 million bushels that have been moved to off-farm facilities, or 69 percent of all off-farm stored corn. Producers in Ohio, Indiana, Illinois, Iowa and Nebraska control large quantities of corn, although Colorado and Washington producers control a higher percentage of off-farm stocks. Producers in the southern and eastern States had relatively little corn stored in off-farm facilities.

Nationally, wheat producers retain pricing control of 857 million bushels that have been moved to off-farm facilities, or 77 percent of all off-farm stored wheat. Producers in the Great Plains, the Pacific Northwest and in Michigan and Ohio control large quantities of wheat. Producer owned wheat in three States is reported to be larger than the total wheat stocks currently stored in off-farm facilities. This results from movement to out-of-State storages or into milling and export uses. Producers in the eastern half of the U. S., except for Michigan and Ohio, had relatively little wheat stored in commercial off-farm facilities. Durum wheat producers control 56 percent of all off-farm stocks. North Dakota producers control 16 million bushels, or 84 percent of all off-farm stored durum in North Dakota.

Soybean producers control 288 million bushels that were moved to off-farm storages, or 52 percent of all off-farm stored soybeans. Producers in the North Central States retain control of over half of the off-farm stored soybeans, except in Kansas. Farmer ownership of soybeans in States south and east of the North Central States is relatively small.

Producer control of off-farm stored sorghum amounted to 62 percent of all off-farm stored sorghum. The seven major sorghum States of Colorado, Kansas, Missouri, Nebraska, New Mexico, Oklahoma and Texas ranged from 47 to 74 percent of off-farm stocks owned by producers. Oat producers retain control of 32 percent of off-farm stored oats; barley producers, 24 percent; rye producers, 19 percent; and flax producers, 19 percent.

The Statistical Reporting Service conducted a special survey of the quantity of grain that had been moved off the farm and was still producer owned as of January 1, 1977. The survey was conducted in conjunction with the usual January 1, 1977 grain stocks survey of off-farm storages and was funded by the Economic Research Service. Information was obtained from managers of mills, elevators, warehouses and other facilities on a special questionnaire defining and asking for quantities of producer owned grain on record for the particular storage facility. Nationally, data on producer owned grain was reported for more than 75 percent of the total U. S. off-farm storage capacity. Statistical procedures were used to expand reported data for the non-reporting plants.

Producer owned grain stored in commercial off-farm storage facilities was defined as grain for which the producer had some marketing control. The amount of producer control varied considerably and depended on the particular agreement between the storage operator and producer. Agreements varied from warehouse receipts in bonded facilities to delayed pricing agreements, which allowed warehouse operators to move the grain. Movement could be to a larger facility in or out of State or even into milling or export channels. Producer owned grain as defined here does not necessarily include legal title but does include an obligation on the operator of the storage facility to provide settlement to the producer at some later date within the confines of their agreement. Grain under government loan and stored in an off-farm facility was considered producer owned. Grain sold to a co-op was not considered producer owned unless the individual producer retained some marketing control as indicated above.

OFF-FARM GRAIN STORAGE CAPACITY

Capacity of off-farm commercial grain storage in the Nation totaled 6,277 million bushels on January 1, 1977, 3 percent greater than a year earlier. Expansion of capacity occurred during the year in 32 States while 11 States recorded declines.

Kansas continued to rank first in storage capacity but Illinois replaced Texas for second place. Kansas, Illinois and Texas combined accounted for 35 percent of the Nation's capacity.

Illinois and Iowa had the largest increases during the year with 61 and 31 million bushel increases, respectively. The largest decline, 39 million bushels, occurred in Texas.

Capacity data by States, include all elevators, warehouses, terminals, merchant mills, other storages and oilseed crushers which store grain, soybean or flaxseed. Capacity data exclude warehouses used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco warehouses, seed warehouses, and storages that handle only dry beans or peas.
