SOYBEAN AND FEED GRAIN STOCKS RECORD HIGH--WHEAT STOCKS DECLINE

January 1, 1979 soybean stocks at 37.5 million metric tons were up 4 percent from a year ago and at a record high level, according to the Crop Reporting Board. Stocks of the four feed grains (corn, sorghum, barley and oats) totaled a record 190 million metric tons, 11 percent more than on January 1, 1978. Increases from last year for individual feed grains were 13 percent for corn, 4 percent for sorghum, and 17 percent for barley. Oat stocks were slightly below a year ago. Wheat stocks at 44.4 million metric tons were down 18 percent from a year earlier.

CORN in all storage positions on January 1, 1979 totaled a record high 6.20 billion bushels (157 million metric tons), up 13 percent from a year earlier and 27 percent above January 1, 1977. Farm stocks at 4.52 billion bushels (115 million MT) were up 18 percent from last year. Off-farm stocks at 1.68 billion bushels (42.7 million MT) were practically unchanged from last year.

Indicated disappearance during October-December 1978 totaled 1.99 billion bushels (50.5 million MT), up 10 percent from the same quarter a year ago.

SORGHUM GRAIN in all storage positions on January 1, 1979 amounted to 641 million bushels (16.3 million metric tons), 4 percent above a year earlier and 30 percent above the same date in 1977. Farm stocks totaled nearly 240 million bushels (6.09 million MT), 9 percent more than last year while off-farm holdings at slightly over 401 million bushels (10.2 million MT) were up 1 percent. January 1 stocks indicate October-December 1978 disappearance at 298 million bushels (7.58 million MT), compared with 265 million bushels (6.74 million MT) in the same period a year earlier.

OATS in storage January 1, 1979 amounted to 563 million bushels (8.17 million metric tons), slightly below the 565 million bushels (8.20 million MT) on hand a year ago, but 36 percent above the record low of 412 million bushels (5.99 million MT) in storage January 1, 1977. Farm stocks totaled 483 million bushels (7.01 million MT) compared with 482 million bushels (7.00 million MT) last year. Off-farm stocks amounted to 79.7 million bushels (1.16 million MT), down 4 percent from the 82.7 million bushels (1.20 million MT) a year ago. Disappearance during the October-December 1978 quarter was 103 million bushels (1.49 million MT), compared with 112 million bushels (1.62 million MT) in the same period last year.

BARLEY stored in all positions on January 1, 1979 totaled 387 million bushels (8.42 million metric tons), 17 percent above a year earlier and the highest January 1 stocks since 1972. Off-farm stocks at 114 million bushels (2.49 million metric tons) were 4 percent above a year earlier. Farm stocks at just over 272 million bushels (5.92 million metric tons) were 24 percent above last year and the highest January 1 farm stocks on record. Disappearance during October-December 1978 was 81.7 million bushels (1.78 million metric tons), up 8 percent from the previous year.

ALL WHEAT stored in all positions on January 1, 1979 totaled 1.63 billion bushels (44.4 million metric tons), 18 percent less than last year's 1.99 billion bushels (54.3 million metric tons). Farm stocks amounted to 815 million bushels (22.2 million metric tons) or 50 percent of the total wheat stocks. A year earlier farm stocks were 831 million bushels (22.6 million metric tons). Off-farm stocks, also at 815 million bushels (22.2 million metric tons), compare with 1.16 billion bushels (31.6 million metric tons) on January 1, 1978. Indicated disappearance during the October-December 1978 quarter totaled 506 million bushels (13.8 million metric tons) compared with 407 million bushels (11.1 million metric tons) during the same period a year earlier.

DURUM WHEAT stored in all positions on January 1, 1979 totaled nearly 118 million bushels (3.20 million metric tons), 8 percent more than a year ago when 108 million bushels (2.95 million metric tons) were on hand. On-farm stocks at 98.7 million bushels (2.69 million metric tons) represent 84 percent of total durum stocks. Off-farm stocks totaled 18.9 million bushels (514 thousand metric tons). Last year at this time, farm stocks were 81.9 million bushels (2.23 million metric tons) and 26.5 million bushels (722 thousand metric tons) were in off-farm storage.

Disappearance during the October-December 1978 quarter totaled 32.7 million bushels (891 thousand metric tons) compared with 31.4 million bushels (854 thousand metric tons) during the same period a year earlier.

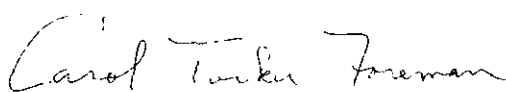

RYE stored in all positions on January 1, 1979 totaled 16.2 million bushels (410 thousand metric tons), 74 percent greater than last year's 9.29 million bushels (236 thousand metric tons). Farm stocks accounted for 68 percent of the 1979 total or 11.0 million bushels (281 thousand metric tons) compared with 6.38 million bushels (162 thousand metric tons) a year ago. Off-farm stocks totaled about 5.10 million bushels (130 thousand metric tons) compared with 2.91 million bushels (73.9 thousand metric tons) January 1, 1978. Indicated disappearance during the October-December quarter totaled 7.84 million bushels (199 thousand metric tons) compared with 5.47 million bushels (139 thousand metric tons) the previous year.

SOYBEANS in all positions on January 1, 1979 totaled 1.38 billion bushels (37.5 million metric tons), up 4 percent from a year ago. Farm stocks were up 3 percent to 690 million bushels (18.8 million metric tons) and off-farm stocks at 687 million bushels (18.7 million metric tons) were up 5 percent from a year ago. Both farm stocks and off-farm stocks are at record high levels for January 1.

The September-December indicated disappearance, based on supply and January 1 stocks, was 626 million bushels (17.0 million metric tons), up 16 percent from the 539 million bushel (14.7 million metric tons) disappearance during the same period a year ago. Exports totaled about 300 million bushels (8.17 million metric tons) and crush accounted for about 347 million bushels (9.43 million metric tons) during the September-December period.

FLAXSEED stocks in all positions on January 1, 1979 totaled nearly 8.40 million bushels (213 thousand metric tons), down 23 percent from the January 1 total a year ago but up 16 percent from two years ago. Farm stocks at 4.34 million bushels (110 thousand metric tons) were 25 percent below last year while off-farm stocks at 4.05 million bushels (103 thousand metric tons) were 22 percent below last year. Indicated disappearance during October-December 1978 was 1.45 million bushels (36.9 thousand metric tons) compared with 2.66 million bushels (67.5 thousand metric tons) in the same three-month period a year ago.

OFF-FARM GRAIN STORAGE CAPACITY

Capacity of off-farm commercial grain storage in the Nation totaled 6,990 million bushels on January 1, 1979, 5 percent greater than a year earlier. Expansion of capacity occurred during the year in 43 States while three States registered declines and two States showed no change.

Kansas continued to rank first in storage capacity followed by Illinois, Texas, Iowa, and Nebraska. These top five States together accounted for over 50 percent of the Nation's off-farm grain storage capacity.

Several States added large increases to capacity during 1978. They included Indiana, up 43 million bushels; Iowa, 43 million; Illinois, 40 million; Texas, 38 million; and Ohio, 32 million. Montana storage capacity declined 2 million bushels.

Capacity data by States include all elevators, warehouses, terminals, merchant mills, other storages, and oilseed crushers which store grain, soybeans, or flaxseed. Capacity data excludes warehouses used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco warehouses, seed warehouses, and storages that handle only dry edible beans or dry edible peas.

NUMBER OF OFF-FARM GRAIN STORAGE FACILITIES

There were an estimated 15,418 off-farm grain storage facilities in operation on January 1, 1979, a slight increase from 15,305 a year earlier. States with the largest number of facilities this year included Illinois 1213; Iowa 1120; and Kansas 1069. Data users are advised that some differences exist between States in including or excluding counts of facilities in the grain stocks universe. In a few instances, the count includes only the headquarters which reports for more than one facility. This does not affect the data on total capacity. The count includes facilities used to store grain, soybeans, or flaxseed. Excluded are facilities used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco and seed warehouses and storages that handle only dry edible beans or dry edible peas.
