
Grain Stocks

Agricultural
Statistics
Board

National Agricultural
Statistics Service

United States
Department of
Agriculture

Washington, D.C. 20250

RELEASED: January 15, 1987
3:00 P.M. ET

CORN stored in all positions on December 1, 1986 is estimated at 10.3 billion bushels (262 million metric tons). Of the total stocks, 6.80 billion bushels (173 million metric tons) were stored on the farm and 3.51 billion bushels (89.1 million metric tons) were stored off the farm. The September-November 1986 indicated disappearance based on supply and December 1 stocks is 1.99 billion bushels (50.5 million metric tons).

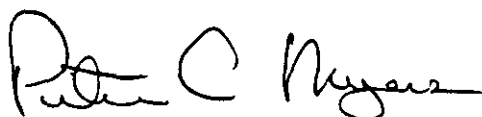

* NOTICE *
* *
* The next issue of this report will be published March 31, 1987 *
* *
* Changes in the program announced last year (see Grain Stocks released *
* April 29, 1986) resulted in a change in reference dates for on-farm and *
* off-farm stocks from October 1 to September 1, January 1 to December 1, *
* and April 1 to March 1. The June 1 date remains unchanged. *
* *
* Requests for a subscription order form covering all available reports *
* should be directed to Agricultural Statistics Board Publications, Room *
* 5829-South Building, USDA, Washington, D.C. 20250 (Phone (202) 447-4021). *
* *
* This report and other statistical, economic, marketing and news reports *
* are available as soon as possible following release through USDA's EDI *
* SERVICE. For more information, call or write: Russell Forte, (202) *
* 447-5505, OGPA, USDA, Washington, D.C. 20250. *

ALL WHEAT stocks in all positions on December 1, 1986 are estimated at 2.66 billion bushels (72.5 million metric tons). Wheat stored on-farms is 1.06 billion bushels (28.9 million metric tons). Off-farm stocks total 1.60 billion bushels (43.6 million metric tons), or 60 percent of the total stocks. The indicated disappearance from all positions September-November 1986 is 490 million bushels (13.3 million metric tons).

DURUM WHEAT stocks in all positions on December 1, 1986 are placed at 154 million bushels (4.18 million metric tons). Farm stocks total 96.0 million bushels (2.61 million metric tons), 62 percent of all durum stocks. The indicated September-November 1986 disappearance from all positions is 24.0 million bushels (652 thousand metric tons).

SOYBEANS in all storage positions on December 1, 1986 totaled 1.98 billion bushels (53.9 million metric tons). Farm stocks totaled 1.09 billion bushels (29.6 million metric tons) and off-farm stocks are placed at 894 million bushels (24.3 million metric tons). The September-November 1986 indicated disappearance, based on supply and December 1 stocks, is 563 million bushels (15.3 million metric tons).

ON-FARM GRAIN STORAGE CAPACITY

The National Agricultural Statistics Service collects on-farm grain storage capacity data as part of the Agency's quarterly agricultural surveys. The capacity data from the December Agricultural Survey is published annually for selected States and the United States, excluding Alaska, Hawaii, and the New England States. The data published are indications computed directly from the survey and as such are subject to sampling fluctuations. The data do provide indications of farm storage capacity within a range indicated by the sampling error. A measure of this sampling error is expressed as a percent of the survey indications (coefficient of variation). When comparing the data year to year, this survey variability must be taken into account.

Nearly 76,000 reports from farmers and ranchers were included in the survey. The particular sample of respondents used to calculate the storage capacity indication is one of a large number of same-size samples that could have been selected in accordance with the sampling design. At the U.S. level, the on-farm storage capacity indication of 13.8 billion bushels has a sampling error of 1.0 percent. This means that chances are 2 out of 3 that if the storage capacity indications from all possible samples were averaged together the result would be within plus or minus 1.0 percent of 13.8 billion bushels. Individual State indications have larger confidence bands.

OFF-FARM GRAIN STORAGE CAPACITY

Capacity of off-farm commercial grain storage totaled 9.13 billion bushels in the United States on December 1, 1986. Capacity increased 10 percent from the January 1, 1986 revised figure of 8.29 billion bushels. The largest increases in capacity occurred in Iowa - 182 million bushels, Illinois - 143 million bushels, and Nebraska - 111 million bushels. Increases occurred in 30 States, decreases in 10 States, and 2 States and New England remained unchanged from January 1, 1986.

Illinois continues to lead all States in off-farm storage capacity, followed by: Iowa, Kansas, Texas, and Nebraska. The top 5 States account for 53 percent of the Nation's off-farm storage capacity on December 1, 1986.

State capacity data include all elevators, warehouses, terminals, merchant mills, other storages, and oilseed crushers which store grain, soybeans, sunflower, or flaxseed. Capacity data exclude warehouses used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco warehouses, seed warehouses, and storages that handle only dry edible beans.

NUMBER OF OFF-FARM GRAIN STORAGE FACILITIES

Off-farm grain storage facilities totaled 14,041 on December 1, 1986, 22 fewer than on January 1, 1986. States with the largest number of facilities include: Illinois - 1300, Kansas - 973, Iowa - 931, Texas - 857, and Minnesota - 803.

Data users are advised that some differences may exist, between States, in the procedure for making counts of facilities in the grain storage universe. In a few instances, the count includes only the headquarters which report for more than one facility. This does not affect the data on total capacity.
