OFF-FARM GRAIN STORAGE CAPACITY

Capacity of off-farm commercial grain storage in the Nation totaled 7,121 million bushels on January 1, 1980, 2 percent greater than a year earlier. Expansion of capacity occurred during the year in 31 States while 15 States registered declines and 2 States showed no change.

Kansas retained its number one rank in total storage capacity followed by Illinois, Texas, Iowa, and Nebraska. These top five States together accounted for 52 percent of the Nation's off-farm grain storage capacity.

Several States--all located in the Corn Belt--made large additions to capacity during 1979. These include Iowa and Nebraska, each up over 27 million bushels, and Ohio, Minnesota and Illinois, each up 10 to 12 million bushels. California capacity declined almost 5 million bushels.

Capacity data by States include all elevators, warehouses, terminals, merchant mills, other storages, and oilseed crushers which store grain, soybeans, or flaxseed. Capacity data exclude warehouses used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco warehouses, seed warehouses, and storages that handle only dry edible beans or dry edible peas.

NUMBER OF OFF-FARM GRAIN STORAGE FACILITIES

There were an estimated 15,169 off-farm grain storage facilities in operation on January 1, 1980, a decline of 194 from a year earlier. States with the largest number of facilities this year included Illinois, 1,179; Iowa, 1,090; Kansas, 1,059; Texas, 908; and Minnesota, 875. Data users are advised that some differences exist between States in the procedure for making counts of facilities in the grain stocks universe. In a few instances, the count includes only the headquarters which report for more than one facility. This does not affect the data on total capacity. The same facilities are included in the number of facilities and in the capacity data.
