SOYBEAN STOCKS SMALLEST IN FOUR YEARS:

WHEAT CARRYOVER LARGEST SINCE 1963

June 1 stocks of soybeans at 9.1 million metric tons were 40 percent below a year earlier, and the smallest since 1973, according to the Crop Reporting Board. Stocks of all wheat at 30.2 million metric tons were up 67 percent and the largest since 1963. Stocks of the four feed grains (corn, oats, barley and sorghum) totaled 69.9 million metric tons, 23 percent above June 1, 1976. Increases from a year earlier for individual feed grains were 26 percent for corn and 27 percent for sorghum. Barley was down 2 percent and oats down 19 percent.

Corn in all storage positions on June 1, 1977 totaled 2,351 million bushels, 26 percent above a year earlier and 58 percent above June 1, 1975. Farm stocks totaled 1,564 million bushels and off-farm stocks were 787 million bushels. Disappearance from all storage positions during April and May was 923 million bushels, down 4 percent from the same period of 1976.

Sorghum grain in all storage positions June 1, 1977 totaled 196 million bushels, 27 percent more than a year earlier and 50 percent above the same date in 1975. Farm stocks totaled 61 million bushels and off-farm holdings were 135 million bushels, up 23 and 30 percent, respectively, from June 1, 1976. Disappearance from all storage positions during April and May was 100 million bushels, 6 percent more than the disappearance during the same months in 1976.

Old crop oat stocks in storage on June 1, 1977 totaled 168 million bushels, 19 percent less than a year ago and a fourth less than on June 1, 1975. Farm stocks totaled 132 million bushels and off-farm stocks were nearly 36 million bushels. Disappearance from all storage positions during April and May 1977 was 96 million bushels, down 16 percent from the same period last year.

Farm stocks are based on mail responses from approximately 23,000 producers and personal interviews with farm operators residing in approximately 16,000 land areas who report total quantity located on their farming operation regardless of ownership. Off-farm stocks are based on reports from grain storage facilities that account for about 85 percent of the total off-farm storage capacity.

OLD CROP BARLEY stocks in storage in all positions on June 1, 1977 totaled nearly 127 million bushels, 2 percent less than a year earlier but nearly 38 percent greater than June 1, 1975. Farm stocks totaled 52 million bushels and off-farm stocks were 74 million bushels. Disappearance from all storage positions during April and May 1977 was 62 million bushels, 9 percent above the same period last year.

ALL WHEAT (OLD CROP) in farm and off-farm storage positions on June 1, 1977 totaled 1,109 million bushels, 67 percent more than last year's 664 million bushels and 55 percent more than two years ago. This is the largest June 1 stocks since 1963. Farm stocks totaled 425 million bushels and off-farm storage amounted to 684 million bushels. Disappearance from all storage positions during April and May amounted to 279 million bushels, 3 percent more than during the same period last year.

DURUM WHEAT (OLD CROP) stocks in all positions amounted to 85.5 million bushels, 60 percent more than last year's 53.5 million bushels. Farm stocks accounted for 64.6 million bushels and off-farm storage 20.9 million bushels. Disappearance from all positions during April and May amounted to 17.8 million bushels, compared with 17.6 million bushels for the same months a year ago.

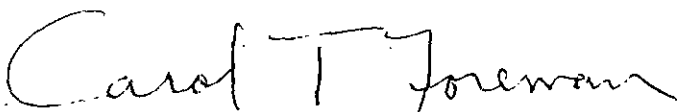

RYE (OLD CROP) stocks in all positions on June 1, 1977 amounted to 4.6 million bushels, 1 percent more than last year but 31 percent less than two years ago. Of this total, farm stocks accounted for 2.1 million bushels while off-farm storages contained 2.5 million bushels. Disappearance from all storage positions during April and May 1977 was 1.8 million bushels compared with 1.5 million bushels during April and May last year.

SOYBEAN stocks in all positions on June 1, 1977 totaled nearly 335 million bushels, down 40 percent from June 1 a year ago and 21 percent below 2 years ago. Farm stocks totaled 91 million bushels, 64 percent below a year ago, and off-farm stocks were 243 million bushels, down 19 percent from a year ago. Disappearance during April and May was 281 million bushels, 10 percent below the same period a year ago.

Disappearance for September 1976 - May 1977 period was 1,175 million bushels. During these nine months, exports totaled about 486 million bushels and crushings utilized about 634 million bushels based on data from the Bureau of Census, Commerce Department. Plantings, to June 1, accounted for about 46 million bushels used for seed.

OLD CROP FLAXSEED stocks on June 1 totaled 2.9 million bushels, 40 percent below a year ago and 4 percent below the June 1 level of 2 years ago. Farm stocks were estimated at 1.0 million bushels and off-farm stocks totaled 1.9 million bushels. April and May disappearance of U.S. produced flaxseed was 1.9 million bushels, 18 percent below the same period last year.
