RECORD LARGE WHEAT HOLDINGS

FEED GRAIN STOCKS CONTINUE TO CLIMB

On October 1, 1977, wheat stocks totaled a record large 65 million metric tons, 10 percent above a year earlier. Stocks of the four feed grains amounted to 43.1 million metric tons, 59 percent above October 1, 1976 and showed the following increases: corn, more than double; sorghum, a 77 percent gain; oats, 27 percent larger; and barley, up 8 percent.

Old crop corn stored in all positions on October 1 totaled 879 million bushels, more than double the 398 million bushels stored a year earlier. Of the total old crop, virtually half was stored on farms and half in off-farm storages. Disappearance June through September was 1,472 million bushels, little changed from those months in 1976.

Farm grain stocks are based on responses from approximately 23,000 producers who report total stocks on their farms. Off-farm stocks are based on reports from grain storage facilities that account for about 85 percent of the total off-farm storage capacity.

Old crop sorghum grain stocks totaled 91 million bushels on October 1, up 77 percent from last year. The 22 million bushels stored on farms represented a 53 percent increase and off-farm stocks of nearing 70 million bushels were up 86 percent. Disappearance during June-September was 105 million bushels, 3 percent ahead of a year ago.

Oats in storage October 1, amounted to 685 million bushels, 27 percent above the record low stocks of a year earlier. Farm stocks at 570 million bushels were 33 percent above a year earlier and off-farm stocks at 115 million bushels were up 3 percent. Usage during June-September was 242 million bushels, up 5 percent from last year.

Barley stocks increased to 391 million bushels on October 1, 8 percent above a year earlier. Farm stocks accounted for nearly 252 million bushels and off-farm stocks about 140 million bushels. Disappearance during June-September was 139 million bushels, 3 percent less than during the same months in 1976.

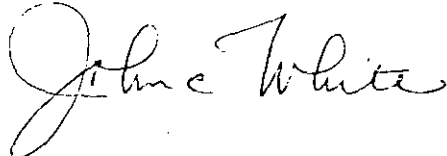

All wheat stocks on October 1 totaled a record high 2,397 million bushels, 10 percent more than last year and 27 percent greater than two years ago. Farm storages held a record 1,032 million bushels and off-farm 1,365 million bushels. Disappearance during June-September totaled 742 million bushels, 18 percent more than during the same months in 1976.

Durum wheat stocks amounted to 144 million bushels, 4 percent less than last year. Growers are holding 107 million bushels on-farms while slightly more than 37 million bushels are in off-farm storages. Disappearance of durum wheat during June-September totaled nearly 24 million bushels, compared with almost 39 million bushels last year.

Rye stocks in all positions totaled 14.7 million bushels, 2 percent less than last year's 15.0 million bushels. Farm stocks amounted to 10.7 million bushels and off-farm stocks almost 4.1 million bushels. June-September disappearance was indicated at 8.0 million bushels, compared with 6.2 million bushels last year.

Flaxseed stocks on October 1 were 14.4 million bushels, up 64 percent from a year ago. Farm stocks at 10.1 million bushels were more than two and one-half times as large as a year earlier; off-farm stocks declined to 4.3 million bushels. June-September indicated disappearance was 4.8 million bushels, 40 percent ahead of a year ago.
